Accounting Specialist Fast Track
Certificate Program

This course is a study of the basic accounting cycle from the source documents to the post-closing documents. Using a workbook, learners will have the opportunity to analyze, record, journalize, post, etc. for a fictitious business. Learners will acquire the understanding of banking procedures and control of cash. Students will also be exposed to the payroll process, by calculating, paying, recording and reporting payroll and payroll taxes.

This course presents the basic framework and concepts of accounting in a manual setting. Students will analyze, classify and record business transactions. Upon completion, students will have a fundamental understanding of the accounting cycle. In addition, students will have learned to prepare financial statements and understand their impact on economic decision making and their value to various entities and the public. As well as, comprehend banking procedures, control of cash and the fundamentals of the payroll process.
