Listed on the following pages are the course descriptions for classes available at San Jacinto Community College District. The descriptions will help you choose courses which best fit your degree plan, career goals, and/or transfer requirements. The information about each course includes the course rubric and number, title, a brief description and any prerequisites.

A four-letter rubric, or alphabetic prefix, precedes each course title to indicate the subject area of the course or department through which the course is offered. An Index to Disciplines and an Index of Course Rubrics are located on the front part of this section along with helpful definitions.
## Index to Subjects

An alphabetic prefix called a rubric usually contains four characters, and is used to designate the subject area of the course or department through which the course is offered.

Each course is given a four-character numeric code, called a course number. The first digit denotes the academic level or year in which college-level courses are usually taken. The number “1” indicates freshman or first-year courses; the number “2” indicates sophomore or second-year courses. When the first number is “0,” the course is college preparatory level. The second digit represents the semester credit hour (SCH) value of the course. The third and fourth digits are for departmental sequencing and make the course number unique within the subject area of the department. Consecutive numbers are not always used; however, in general, higher numbers are used for the more advanced courses while lower numbers are used for less advanced courses.

Numbers in parentheses at the end of each course description indicate the following: first digit, semester credit hours; second digit, lecture hours per week; third digit, laboratory hours per week. A capital letter “A” indicates tech-prep articulation.

</table>

**Definitions:**

- **Course Number:** A four-letter rubric (subject) and four-digit number: SUBJ 1234. First digit “0” indicates college preparatory, “1” indicates freshman level; “2” indicates sophomore level. Second digit indicates number of semester hours of credit. Third and fourth digits uniquely identify the course.

- **Course Title:** Descriptive Title for Transcript

- **Classification Code (in parenthesis):** Federal CIP Code, 6 digits indicate a work force education course and 10 digits indicate an academic transferable course.

- **Description:** A short description of the course content.

- **Former Course Designation, if any:** Previous course number(s) used at San Jacinto Community College District for this course.

- **Course Prerequisites:** Courses or basic skill levels as defined by Texas Success Initiative required before enrollment.

- **(SCH:LEC-LAB):** SCH = Semester credit hours of the course; LEC = Lecture contact hours per week for a 16-week course; LAB = Lab contact hours in a 16-week course.
Accounting

ACCT 2301 Accounting Principles I
This study of the fundamentals of financial accounting includes accounting procedures, concepts, and theory for proprietorships, partnerships, and corporations. The class emphasizes the accounting cycle for service and merchandising enterprises. Prerequisite: Reading level 7 (3:3-1.5)

ACCT 2302 Accounting Principles II
This study of the fundamentals of managerial accounting emphasizes accounting for a manufacturing concern. Topics include budgeting, planning, and management decision making. Prerequisite: ACCT 2301 (3:3-1.5)

ACNT 1303 Introduction to Accounting I
This course focuses on analyzing, classifying, and recording business transactions in a manual and computerized environment. Emphasis is on understanding the complete accounting cycle and preparing financial statements, bank reconciliations, and payroll. (ACNT 1303 may not count for degree or certificate purposes if the student receives credit for ACCT 2301.) ACNT 1303 and 1304 will not satisfy the business administration transfer program degree accounting requirements. (3:3-0)

ACNT 1304 Introduction to Accounting II
This course focuses on accounting for merchandising, notes payable, notes receivable, valuation of receivables and equipment, and valuation of inventories in a manual and computerized environment. Prerequisite: ACNT 1303 (ACNT 1304 may not count for degree or certificate purposes if the student receives credit for ACCT 2301.) ACNT 1303 and 1304 will not satisfy the business administration transfer program degree accounting requirements. (3:3-0)

ACNT 1311 Introduction to Computerized Accounting
This course provides an introduction to utilizing the computer in maintaining accounting records, making management decisions, and processing common business applications, with primary emphasis on a general ledger package and spreadsheet applications. Typical areas covered include the general ledger, accounts payable, accounts receivable, and payroll. It is recommended that students have prior knowledge and/or experience in accounting. (3:3-0)

ACNT 1329 Payroll and Business Tax Accounting
This is a study of payroll procedures, taxing entities, and reporting requirements of local, state, and federal taxing authorities in a manual and computerized environment. Prerequisite: Reading level 4 (3:3-0)

ACNT 1331 Federal Income Tax: Individual
This course provides basic instruction in the tax laws as currently implemented by the Internal Revenue Service and in tax preparation for the individual and sole proprietorship. Prerequisite: Reading level 4 (3:3-0)

ACNT 2303 Intermediate Accounting I
The focus of this course is critical analysis of generally accepted accounting principles, concepts, and theory underlying the preparation of financial statements. Emphasis is on current theory and practice. Prerequisite: ACCT 2301 (3:3-0)

ACNT 2304 Intermediate Accounting II
The focus of this course is in-depth analysis of generally accepted accounting principles underlying the preparation of financial statements, including comparative analysis and statement of cash flow. Prerequisite: ACCT 2301 (3:3-0)

ACNT 2309 Cost Accounting
This course focuses on budgeting and cost control systems, including a detailed study of manufacturing cost accounts, and reports, job ordering, and process costing. It includes an introduction to alternative costing methods such as activity-based and just-in-time costing. Prerequisite: ACCT 2302 or equivalent (3:3-0)

ACNT 2366 Practicum-Accounting
This course offers practical general training and experiences in the workplace. The College, with the employer, develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. The course may be repeated if topics and learning outcomes vary, but no more than three times for credit. Prerequisite: ACCT 2301 and 2302 or approval of department chair. (3:0-21)

BMGT 1341 Business Ethics
This course offers discussion of ethical issues, development of a moral frame of reference, and the need for an awareness of social justice in management practices and business activities. Review of ethical responsibilities and relationships between organizational departments, divisions, executive management, and the public. Prerequisite: Reading level 4 (3:3-0)

Aeronautical Technology

AIRP 1215 Private Flight
This is flight training to prepare the student for the completion of the Federal Aviation Administration (FAA) private pilot certificate, including dual and solo flight, in which students practice specific maneuvers and cross-country navigation. Prerequisite: Reading level 6. Prerequisite or co-requisite: Federal Aviation Regulation part 141, Ground School Training and aeronautical department chair approval (AIRP 1301, AIRP 1307, and AIRP 1311) (2:1-3)

AIRP 1255 Intermediate Flight (Commercial Pilot)
This course provides students with flight hours and skills necessary to meet solo cross-country requirements for the FAA Commercial Pilot, single-engine land, airplane certificate. Prerequisite: AIRP 1215 or valid Private Pilot Certificate. Reading level 6. Prerequisite or co-requisite: AIRP 2250 and aeronautical department chair approval (2:1-2)

AIRP 1301 Air Navigation
Students receive instruction in visual flight navigation rules in the National Airspace System. Topics include sectional charts, flight computers, plotters, and navigation logs and publications. It qualifies as part of a program leading to Federal Aviation Administration certification, and is one of three Private Pilot Ground School courses. (3:3-0)

AIRP 1307 Aviation Meteorology
This course provides in-depth coverage of meteorological phenomena affecting aircraft flight. Topics include basic concepts of aviation meteorology in the study of temperature, pressure, moisture, stability, clouds, air masses, fronts, thunderstorms, icing, and fog. It also includes analysis and use of weather data for flight planning. It qualifies as part of a program leading to FAA certification, and is one of three Private Pilot Ground School courses. (3:3-0)

AIRP 1311 Flight Theory
This course provides instruction in basic flight information needed for flight in the National Aerospace System. Topics include publications, regulations, aircraft systems, and performance. It qualifies as part of a program leading FAA certification, and is one of three Private Pilot Ground School courses. (3:3-0)
AIRP 1341 Advanced Air Navigation
This course helps students develop advanced airplane systems and performance skills, including navigation and cross-country flight planning. Includes an introduction to instrument flight operations and navigation. This course may be used as part of a program leading to FAA certification. Prerequisite: AIRP 1301, or a Private Pilot Certificate (3:3-0)

AIRP 1343 Aerodynamics
This is a study of the general principles of the physical laws of flight. Topics include physical terms and the four forces of flight: lift, weight, thrust, and drag. Aircraft design, stability control, and high-speed flight characteristics are also included. Prerequisite: Math level 7 (3:3-0)

AIRP 1345 Aviation Safety
This survey of the fundamentals essential to the safety of flight focuses on decision-making factors, accident reporting, accident investigation, air traffic systems, and aircraft technologies. (3:3-0)

AIRP 1347 Human Factors in Aviation
This course provides instruction in flight physiology, the decision-making process, pilot health maintenance, psychological aspects of flight, human behavior as related to the aircraft flight deck, and aeronautical information of significance to flight crews. (3:3-0)

AIRP 1451 Instrument Ground School
This is a study of basic instrument radio and navigation fundamentals used in instrument flight. Topics include a description and practical use of aeronautical navigation systems and instruments, charts used for instrument flight, and FAA regulations. It qualifies as part of a program leading to FAA certification. Prerequisite: AIRP 1341 (4:4-0)

AIRP 2239 Commercial Flight (Commercial Pilot)
The flight instruction in this course is necessary to qualify for the FAA Commercial Pilot Certificate. Instruction includes both dual and solo flight training to prepare the student for mastery of all commercial pilot maneuvers. Prerequisite: AIRP 2337 (2:1-3)

AIRP 2242 Flight Instructor-Instrument Airplane
This course helps flight instructors develop the skills necessary to qualify for the FAA Certified Flight Instructor Instrument Rating including airplane single-engine landing. Prerequisites: Flight Instructor and Instrument Pilot Certificates, Reading level 6, and aeronautical department chair approval (2:2-0)

AIRP 2243 Flight Instructor-Multiengine Airplane
The flight instruction in this course is necessary to qualify for the FAA Flight Instructor-Multiengine Airplane Rating. It includes combined ground and flight instruction and analysis of flight maneuvers. Prerequisites: Private, Commercial, Instrument, Multi-engine and Flight Instructor Certificates Reading level 6 (2:1-2)

AIRP 2250 Instrument Flight (Instrument Pilot)
This course prepares students for completion of the FAA Instrument Pilot Rating with mastery of all instrument flight procedures. Prerequisites: AIRP 2215 or a valid Private Pilot Certificate and aeronautical department chair approval. Prerequisite: Reading level 6. Prerequisite or co-requisite: FAR part 141 ground school training (AIRP 1451) (2:1-3)

AIRP 2251 Multi-Engine Flight
This course is preparation for the multi-engine class rating, which will be added to a current pilot certificate. It includes explanation and demonstration of all required FAA normal and emergency operations and procedures. Prerequisites: AIRP 1215, AIRP 1255, AIRP 2239, and AIRP 2250 or Private or Commercial Pilot Certificate and Instrument Pilot Rating and aeronautical department chair approval. Reading level 6 (2:2-0)

AIRP 2253 Aeronautical Information Management
This course is preparation for the FAA AIP publication service. It includes preparation for the FAA AIP publication service. Prerequisite: AIRP 2355 (3:3-0)

AIRP 2254 Aeronautical Information Management II
This course prepares students for completion of the FAA AIP publication service. It includes preparation for the FAA AIP publication service. Prerequisite or co-requisite: AIRP 2254 (2:1-2)

AIRP 2256 Advanced Meteorology
This course prepares advanced aviation students to apply knowledge of varying meteorological factors (including weather hazards to flight) to flight. It teaches techniques for minimizing weather hazards and for using aviation weather services. Prerequisite: AIRP 1307 (3:3-0)

AIRP 2333 Aircraft Systems
This is a study of the general principles, operation, and application of pneumatic, hydraulic, electrical, fuel, environmental protection, and warning systems. Emphasis is on types of aircraft structures and their control systems. (3:3-0)

AIRP 2336 Certified Flight Instructor-Airplane
This flight instruction is necessary to qualify for the FAA Certified Flight Instructor-Airplane Certificate. Topics include ground and flight instruction. Prerequisites: Commercial Pilot Certificate and Instrument Pilot Rating and aeronautical department chair approval, Reading level 6 (3:2-3)

AIRP 2337 Commercial Ground School
This is a study of advanced aviation topics that can be used for FAA certification at the commercial pilot level. It includes preparation for the FAA Commercial Airplane written test. Prerequisites: AIRP 1301, AIRP 1307, and AIRP 1311; or a Private Pilot Certificate (3:3-0)

AIRP 2352 Practical Dispatching I
This is a study of advanced concepts in weight and balance, performance calculations, avionics, and engine and airplane specifications, including FAA regulations. Preparation for the FAA Aircraft Dispatcher includes a written examination. (3:3-0)

AIRP 2353 Practical Dispatching II
This is a study of the duties and responsibilities required of an aircraft dispatcher. Topics include instruction in FAA regulations; flight planning; and company operations, both domestic and international. Preparation for the FAA Practical Examination is also included. Students must be at least 22 1/2 years old to take the FAA Aircraft Dispatcher exam. Prerequisite or co-requisite: AIRP 2352 (3:3-1)

AIRP 2355 Propulsion Systems
This course provides in-depth coverage of aircraft engine theory and principles of operation of various types of aircraft engines, including reciprocating, turboprop, turbojet, and turbofan. Topics include propellers, superchargers, engine accessories, control, and instrumentation. (3:3-0)

AIRP 2357 Turbine Aircraft Systems Ground School
This course provides instruction in the systems of specific turbine aircraft. Emphasis is on the "glass-cockpit," auxiliary power, aircraft systems, and the first officer's operational role. Prerequisite: AIRP 2355 (3:3-0)

AVIM 1301 Introduction to Aviation Management
An introduction to small aviation business management, this course emphasizes financial marketing, human resources, and administrative and information systems essential for successful business operations. (3:3-0)

AVIM 2331 Airline Management
This is an examination of the organization, operation, and management of airlines. Topics include financing, aircraft selection, route feasibility studies, load factors, and marketing. (3:3-0)
AVIM 2335 Airport Management
This is a study of the major functions of airport management, including facilities and services, organization, human resources, maintenance, planning and zoning, operations, revenues and expenses, public relations, ecology, and safety. (3:3-0)

AVIM 2337 Aviation Law
This is a study of the historical development of aviation law, including in-depth coverage of constitutional, criminal, civil, common, and international law as related to aviation activities. (3:3-0)

AVIM 2339 Aviation Marketing
This is a study of significance and functions of airline marketing, including market research, sales, advertising and promotion, traffic demand analysis, and price determination theory. (3:3-0)

Air Conditioning

HART 1356 EPA Recovery Certification Preparation
This course covers certification training for HVAC refrigerant recovery and recycling. Instruction will provide a review of EPA guidelines for refrigerant recovery and recycling during the installation, service, and repair of all HVAC and refrigeration systems. (3:3-0)

HART 1401 Basic Electricity for HVAC
This course focuses on principles of electricity as required by HVAC, including proper use of test equipment, electrical circuits, and component theory and operation. (4:3-3)

HART 1407 Refrigeration Principles
This is an introduction to the refrigeration cycle, basic heat transfer theory, temperature/pressure relationship, refrigeration handling, and components and safety. (4:3-3)

HART 1441 Residential Air Conditioning
This is a study of components, applications, and installation of mechanical air conditioning systems. Topics include operating conditions, troubleshooting, repair, and charging of air conditioning systems. Prerequisites: HART 1401 and HART 1407 or department chair approval (4:3-3)

HART 1445 Gas and Electrical Heating
This is a study of the procedures and principles used in servicing heating systems including gas fired furnaces and electric heating systems. Prerequisites or co-requisites: HART 1401 and HART 1407 or department chair approval (4:3-3)

HART 2301 Air Conditioning and Refrigeration Codes
This course focuses on HVAC standards and concepts, with emphasis on understanding and documenting the codes and regulations required for a state mechanical contractors license and compliance with local codes. Prerequisite: HART 1441 or department chair approval (3:3-0)

HART 2302 Commercial Air Conditioning System Design
This is an advanced study in essential elements of commercial air conditioning contracting, including duct systems design and/or material takeoff, weight estimating, equipment selection, using manufacturers’ catalog data, job cost estimating, scheduling preparation of shop drawings, and submittals. Prerequisites: HART 2345 and HART 2441 or department chair approval (3:3-0)

HART 2334 Advanced A/C Controls
This course focuses on the theory and use of electrical control devices, electromechanical controls, and/or pneumatic controls. Prerequisites: HART 2431 and HART 2441 or department chair approval (3:3-0)

HART 2343 Industrial Air Conditioning
This is a study of components, accessories, applications, and installation of air conditioning systems above a 25 ton capacity. Prerequisites: HART 2441 and HART 2431 or department chair approval (3:3-0)

HART 2345 Residential A/C System Design
Students study the properties of air and results of cooling, heating, humidifying or dehumidifying. They also learn to make heat gain or heat loss calculations necessary for equipment selection and balancing air systems. Prerequisites: HART 1441 and HART 1445 or department chair approval (3:3-0)

HART 2346 Practicum (or Field Experience) - HVAC/R Technology/Technician
This course offers practical general workplace training through individualized learning plans developed by the employer, the College, and the student. Prerequisites: Completion of 20 semester hours of air conditioning courses, an interview, and department chair approval are required prior to internship assignment (3:0-21)

HART 2347 Heat Pumps
This is a study of heat pumps, heat pump control circuits, defrost controls, auxiliary heat, air flow, and other topics related to heat pump systems. Prerequisites: HART 1401 and HART 1407 or department chair approval (4:3-3)

HART 2349 Heat Pumps (or Field Experience)
This is a study of heat pumps, heat pump control circuits, defrost controls, auxiliary heat, air flow, and other topics related to heat pump systems. Prerequisites: HART 1401 and HART 1407 or department chair approval (4:3-3)

HART 2368 Practicum (or Field Experience) - HVAC/R Technology/Technician
This course offers practical general workplace training through individualized learning plans developed by the employer, the College, and the student. Prerequisites: Completion of 20 semester hours of air conditioning courses, an interview, and department chair approval are required prior to internship assignment (3:0-21)

HART 2431 Advanced Electricity
This course provides advanced electrical instruction and skill building in installation and servicing of air conditioning and refrigeration equipment, including detailed instruction in motors and power distribution motors, motor controls, and applications of solid state devices. Prerequisite: HART 1441, HART 1445 or department chair approval (4:3-3)

HART 2434 Advanced A/C Controls
This course covers methods for troubleshooting electrical control devices and control circuits, including correctly wiring electrical components. Prerequisite or co-requisite: HART 2431 or department chair approval (4:3-3)

HART 2436 Air Conditioning Troubleshooting
This is an advanced course in the application of troubleshooting principles and use of test instruments to diagnose air conditioning and refrigeration component and system problems, including conducting performance tests. Prerequisites: HART 1441 and HART 1445 or department chair approval (4:3-3)

HART 2441 Commercial Air Conditioning
This is a study of components, applications, and installation of air conditioning systems with capacities of 20 tons or less. Prerequisites or co-requisites HART 1441 and HART 2431 or department chair approval (4:3-3)

HART 2442 Commercial Refrigeration
This course focuses on both the theory and practice in the maintenance of commercial refrigeration at both medium and low temperature applications, and ice machines. Prerequisites or co-requisites: HART 1401 and HART 1407 or department chair approval (4:3-3)

HART 2449 Heat Pumps
This is a study of heat pumps, heat pump control circuits, defrost controls, auxiliary heat, air flow, and other topics related to heat pump systems. Prerequisites: HART 1401 and HART 1407 or department chair approval (4:3-3)
Course Descriptions

Air Conditioning (HVAC) Certificate

Non-Credit Continuing Education Course

HART 1007 Refrigeration Principles
This is an introduction to the refrigeration cycle, basic thermodynamics, heat transfer, temperature/pressure relationship, safety, refrigeration containment, and refrigeration components.

HART 1041 Residential Air Conditioning
This is a study of components, applications, and installation of mechanical air conditioning systems, including operating conditions, troubleshooting, repair, and charging of air conditioning systems.

HART 1045 Gas and Electric Heating
This is a study of the procedures and principles used in servicing heating systems, including gas-fired and electric furnaces.

Anthropology

ANTH 2302 Introduction to Archaeology
This study of human prehistory chronicles the major cultural developments in humanity’s past and explores the unique methods archeologists use to retrieve, process, and analyze material culture. Prerequisites: Reading level 7 and Writing level 7 (3:0-3)

ANTH 2346 General Anthropology
This is a study of human beings, their antecedents and related primates, and their cultural behavior and institutions. It introduces the major subfields: physical and cultural anthropology, archeology, linguistics, and ethnology. Prerequisites: Reading level 6 and Writing level 6 (3:0-3)

ANTH 2351 Cultural Anthropology
This survey of cultures around the world is an attempt to explain the similarities and differences in human behavior through an examination of the theories and methods of anthropology, including social and political organizations, ethnicity, language, and beliefs in the supernatural. Prerequisites: Reading level 7 and Writing level 7 (3:0-3)

Applied Computer Electronics Technology

(See Electronics Technology)

Art and Visual Communication

ARTC 1302 Digital Imaging I
This course teaches digital imaging using raster image editing and/or image creation software: scanning, resolution, file formats, output devices, color systems, and image acquisitions. Prerequisite: ARTC 1325 or ARTS 2348 (3:2-4)

ARTC 1317 Design Communication I
This is an introductory study of design development relating to graphic design terminology, tools, media, and layout and design concepts. Topics include integration of type, images, and other design elements, and developing computer skills in industry standard computer programs. Students will not receive credit for both ARTC 1317 and ARTS 2313. Prerequisite: ARTC 1325 or ARTS 2348 or concurrent enrollment with ARTC 1325 or ARTS 2348 with department chair approval (3:0-2)

ARTC 1321 Illustration
This is a study of illustration techniques in various media. Emphasis is on creative interpretation and disciplined draftsmanship for visual communication of ideas. Prerequisite: ARTS 1317, ARTS 2313 or approval of department chair (3:0-2)

ARTC 1325 Introduction to Computer Graphics
This is a survey of computer design concepts, terminology, processes, and procedures. Topics include computer graphics hardware, electronic images, electronic publishing, vector-based graphics, and interactive multimedia. Students will not receive credit for both ARTC 1325 and ARTS 2348. (3:2-4)

ARTC 1327 Typography
A study of letter forms and typographic concepts as elements of graphic communication. Emphasis is on developing a current, practical typographic knowledge based on industry standards. (3:2-4)

ARTC 1353 Computer Illustration
Students explore computer programs with applications to illustration and photo manipulation and file management for reproduction. Emphasis is on concept development in print for digital delivery. Prerequisite: ARTC 1321 or approval of department chair (3:2-4)

ARTC 2331 Illustration Concepts
This is an advanced study of different painting media utilizing both digital and traditional tools. Emphasis is on conceptualization and composition as they relate to “real world” assignments. Prerequisites: ARTC 1353 or approval of department chair (3:2-4)

ARTC 2335 Portfolio Development for Graphic Design
Students prepare a portfolio comprised of completed graphic design class projects. Evaluation and demonstration of portfolio presentation methods appropriate to the student’s specific area of study are explored. Prerequisite: ARTS 2314 or ARTC 2347 (3:2-4)

ARTC 2347 Design Communication II
This course offers general practice in commercial art and production. Prerequisite: ARTC 1317 or ARTS 2313 Students will not receive credit for both ARTS 2314 and ARTC 2347. (3:2-4)

ARTC 2366 Field Experience—Graphic Design, Commercial Art and Illustration
This course offers practical general training and experience in the workplace. The College, with the employer, develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be taken for credit in conjunction with each degree or certificate earned. Prerequisite: ARTC 2314, ARTC 2347 or approval of department chair (3:1-20)

ARTS 1301 Art Appreciation
This is a general education course open to art and non-art majors. It focuses on design principles from a layman’s point of view, critical and related evaluation of selected works in the fine and applied visual arts to everyday life. Prerequisite: Reading level 6 (3:0-3)

ARTS 1303 Art History I
This is a critical and analytical study of the great historical works of fine and applied visual arts from the prehistoric era through the medieval period. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)
ARTS 1304 Art History II
This is a critical and analytical study of the great historical works of fine and applied visual arts from the Renaissance through the modern era. Prerequisites: Reading level 7 and Writing level 7 (3:2-4)

ARTS 1311 Design I
This course emphasizes two-dimensional design, including the fundamentals of line, color, form, texture, shape, space, and arrangement. (3:2-4)

ARTS 1312 Design II
This continuation and expansion of Design I includes the study of compositional principles of two- and three-dimensional art and the creative and expressive use of media. Prerequisite: ARTS 1311 (3:2-4)

ARTS 1316 Drawing I
This beginning course investigates a variety of media, techniques and subjects, exploring perceptual and descriptive possibilities with consideration of drawing as a developmental process, as well as an end in itself. (3:2-4)

ARTS 1317 Drawing II
Drawing II stresses the expressive and conceptual aspects of drawing, including the human figure within a spatial environment. Prerequisite: ARTS 1316 (3:2-4)

ARTS 2313 Design Communications I
This is an introductory study of design development relating to graphic design technology, tools, media, and layout and design concepts. Topics include integration of type, images, and other design elements, and developing computer skills in industry standard computer programs. Students will not receive credit for both ARTS 1317 and ARTC 2313. Prerequisite: ARTC 1325 or ARTS 2348 or concurrent enrollment with ARTC 1325 or ARTS 2348 with department chair approval (3:2-4)

ARTS 2314 Design Communications II
This course offers general practice in commercial art and production. Students will not receive credit for both ARTS 2314 and ARTC 2347. Prerequisite: ARTC 1317 or ARTS 2313 (3:2-4)

ARTS 2316 Painting I
This course explores the potentials of painting media, with emphasis on color and composition. (3:2-4)

ARTS 2317 Painting II
This is a continuation of painting I with emphasis on individual expression. Prerequisite: ARTS 2316 or approval of department chair (3:2-4)

ARTS 2323 Life Drawing I
Life drawing I is a studio course emphasizing structure and action of the human figure. Prerequisite: ARTS 1316 (3:2-4)

ARTS 2324 Life Drawing II
This is a further investigation of drawing the human figure with emphasis on individual expression. Prerequisite: ARTS 2323 (3:2-4)

ARTS 2326 Sculpture I
This is an exploration of various sculptural approaches in a variety of media, including additive and subtractive techniques. (3:2-4)

ARTS 2327 Sculpture II
A continuation of sculpture I, this course emphasizes individual expression. Prerequisite: ARTS 2326 or approval of department chair (3:2-4)

ARTS 2333 Printmaking I
This is an introduction to printmaking, including monoprints, relief, intaglio, and serigraphy. (3:2-4)

ARTS 2334 Printmaking II
A continuation of printmaking I, this emphasizes individual expression. Prerequisite: ARTS 2333 or approval of department chair (3:2-4)

ARTS 2341 Art Metals I
This is a basic course in the fabrication and design of jewelry and metalsmithing. (3:2-4)

ARTS 2342 Art Metals II
This is an intermediate course in the fabrication and design of jewelry and metalsmithing. Prerequisite: ARTS 2341 or approval of department chair (3:2-4)

ARTS 2346 Ceramics I
A studio course, this is an introduction to basic ceramic processes and an exploration of clay as an artistic medium, including mechanical (wheel-throw) and hand-built techniques, and glazing and firing processes. Prerequisite: ARTS 1312 or approval of department chair (3:2-4)

ARTS 2347 Ceramics II
A studio course, this continuation of ARTS 2346 explores clay as an artistic medium, concentrating on combinations of mechanical and hand-built techniques. Prerequisite: ARTS 2346 (3:2-4)

ARTS 2348 Digital Art I
This studio art course explores the potential of computer hardware and software medium for their visual, conceptual, and practical uses in visual arts. Students will not receive credit for both ARTC 1325 and ARTS 2348. (3:2-4)

ARTS 2349 Digital Art II
This studio art course expands upon digital art I (ARTS 2348). This course stresses the use of industry standard software applications such as Adobe Photoshop. Course will emphasize both creative and technical elements of image creation, image acquisition, file formats, output devices, and color systems. Prerequisite: Reading level 6, Writing level 6 (3:2-4)

ARTS 2356 Fine Arts Photography I
This is a beginning course in the taking, developing, and printing of photographs. Students receive instruction in photographic principles and are given assignments to complete in the laboratory periods or outside class. The College furnishes darkroom facilities and a limited number of cameras. Students will not receive credit for both ARTS 2356 and COMM 1318. (3:2-4)

ARTS 2357 Fine Arts Photography II
This course offers continued development of techniques, with emphasis on content and composition of photographs, including a variety of professional and technical areas. Students will not receive credit for both ARTS 2357 and COMM 1319. Prerequisite: COMM 1318 or ARTS 2356 or approval of department chair (3:2-4)

ARTS 2366 Watercolor I
This course introduces the basic techniques and materials of transparent and opaque watercolors. (3:2-4)

ARTS 2367 Watercolor II
A continuation of watercolor I, this course places emphasis on individual expression. Prerequisite: ARTS 2366 or approval of department chair (3:2-4)

ARTS 2388 Academic Cooperative-Art
This course is an instructional program designed to integrate on-campus study with practical hands-on work experience. In conjunction with class seminars, the student will set specific goals and objectives in the study of studio art and/or art history. Prerequisites: ARTS 2348 and ARTS 2349, Reading level 6, Writing level 6 (3:0-21)

ARTV 1303 Basic Animation
An examination of concepts, characters, and storyboard for basic animation production, this course emphasizes creating movement and expression utilizing traditionally or digitally generated image sequences. Prerequisite: ARTC 1325 or ARTS 2348 (3:2-4)

ARTV 1341 3-D Animation I
This course offers three-dimensional (3-D) modeling and rendering techniques, including lighting, staging, camera, and special effects. Emphasis is on 3-D modeling building blocks, and using primitives to create simple and complex objects. Prerequisite: ARTV 1345 or approval of department chair (3:2-4)
ARTV 1345 3-D Modeling and Rendering
This course focuses on techniques of three-dimensional (3-D) modeling utilizing appropriate software. Topics include the creation and modification of 3-D geometric shapes, use of a variety of rendering techniques, camera light sources, and surface mapping. (3:2-4)

ARTV 1351 Digital Video
This is a course in producing and editing video and sound for multimedia or web publications. It emphasizes the capture, editing, and outputting of video using a desktop digital video workstation. Prerequisite: ARTC 1325 or ARTS 2348 (3:2-4)

ARTV 1402 Introduction to Technical Animation and Rendering
Basic study of technical computer models and animation. Includes basic animation principles, model creation, light sources, camera positioning, rendering, importing, and modification of external files. (4:3-3)

ARTV 1440 Intermediate Technical Animation and Rendering
This course provides a basic study of technical computer models and animation. Prerequisite: ARTV 1402 (4:3-3)

ARTV 2301 2-D Animation I
This course specializes in skill development in the use of software to develop storyboards and two-dimensional animation including creating, importing, and sequencing media elements to create multimedia presentations. Emphasis will be on conceptualization, creativity, and visual aesthetics. Prerequisite: ARTV 1303 (3:2-4)

ARTV 2341 Advanced Digital Video
Advanced digital video consists of techniques for post-production. Emphasizes integration of special effects and animation for film, video, and the Internet. Exploration of new and emerging compression and video streaming technologies. Prerequisite: ARTV 1351 or approval of department chair (3:2-4)

ARTV 2351 3-D Animation II
This is an advanced level 3-D course utilizing animation tools and techniques used to create movement. The emphasis is on advanced animation techniques. Prerequisite: ARTV 1341 (3:2-4)

GRPH 2309 Electronic Pre-Press I
This course focuses on theory and techniques for pre-press preparation, using industry-standard software for final file output. Topics include the procedures and problems involved in computer file preparation, ranging from trapping, color separations and resolutions to printing basics and service bureaus. Prerequisite: ARTC 2347 or ARTS 2314 or approval of department chair (3:2-4)

GRPH 2370 Electronic Pre-Press II
This is a continuation of electronic pre-press I, with continued exploration of computer file preparation, including use of Postscript, rip raster image processing, trapping, color separation, and resolutions. Emphasis will be on individual progress. Prerequisite: GRPH 2309 or approval of department chair (3:2-4)

IMED 1301 Introduction to Digital Media
This course offers a survey of the theories, elements, and hardware/software components of digital media. Emphasis is on conceptualizing and producing digital media presentations. Prerequisite: ARTC 1325 or ARTS 2348 or approval of department chair (3:2-4)

IMED 1316 Web Page Design I
This course offers instruction in Internet web page design issues, including mark-up languages, websites, Internet access software, and interactive topics. Prerequisite: ARTC 1325 or ARTS 2348 or approval of department chair (3:2-4)

IMED 2315 Web Page Design II
This course is a study of hyper-text mark-up language (HTML) and interesting layout techniques for creating and engaging well designed web pages. Emphasis is on identifying the target audience and producing a website that responds to specific physical and technical limitations, cultural concerns, and legal issues. Prerequisite: IMED 1316 or approval of department chair (3:2-4)

IMED 2345 Interactive Digital Media II
This course offers instruction in the use of scripting languages to create interactive digital media applications. Prerequisite: IMED 1301 or approval of department chair (3:2-4)

PHTC 1311 Fundamentals of Photography
This course is an introduction to camera operation and image production, composition, supplemental lighting, and use of exposure meters and filters. Emphasis is on digital photography. (3:2-4)

PHTC 2301 Intermediate Photography
This course is a continuation of fundamentals of photography. Emphasizes social, portrait, studio, fashion, theatrical, publicity, and event photography with digital photography processes and methods. Prerequisite: PHTC 1311 or ARTS 2356 or approval of department chair (3:2-4)

Audio Engineering
(See Music)

Automotive Collision Repair Technology

ABDR 1207 Auto Body Welding
This course teaches the fundamentals of automotive welding processes. Skill development is in oxy/acetylene, stick arc, MIG, and cutting processes in a variety of applications. (2:1-3)

ABDR 1301 Auto Body Repair and Repainting
This course focuses on shop safety practices and the use of hand and power tools; techniques of blending, shrinking, cutting, and welding metals and plastics; and frame straightening. Fiberglass repair, body preparation, application of body plastic, sanding, priming, painting, and detailing are also covered. (3:1-3)

ABDR 1303 Vehicle Design and Structural Analysis
This introduction to the collision repair industry emphasizes safety, professionalism, and vehicle structural design. Prerequisite: Reading level 4 (3:2-2)

ABDR 1307 Auto Body Welding
This is a study of industry and standard welding and cutting procedures. Prerequisite: Reading level 4 (3:2-2)

ABDR 1315 Vehicle Trim and Hardware
This is an in-depth study of vehicle trim and glass service. Prerequisite: Reading level 4 (3:2-2)

ABDR 1333 Front and Rear Wheel Alignment
This is an in-depth study of vehicle steering components including alignment, tire rotation, and balancing. Prerequisite: Reading level 4 (3:2-2)

ABDR 1349 Auto Plastic and Sheet Molding Compound Repair
This is a comprehensive course in repair of interior and exterior plastics, including the use of various types of adhesives and state-of-the-art plastic welding. (3:1-3)
ABDR 1431 Basic Refinishing
This is an introduction to current refinishing products, shop safety, and equipment used in the automotive refinishing industry. Emphasis is on surface preparation, masking techniques, and refinishing of trim and replacement parts. Prerequisite: Reading level 4 (4:3-3)

ABDR 1441 Structural Analysis and Damage Report I
This course offers expanded training in the roughing and shaping procedures on automotive sheet metal necessary to make satisfactory body repairs. Emphasis is on the alignment of component parts such as doors, hoods, front-end assemblies, and deck lids. Prerequisite: Reading level 4 (4:3-3)

ABDR 1449 Automotive Plastic and Sheet Molding Compound Repair
This is a comprehensive course in repair of interior and exterior plastics, including the use of various types of adhesives and plastic welding. Prerequisite: Reading level 4 (4:3-3)

ABDR 1519 Basic Metal Repair
This course offers in-depth coverage of basic metal principles and working techniques, including proper tool usage and product application. Prerequisite: Reading level 4 (5:3-5)

ABDR 1555 Minor Metal Repair
This is a course in sheet metal alignment principles using mechanical and hydraulic equipment. Emphasis is on attachment devices used to straighten and align exterior body panels. Prerequisite: Reading level 4 (5:3-5)

ABDR 1558 Intermediate Refinishing
This course offers expanded training in mixing and spraying of automotive topcoats. Emphasis is on formula ingredients, reducing, thinning, and special spraying techniques. This course also introduces partial panel refinishing techniques and current industry paint removal techniques. Prerequisite: Reading level 4 (5:3-5)

ABDR 2255 Collision Repair Estimating
This is an advanced course in collision estimating and development of an accurate damage report. Prerequisite: Reading level 4 (2:2-1)

ABDR 2257 Collision Shop Management
This is a study of methods and equipment used in collision repair shops to improve management functions and profitability. Prerequisite: Reading level 4 (2:2-1)

ABDR 2353 Color Analysis and Paint Matching
This is an advanced course in color theory, color analysis, tinting, and advanced blending techniques for commercially acceptable paint matching. Prerequisite: Reading level 4 (3:2-2)

ABDR 2380 Cooperative Education - Autobody/Collision and Repair Technology
Career-related activities encountered in the student’s area of specialization are offered through an individualized agreement among the College, employer, and student. Under the supervision of the College and the employer, the student combines classroom learning with work experience. This course also includes a lecture component. This may be a paid or unpaid experience. Prerequisite: Reading level 4 (3:1-14)

ABDR 2502 Auto Body Mechanical and Electrical Service
This is a course in the repair, replacement, and/or service of collision damaged mechanics or electrical systems. Topics include drive train repair, removal, reinstallation and service; cooling system service and repair; exhaust system service; and emission control systems. Additional topics include wire and connector repair, reading diagrams, and troubleshooting. Prerequisite: Reading level 4 (5:3-5)

ABDR 2549 Advanced Refinishing
This course offers skill development in multi-stage refinishing techniques particularly in identification of problems and solutions in color matching and partial panel refinishing. Prerequisite: Reading level 4 (5:3-5)

ABDR 2551 Specialized Refinishing Techniques
This course focuses on advanced topics in specialty automotive refinishing. Emphasis is on refinishing of interior plastics, fiberglass, and aluminum and galvanized panels, as well as on custom graphics and current industry innovations. Prerequisite: Reading level 4 (5:3-5)

AUMT 1305 Introduction to Automotive Technology
This introduction to the automotive industry includes automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, fasteners, professional responsibilities, and automotive maintenance. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

www.sanjac.edu 223
AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 2321 Toyota Electrical Lighting and Accessories
This is a course in repair of automotive electrical subsystems, lighting, instrumentation, and accessories. Emphasis is on accurate diagnosis and proper repair methods using various troubleshooting skills and techniques. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2371 Automotive Hybrid Systems
This overview of automotive hybrid systems includes topics in the theory, testing, diagnosis, and repair of hybrid systems. The operating principles for gasoline/electric propulsion systems, techniques for maintenance and repair, and how they differ from the procedures used for traditional gasoline powered vehicles are discussed. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-2)

AUMT 2388 Internship - Automotive Technology
This course offers experience external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-15)

AUMT 2417 Engine Performance Analysis I
This course focuses on the theory, operation, diagnosis, and repair of basic engine dynamics, ignition systems, and fuel delivery systems. Students learn the use of basic engine performance diagnostic equipment. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (4:2-6)

AUMT 2425 Automotive Transmission and Transaxles
This is a study of the operation, hydraulic principles, and related circuits of modern automatic transmissions and automatic transaxles. It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and proper repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

Honda Professional Automotive Career Training (PACT)

AUMT 1305 Introduction to Automotive Technology
This introduction to the automotive industry includes automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, fasteners, professional responsibilities, and automotive maintenance. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)
AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 2321 Toyota Electrical Lighting and Accessories
This is a course in repair of automotive electrical subsystems, lighting, instrumentation, and accessories. Emphasis is on accurate diagnosis and proper repair methods using various troubleshooting skills and techniques. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2388 Internship - Automotive Technology
This course offers experience external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-15)

AUMT 2417 Engine Performance Analysis I
This course focuses on the theory, operation, diagnosis, and repair of basic engine dynamics, ignition systems, and fuel delivery systems. Students learn the use of basic engine performance diagnostic equipment. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (4:2-6)

AUMT 2425 Automotive Transmission and Transaxles
This is a study of the operation, hydraulic principles, and related circuits of modern automatic transmissions and automatic transaxles. It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and proper repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1280 Cooperative Education Auto/Automotive
Career-related activities encountered in the student's area of specialization are offered through a cooperative agreement among the College, employer, and student. Under supervision of the College and the employer, the student combines classroom learning with work experience. Directly related to a technical discipline, specific learning objectives guide the student through the work experience. (2:1-10)

AUMT 1305 Introduction to Automotive Technology
This introduction to the automotive industry includes automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, fasteners, professional responsibilities, and automotive maintenance. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2388 Internship - Automotive Technology
This course offers experience external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-15)

AUMT 2417 Engine Performance Analysis I
This course focuses on the theory, operation, diagnosis, and repair of basic engine dynamics, ignition systems, and fuel delivery systems. Students learn the use of basic engine performance diagnostic equipment. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (4:2-6)

AUMT 2425 Automotive Transmission and Transaxles
This is a study of the operation, hydraulic principles, and related circuits of modern automatic transmissions and automatic transaxles. It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and proper repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1280 Cooperative Education Auto/Automotive
Career-related activities encountered in the student’s area of specialization are offered through a cooperative agreement among the College, employer, and student. Under supervision of the College and the employer, the student combines classroom learning with work experience. Directly related to a technical discipline, specific learning objectives guide the student through the work experience. (2:1-10)

It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1305 Introduction to Automotive Technology
This introduction to the automotive industry includes automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, fasteners, professional responsibilities, and automotive maintenance. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

Ford Motor Company Automotive Service Educational Training (ASSET)

AUMT 1280 Cooperative Education Auto/Automotive
Career-related activities encountered in the student’s area of specialization are offered through a cooperative agreement among the College, employer, and student. Under supervision of the College and the employer, the student combines classroom learning with work experience. Directly related to a technical discipline, specific learning objectives guide the student through the work experience. (2:1-10)

AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)
AUMT 1280 Cooperative Education Auto/Automotive
Career-related activities encountered in the student’s area of specialization are offered through a cooperative agreement among the College, employer, and student. Under supervision of the College and the employer, the student combines classroom learning with work experience. Directly related to a technical discipline, specific learning objectives guide the student through the work experience. (2:1-10)

AUMT 1305 Introduction to Automotive Technology
This introduction to the automotive industry includes automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, fasteners, professional responsibilities, and automotive maintenance. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions, transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

AUMT 2388 Internship - Automotive Technology
This course offers experience external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-15)

AUMT 2417 Engine Performance Analysis I
This course focuses on the theory, operation, diagnosis, and repair of basic engine dynamics, ignition systems, and fuel delivery systems. Students learn the use of basic engine performance diagnostic equipment. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (4:2-6)

AUMT 2425 Automotive Transmission and Transaxles
This is a study of the operation, hydraulic principles, and related circuits of modern automatic transmissions and automatic transaxles. It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and proper repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)
## Course Descriptions

### AUMT 1310 Automotive Brake Systems
This course focuses on the operation and repair of drum/disc type brake systems, with emphasis on the safe use of modern equipment. Topics include brake theory, diagnosis, and repair of power, manual, and anti-lock brake systems and parking brakes. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

### AUMT 1316 Suspension and Steering
This course focuses on the theory and operation of automotive suspension and steering systems, including tire and wheel problem diagnosis, component repair, and alignment procedures. It may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

### AUMT 1345 Automotive Heating and Air Conditioning
This course focuses on the theory of automotive air conditioning and heating systems. Emphasis is on the basic refrigeration cycle and diagnosis and repair of system malfunctions. It covers EPA guidelines for refrigerant handling and new refrigerant replacements. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

### AUMT 1407 Automotive Electrical Systems
This course provides an overview of automotive electrical systems, including topics in operational theory, testing, diagnosis, and repair of batteries, charging and starting systems, and electrical accessories. Emphasis is on electrical schematic diagrams and service manuals. This course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

### AUMT 1419 Automotive Engine Repair
This course covers the fundamentals of engine operation, diagnosis, and repair, including fabrication systems and cooling systems. Emphasis is on overhaul of selected engines, identification and inspection, and measurements, and on disassembly, repair, and reassembly of the engine. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

### AUMT 2311 Automotive Electronic Controls
This is a study of electrical principles, semiconductor and integrated circuits, digital fundamentals, microcomputer systems, and electrical test equipment as applied to automotive technology. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

### AUMT 2313 Manual Drive Train and Axles
This is a study of automotive clutches, clutch operation devices, standard transmissions/transaxles, and differentials, with emphasis on the diagnosis and repair of transmissions and drive lines. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (3:2-4)

### AUMT 2321 Toyota Electrical Lighting and Accessories
This is a course in repair of automotive electrical subsystems, lighting, instrumentation, and accessories. Emphasis is on accurate diagnosis and proper repair methods using various troubleshooting skills and techniques. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (3:2-4)

### AUMT 2388 Internship - Automotive Technology
This course offers experience external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-15)

### AUMT 2417 Engine Performance Analysis I
This course focuses on the theory, operation, diagnosis, and repair of basic engine dynamics, ignition systems, and fuel delivery systems. Students learn the use of basic engine performance diagnostic equipment. The course may be taught with a manufacturer-specific focus. Prerequisites: Writing level 4, Reading level 4, Math level 4, and AUMT 1407 or department chair approval (4:2-6)

### AUMT 2425 Automotive Transmission and Transaxles
This is a study of the operation, hydraulic principles, and related circuits of modern automatic transmissions and automatic transaxles. It covers diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and proper repair techniques. The course may be taught with a manufacturer-specific focus. Prerequisite: Writing level 4, Reading level 4, Math level 4 (4:2-6)

## Biology

### BIOL 1406 General Biology I
General Biology I is a contemporary course covering the scientific method, cellular and molecular biology, biochemistry, classical and human genetics, and evolution. Prerequisite: Reading level 6 (4:3-3)

### BIOL 1407 General Biology II
General Biology II is a survey of viruses, Kingdoms Monera, Protista, Fungi, Plantae, and Animalia. The study of organism systems is stressed and integrated. Development and ecology topics are included. Prerequisite: Reading level 6 (4:3-3)

### BIOL 1408 Biology I for Non-Science Majors
Biology I for non-science majors is a general biology course that addresses the biological concepts encountered in everyday life. Topics include the nature of science, cellular and molecular biology, biotechnology, classical and human genetics, and evolution, with emphasis on applications and current issues. This course satisfies the natural science requirement for students pursuing an A.A. and/or most B.A. degrees. A student may not receive credit for both 1406 and 1408. The course is designed with a lecture and laboratory format, meeting three hours per week for lecture and three hours per week for lab, and as such awards four credit hours. Prerequisite: Reading level 6 (4:3-3)

### BIOL 1409 Biology II for Non-Science Majors
Biology II for Non-Science Majors is a general biology course that addresses biological concepts encountered in everyday life. Topics include a survey of viruses and the domains of life, study of organism systems, and ecology with emphasis on human applications and current issues. This course satisfies the natural science requirements for students pursuing an A.A. and/or most B.A. degrees. A student may not receive credit for both 1407 and 1409. The course is designed with a lecture and laboratory format, meeting three hours per week for lecture and three hours per week for lab, and as such awards four credit hours. Prerequisite: Reading level 6 (4:3-3)

### BIOL 1411 General Botany
This is a course in the fundamental principles of plant life. Focus is on the structure, physiology, taxonomy, and life histories of plants. Basic principles of heredity, ecology, distribution, adaptation, populations, and evolution of organisms are included. Prerequisite: Reading level 6 (4:3-3)
**Biol 1413 General Zoology**
This is a course in the fundamental principles of living animals. It focuses on the structure and physiology of animals, animal development, and taxonomy, with considerable reference to man. Prerequisite: Reading level 6 (4:3-3)

**Biol 1414 Introduction to Biotechnology**
This course is an overview of classical genetics, DNA structure, the flow of genetic information, DNA replication, gene transcription, and protein translation. Principles of major molecular biology and genetic engineering techniques are covered, including restriction enzymes and their uses, major types of cloning vectors, construction of libraries, Southern and Northern blotting, hybridization, PCR, and DNA typing. The course also covers applications of these techniques in human health and wellness, medicine, agriculture, and the environment. Introduction to the human genome project, gene therapy, molecular diagnostics, forensics, creation and uses of transgenic plants and animal and animal cloning and of the ethical, legal, and social issues and scientific problems associated with these technologies. Relevant practical exercises in the above areas. Prerequisites: Reading level 7, Writing level 7, Math level 7 (4:3-3)

**Biol 2305 Pathophysiology**
Pathophysiology is a three-credit lecture course appropriate for students preparing for a nursing career or as an elective for a biology major. This is a specialized study of the structure and function of human anatomy, including the neuroendocrine, integumentary, muscular, skeletal, digestive, urinary, reproductive, respiratory, and circulatory systems as they relate to the study of human disease. Objectives include a study of general physiological factors involved in the disease process as well as pathology affecting different human systems. Prerequisites: BIOL 2401 or BIOL 2402 or BIOL 1406 and BIOL 1407 (3:3-0)

**Biol 2316 Principles of Genetics (Heredity)**
This study of the principles of inheritance and variation in plant and animal populations emphasizes Mendelian inheritance, molecular genetics, and population genetics. Prerequisites: BIOL 1406 and 1407 or BIOL 1411 and 1413 or approval of department chair, and Reading level 7 (3:3-0)

**Biol 2401 Human Anatomy and Physiology I**
This study of chemical and cellular levels of organization focuses on the structure and function of the integumentary, skeletal, muscular, nervous and endocrine systems. Prerequisite: Reading level 7 (4:3-3)

**Biol 2402 Human Anatomy and Physiology II**
The structure and function of the cardiovascular, respiratory, digestive, urinary, and reproductive systems are emphasized. Basic principles of human genetics are included. Prerequisite: Reading level 7 (4:3-3)

**Biol 2406 Environmental Biology**
The course is designed to study human interaction and its effects upon plant and animal communities, with a focus on conservation, pollution, energy, sustainability, and other contemporary ecological problems. It includes a general study of ecological concepts, an introduction to natural resources, the study of the biotic and abiotic interrelationships and the energy transfer through food chains and food webs. This course introduces biological and chemical principles as they relate to the environment. It also introduces laboratory and field approaches to the study of the environment. A student may not receive credit for both BIOL 2306 and BIOL 2406. Prerequisites: Reading level 7, BIOL 1406, 1407, 1411 or 1413 (4:3-3)

**Biol 2416 Genetics**
This course is designed to give students a comprehensive, in-depth survey of the field of modern genetics. Genetics is concerned with the study of heredity and the molecular basis of physical traits. The broad scope of the discipline extends from the study of single molecules (DNA structure and function), to inheritance patterns, and populations of organisms. The course is designed with a lecture and laboratory format, meeting three hours per week for lecture and three hours per week for lab, and as such awards four credit hours. Topics include (but are not limited to) Mendelian and non-Mendelian biotechnology, the molecular nature of genes, the physical and chemical nature of DNA, biotechnology, and the applications of these topics for medicine and industry. Students may not receive credit for BIOL 2416 and BIOL 2316. At least one semester of college chemistry is strongly recommended. Prerequisites: BIOL 1406 and 1407, or 1413 and 1411, or approval of department chair, and Reading level 7 (4:3-3)

**Biol 2420 Microbiology and Pathology**
This is a study of microbiology and pathology from the standpoint of cause, symptoms, and prevention of disease. Basic principles of immunological responses by the body in relation to visible pathological symptoms will be stressed. This course is primarily designed for students pursuing a degree as a registered nurse. (A student may not receive credit for both BIOL 2420 and BIOL 2421.) Prerequisites: BIOL 2401 or 2402 or approval of department chair, and Reading level 7 (4:3-3)

**Biol 2421 Introductory Microbiology (Bacteriology)**
This course focuses on the morphology, physiology, and taxonomy of microorganisms. It also covers the relation of man to microorganisms in agriculture, industry, sanitation, and disease. (A student may not receive credit for both BIOL 2420 and BIOL 2421.) Prerequisites: BIOL 1406 and BIOL 1407 or BIOL 1411 and 1413, CHEM 1411 and 1412, and sophomore standing, Reading level 7. Some prerequisites may be waived with permission of department chair. (4:3-3)

**Envr 1401 Environmental Science I: Principles of Environmental Systems**
This overview of environmental and urban systems and current global concerns explores scientific, economic, social, and political solutions to environmental problems with emphasis on ethical issues and sustainability. Field trips are required. Prerequisites: Reading level 7, Writing level 7, Math level 7 (4:3-3)

**Envr 1402 Environmental Science II: Chemicals in the Environment**
This is an overview of chemicals and containments in the environment, including description of environmental media, types of contaminants and their properties, their fate, and transport in the environment; potential remediation technologies; and environmental regulation(s). Prerequisites: Reading level 7, Writing level 7, Math level 9 (4:3-3)

**Business**

**Bcis 1305 Business Computer Applications**
This course discusses computer terminology, hardware, software, operating systems, and information systems relating to the business environment. The main focus of this course is on business application of software, including word processing, spreadsheets, databases, presentation graphics, and business-oriented utilization of the Internet. (3:3-1)

**Busg 2309 Small Business Management**
This is a course on how to start and operate a small business. Topics include facts about a small business, essential management skills, how to prepare a business plan, financial needs, marketing strategies, and legal issues. Prerequisite: Reading level 4 (3:3-0)

**Busg 2317 Business Law/Commercial**
This course explores the relationships of law and business as they relate to commercial transactions. Prerequisite: Reading level 7 (3:3-0)
**BUSI 1301 Introduction to Business**
This course teaches fundamental business principles, including structure, functions, resources, and operational processes. Prerequisite: Reading level 6 (3:3-0)

**BUSI 1304 Business Report Writing and Correspondence**
This study of the principles of effective written and oral communication in business situations focuses on grammar, spelling, punctuation, and sentence structure. This course stresses common communication weaknesses identified in today's business employees. (3:3-0)

**BUSI 2301 Business Law I**
Major content areas covered include general principles of law and the legal system, contracts, sales, commercial paper, bank-customer relations, agency, and property. Prerequisite: Reading level 7 (3:3-0)

**BUSI 2304 Business Communications**
This is a study of the practical principles of word usage, language structure, and writing mechanics. Detailed attention is given to report writing and to the construction of letters concerned with sales, credits, collections, inquiries, adjustments, orders, recommendations, and applications for employment. (3:3-0)

**Business Management**

**BMGT 1301 Supervision**
This study of the role of the supervisor examines managerial functions as applied to leadership, counseling, motivation, and human skills. Prerequisite: Reading level 4 (3:3-0)

**BMGT 1303 Principles of Management**
This course focuses on concepts, terminology, principles, theory, and issues that are the substance of the practice of management. Prerequisite: Reading level 4 (3:3-0)

**BMGT 1313 Principles of Purchasing**
This course focuses on the purchasing process as it is related to such topics as inventory control, price determination, vendor selection, negotiation techniques, and ethical issues. (3:3-0)

**BMGT 1327 Principles of Management**
This course focuses on the concepts, terminology, principles, theory, and issues relevant to management in organizations. Prerequisite: Reading level 4 (3:3-0)

**BMGT 1331 Production and Operations Management**
This course teaches fundamentals of the various techniques used in the practice of production management, including location, design, and resource allocation. Prerequisite: Reading level 4 (3:3-0)

**BMGT 1341 Business Ethics**
This course offers discussion of ethical issues, the development of a moral frame of reference, and the need for an awareness of social justice in management practices and business activities. Review of ethical responsibilities and relationships between organizational departments, divisions, executive management, and the public. Prerequisite: Reading level 4 (3:3-0)

**BMGT 1391 Special Topics in Business Administration and Management**
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. The course may be repeated a maximum of two times for credit (a total of three times) provided the repeated course covers a different topic. Prerequisite: Reading level 4 (3:3-0)

**BMGT 2309 Leadership**
This course explores the concepts and styles of leadership, their relation to management, and their impact on the organization. It prepares the student with leadership and communication skills necessary to motivate and identify appropriate principles of leadership in individual, group, and organizational settings. Prerequisite: Reading level 4 (3:3-0)

**BMGT 2368 Practicum (or Field Experience)**
This course offers practical training and experience in the workplace supported by an individualized learning plan developed and documented by the employer, College, and student. This allows the student to apply classroom theories, concepts, and skills in a workplace environment. The student must be working 20 hours per week in a paid or unpaid position. Prerequisites: Six hours of Business Management courses or approval of the program director, and Reading level 4 (3:0-21)

**HRPO 1311 Human Relations**
This course teaches practical application of the principles and concepts of the behavioral sciences to interpersonal relationships in the business and industrial environment. (3:3-0)

**HRPO 2301 Human Resources Management**
This course teaches behavioral and legal approaches to the management of human resources in organizations. Prerequisite: Reading level 4 (3:3-0)

**MRKG 1311 Principles of Marketing**
This is an introduction to basic marketing functions; identification of consumer and organizational needs; explanation of economic, psychological, sociological, and global issues; and description and analysis of the importance of marketing research. Prerequisite: Reading level 4 (3:3-0)

**MRKG 2312 E-Commerce Marketing**
This course explores the convergence and divergence of traditional marketing principles and strategies with those of electronic marketing. The focus is on marketing communications and developing customer relationships in this dynamic environment. How e-marketers use electronic tools to pursue and evaluate these goals also are considered. Prerequisite: Reading level 4 (3:3-0)

**MRKG 2333 Principles of Selling**
This course is an overview of the selling process. Identification of the elements of the communication process between buyers and sellers is discussed as well as examination of the legal and ethical issues of organizations which affect salespeople. (3:3-0)

**Business Office Technology**

**MRMT 1307 Medical Transcription I**
This course teaches the fundamentals of medical transcription with hands-on experience in transcribing physician dictation including basic reports such as history and physicals, discharge summaries, consultations, operative reports, and other medical reports. The course utilizes transcribing and information processing equipment compatible with industry standards, and is designed to develop speed and accuracy. (3:3-1)

**POFI 1341 Computer Applications II**
Continued study of current computer terminology and technology that provides advanced skill development in computer hardware, software applications, and procedures. (3:3-1)
POF 1349 Spreadsheets
Intermediate-level instruction includes in-depth coverage in the use of spreadsheet software for business applications. Topics include worksheet creation, modification, and graphics. (3:3-1)

POFI 2331 Desktop Publishing for the Office
This course provides in-depth coverage of desktop publishing terminology, text editing, and use of design principles to create publishing material using word processing desktop publishing features. Emphasis is on layout techniques, graphics, multiple-page displays, and business applications. (3:3-1)

POFL 1305 Legal Terminology
This introduction to legal terminology (including spelling, pronunciation, and definition of legal terms) includes an overview of the areas of law and the legal professions. (3:3-0)

POFI 2301 Legal Document Processing
This course develops the intermediate-level skills necessary for the production of legal documents used in the legal and court systems. (3:3-1)

POFM 1327 Medical Insurance
This survey of medical insurance includes the life cycle of various claim forms, terminology, litigation, patient relations, and ethical issues. (3:3-0)

POFT 1327 Introduction to Keyboarding
This course provides skill development in keyboarding techniques. Emphasis is on the development of acceptable speed and accuracy. Students learn the skill of keyboarding by touch, using superior keyboarding software. (1:1.5-.5)

POFT 1309 Administrative Office Procedures I
This course focuses on decision making, critical thinking, and the study of current office procedures, including telephone skills, time management, travel and meeting arrangements, mail processing, and other duties and responsibilities applicable to an office environment. (3:3-0)

POFT 1319 Records and Information Management I
This introduction to basic records and information management includes the life cycle of a record, manual and electronic records management, and basic filing procedures and rules. (3:3-0)

POFT 1325 Business Math and Machine Applications
This course offers skill development in the use of electronic calculators and business mathematical functions. Emphasis is on business problem-solving skills using spreadsheet software and/or an electronic calculator/keyboard. (3:3-0)

POFT 1328 Business Presentations
This course offers skill development in planning and conducting business presentations including communication and media skills. (3:3-1)

POFT 1329 Keyboarding and Document
This course offers skill development of touch typing and proper keyboarding techniques. Emphasis is on development of acceptable speed and accuracy levels, and formatting basic documents. (3:3-1)

POFT 2301 Intermediate Keyboarding
This course offers a continuation of keyboarding skills emphasizing acceptable speed and accuracy levels and formatting documents. Emphasis is on proofreading, editing, following instructions, and keying documents from various types of copy. (3:3-1)

POFT 2364 Practicum
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, the College, and the student. (3:0-21)

Chemistry

CHEM 1405 Introductory Chemistry I
This survey course introduces chemistry. Topics may include inorganic, organic, biochemistry, food/physiological chemistry, and environmental/consumer chemistry. This course is designed for science and allied health students and contains an introduction to the fundamentals and principles of chemistry for students with no previous background in chemistry. Topics will include the metric system, atomic structure, periodic table, ionic and covalent bonding, chemical equations, solutions, and emphasis on practical applications of chemistry. This course satisfies the lab science requirements for some allied health majors, but does not substitute for CHEM 1411. Prerequisites: Reading level 6, Writing level 6, and Math level 6 (4:3-3)

CHEM 1407 Introductory Chemistry II
This survey course introduces chemistry. Topics may include inorganic, organic, biochemistry, food/physiological chemistry, and environmental/consumer chemistry. This is designed for non-science and allied health students. This is the second semester of Introductory Chemistry, with an introduction to the language and basic concepts of organic chemistry and biochemistry. Topics include molecular structure, stereochemistry, organic nomenclature, and chemistry of biologically important functional groups. Does not substitute for CHEM 1412. Prerequisites: CHEM 1405 or CHEM 1411, Reading level 6, Writing level 6, and Math level 6 (4:3-3)

Child Development/Early Childhood Education

CDEC 1303 Families, School and Community
This course focuses on the study of the child, family, community, and schools. Includes parent education and involvement, family and community lifestyles, child abuse, and current family life issues. Course content is aligned with state Board of Educator Certification Pedagogy and Professional Responsibilities standards. Requires students to participate in a minimum of 16 hours field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for both CDEC 1303 and TECA 1303.) (3:3-1)

www.sanjac.edu 231
CDEC 1311 Educating Young Children
This is an introduction to the education of the young child. Includes developmentally appropriate practices and programs, theoretical and historical perspectives, ethical and professional responsibilities, and current issues. Course content is aligned with state Board for Educator Certification Pedagogy and Professional Responsibilities standards. This course requires students to participate in a minimum of 16 hours of field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for both CDEC 1311 and TECA 1311.) (3:3-1)

CDEC 1318 Nutrition, Health and Safety
This course focuses on factors impacting the well-being of young children. Includes healthy behavior, food, nutrition, fitness, and safety practices. The course focuses on local and national standards and legal implications of relevant policies and regulations. Course content is aligned with state Board of Educator Certification Pedagogy and Professional Responsibilities standards. The course requires students to participate in a minimum of 16 hours of field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for both CDEC 1318 and TECA 1318.) (3:3-1)

CDEC 1319 Child Guidance
This is an exploration of common behavior problems of young children in child care settings. Emphasis is on positive guidance techniques for effective behavior management. Practical application through direct participation in a child care setting. (3:3-1)

CDEC 1321 The Infant and Toddler
This course is a study of appropriate infant and toddler programs (birth to age 3), including an overview of development, quality routines, appropriate environments, materials and activities, and teaching/guidance techniques. (3:3-0)

CDEC 1323 Observation and Assessment
This course is a study of observation skills, assessment techniques, and documentation of children's development. (3:3-1)

CDEC 1354 Child Growth and Development
Physical, emotional, social, and cognitive factors impacting growth and development of children through adolescence. (Note: Credit will not be given for both CDEC 1354 and and TECA 1354.) (3:3-0)

CDEC 1356 Emergent Literacy for Early Childhood
This course explores the principles, methods, and materials for teaching young children language and literacy through a play-based, integrated curriculum. (3:3-0)

CDEC 1359 Children With Special Needs
This course is a survey of information regarding children with special needs, including possible causes and characteristics of exceptionalities, educational intervention, available resources, referral processes, and the advocacy role and legislative issues. (3:3-0)

CDEC 1413 Curriculum Resources for Early Childhood Programs
This course is a study of the fundamentals of curriculum design and implementation in developmentally appropriate programs for children. (4:3-5)

CDEC 1417 Child Development Associate Training I
This course is based on the requirements for the Child Development Associate (CDA) National Credential. Includes topics on CDA overview, general observation skills, and child growth and development overview. The four functional areas of study are creative, cognitive, physical, and communication. (4:3-4)

CDEC 1458 Creative Arts for Early Childhood
This course explores the principles, methods, and materials for teaching young children music, movement, visual arts, and dramatic play through process-oriented experiences to support divergent thinking. (4:3-3)

CDEC 2315 Diverse Cultural/Multilingual Education
This course is an overview of multicultural education to include relationship with the family and community to develop awareness and sensitivity to diversity related to individual needs of children. (3:3-0)

CDEC 2326 Administration of Programs for Children I
This course includes the application of management procedures for early child care and education programs. Includes planning, operating, supervising, and evaluating programs. Topics cover philosophy, types of programs, policies, fiscal management, regulations, staffing, evaluation, and communication. (3:3-0)

CDEC 2328 Administration of Programs for Children II
This course includes an in-depth study of the skills and techniques in managing early care and education programs, including legal, ethical issues, personnel management, team building, leadership, conflict resolution, stress management, advocacy, professionalism, fiscal analysis, planning parent education/partnerships, and technical applications in programs. (3:3-0)

CDEC 2336 Administration of Programs for Children III
This is an advanced study of the skills and techniques in managing early child care education programs. Co-requisite: CDEC 2366 Prerequisites: Six hours of child development courses to include CDEC 2326 and CDEC 2328 or department chair approval (3:3-0)

CDEC 2341 The School Age Child
This is a study of the appropriate age (5-13 years) programs, including an overview of development, appropriate environments, materials and activities, and teaching/guidance techniques. (3:3-0)

CDEC 2366 Practicum (or Field Experience) - Child Care Provider/Assistant
This course includes practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. The plan relates the workplace training and experiences to the student's general and technical course of study. The guided external experiences may be for pay or no pay. This course may be repeated if topics and learning outcomes vary. Prerequisite or co-requisite: CDEC 1319 (3:0-21)

CDEC 2407 Math and Science for Early Childhood
This course is an exploration of principles, methods, and materials for teaching young children math and science concepts and process skills through discovery and play. (4:3-3)

CDEC 2422 Child Development Associate Training II
This course is a continuation of the study of the requirements for the Child Development Associate (CDA) National Credential. The six functional areas of study include safe, healthy, learning environment, self, social, and guidance. (4:3-4)
CDEC 2424 Child Development Associate Training III
This course is a continuation of the requirements for the Child Development Associate (CDA) National Credential. Three of the 13 functional areas of study include family, program management and professionalism. (4:3-4)

FMLD 1353 Marriage and Family Studies
This course explores the relationship between family values, structures, and types. Examines the functions of the family and the appropriate roles for caregivers. (3:3-0)

FMLD 1372 Dynamics of Human Relationships
This course is a study of the fundamentals of human relationships, communication, and problem-solving skills. The factors of self-concept, emotions, perceptions, defense mechanisms, and conflict resolution styles, as they pertain to the dynamics of human relationships within the family as well as the workplace, will be explored. (3:3-0)

TECA 1303 Families, School and Community
This is a study of the child, family, community, and schools. It includes parent education and involvement, family and community lifestyles, child abuse, and current family life issues. The course content is aligned with state Board of Educator Certification Pedagogy and Professional Responsibilities standards. The course requires students to participate in a minimum of 16 hours field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for both CDEC 1303 and TECA 1303.) (3:3-1)

TECA 1311 Educating Young Children
This is an introduction to the education of the young child. It includes developmentally appropriate practices and programs, theoretical and historical perspectives, ethical and professional responsibilities, and current issues. Course content is aligned with state Board for Educator Certification Pedagogy and Professional Responsibilities standards. It requires students to participate in a minimum of 16 hours of field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for both TECA 1311 and CDEC 1311.) (3:3-1)

TECA 1318 Wellness of the Young Child
This is a study of the factors impacting the well-being of young children. It includes healthy behavior, food, nutrition, fitness, and safety practices. This course focuses on local and national standards and legal implications of relevant policies and regulations. The course content is aligned with state Board of Educator Certification Pedagogy and Professional Responsibilities standards. It requires students to participate in a minimum of 16 hours of field experience with children from infancy through age 12 in a variety of settings with varied and diverse populations. (Note: Credit will not be given for TECA 1318 and CDEC 1318). (3:3-1)

TECA 1354 Child Growth and Development
This course is a study of the physical, emotional, social, and cognitive factors impacting growth and development of children through adolescence. (Note: Credit will not be given for both TECA 1354 and 1354) (3:3-0) CDEC 1354 and TECA 1354.) (3:3-0)

College Preparatory

GUST 0305 College Student Success
This course covers psychology of learning and success, and examines factors that underlie learning, success, and personal development in higher education. This course also emphasizes student responsibility and techniques in behavior modification. Topics covered include information processing, memory, strategic learning, self-assessment and regulation, self-management, goal setting and commitment, motivation, educational and career planning, decision making, networking, emotional intelligence, and learning styles. Techniques of study such as time management, listening and note taking, text marking, library and research skills, preparing for examinations, and utilizing learning resources are covered. It includes courses in college orientation and developments of students’ academic skills that apply to all disciplines. Prerequisite: Reading level 2, Writing level 4, and Math level 4 (3:3-0)

Communications

COMM 1129 Newspaper Laboratory
This course offers first-year participation on a weekly newspaper and it is required for COMM 2311 and 2315 students. Any student may register for the laboratory with consent of department chair. Course may be taken a maximum of two times for credit. Prerequisites: Reading level 6 and Writing level 6 (1:0-3)

COMM 1307 Mass Communications
This freshman course in the development of the mass media in America emphasizes newspapers, magazines, radio, and television with a brief study of the historical development of the mass media and social, economic and cultural responsibilities of the mass media. Prerequisite: Reading level 7 (3:3-0)

COMM 1318 Beginning Photography
This is a beginning course in the taking, developing, and printing of photographs. Students receive instruction in photographic principles and are given assignments to complete in the laboratory period or outside class. Darkroom facilities and a limited number of cameras are furnished by the College. Students will not receive credit for both ARTS 2356 and COMM 1318. (3:1-5)

COMM 1319 Intermediate Photography
This course offers further development of techniques with emphasis on content and composition of photographs, including experience in a variety of professional and technical areas. Students will not receive credit for both ARTS 2357 and COMM 1319. Prerequisite: COMM 1318 or ARTS 2356 or approval of department or division chair (3:1-5)

COMM 2129 Newspaper Laboratory
This course offers second-year students participation on a weekly newspaper, and it may be taken a maximum of two times for credit. Prerequisites: Reading level 6 and Writing level 6 (1:0-3)

COMM 2309 Editing I
This course covers the fundamentals of copy editing for newspapers, including copy reading, headline writing, and makeup. It includes studies in news value, story organization, clarity and writing style, and typography as related to make-up. Prerequisites: COMM 2311 or consent of department chair. Reading level 7, Writing level 7 (3:2-3)

COMM 2311 Reporting I
This course features instruction and practice in interviewing and writing, and discussion of news sources, news values, and types of news stories. Concurrent registration for a newspaper laboratory required. Prerequisites: Reading level 7, Writing level 7 (3:3-0)
Course Descriptions

COMM 2315 Reporting II
This course focuses on specialized fields of reporting, including feature writing, governmental and political reporting, courtroom reporting, radio and television, and analytical writing. The class works on special feature and analytical projects. Concurrent registration for a newspaper laboratory is required. Prerequisites: COMM 2311, Reading level 7, Writing level 7 (3:3-0)

COMM 2327 Principles of Advertising
This course covers the fundamentals of advertising, with special attention to advertising techniques for the mass media; copy preparation; headlines; and use of artwork and layout theories for newspaper and magazine advertising, direct mail, radio, television, outdoor, and other types of advertising. Prerequisite: Reading level 7 (3:3-0)

The San Jacinto College Newspaper
All aspects of newspaper production are considered in the publication of the College weekly newspaper: reporting, feature writing, editing, headline writing, photography, advertising, layout, and design. Students do all production work necessary for a newspaper except the press operation. The paper is a member of the Texas Community College Journalism Association, the Texas Intercollegiate Press Association, and the Associated Collegiate Press. Registration in COMM 1129 or COMM 2129 is necessary for newspaper participation.

Computer Information Technology

(Formerly Information Technology)

EDTC 1341 Instructional Technology and Computer Applications
This course focuses on the examination of specialized educational technology. Topics include the integration of educational computer terminology, system operations, software, and multimedia in the contemporary classroom environment. (3:2-2)

GAME 1303 Introduction to Game Design and Development
This course is an introduction to electronic game development and game development careers and includes an examination of history and philosophy of games, the game production process, employee factors for success in the field, and current issues and practices in the game development industry. The course includes designing and implementing simple computer games. Software development is usually done in Python and Game-Maker. (3:2-2)

GAME 1304 Level Design
This course is an introduction to the tools and concepts used to create levels for games and simulations which incorporates level design, architecture theory, concepts of critical path and flow, balancing, play testing, and storytelling. Course includes utilization of toolsets from industry titles. (3:2-2)

GAME 1343 Graphics and Simulation Programming I
This course covers game and simulation programming. It includes advanced pointer manipulation techniques and pointer applications, points and vectors, sound, and graphics. Prerequisite: ITSE 1307 or COSC 1337 or department chair approval (3:2-2)

GAME 1353 Multi-User Game Programming I
This course covers network topologies, architecture and protocols, and communication in game and simulation programming. It introduces sockets programming utilizing TCP and UDP protocols in a high-level language, and focuses on blocking and asynchronous modes. Prerequisites: GAME 1343 and ITSC 1305 or department chair approval (3:2-2)

GAME 2332 Project Development I
This course includes skill development in an original modification based on a current game engine. It includes management of version control; development of project timelines; integration of sound, models, and animation; production of demos; and creation of original levels, characters, and content for a real-time multiplayer game. It applies skills learned in previous classes in a simulated real-world design team experience. Prerequisite: ITSE 1307 or COSC 1337 or department chair approval (3:2-2)

GAME 2359 Game and Simulation Group Project
This course focuses on the creation of a game and/or simulation project utilizing a team approach. It includes the integration of design, art, audio, programming, quality assurance, animation, titles, visualization of research results, modeling with polygon frames, curves and surfaces, 3D text and animation with keyframes, paths (objects and curves), morphing, vertex keys, skeletons, and lattices. Prerequisite: GAME 2332 or department chair approval (3:2-2)

IMED 1341 Interface Design - with Photoshop
This course offers skill development in the interface design process, including selecting interfaces that are meaningful to users and relative to a project's content and delivery system. Emphasis is on aesthetic issues such as iconography screen composition, colors, and typography. This class utilizes the Photoshop software package. (3:2-2)

IMED 1345 Interactive Digital Media I
This course covers the use of graphics and sound to create interactive digital media applications and/or animations using industry standard authoring software. (3:2-2)

IMED 2309 Internet Commerce
This overview of the Internet as a marketing and sales tool emphasizes developing a prototype for electronic commerce. Topics include database technology, creating websites in order to collect information, performing online transactions, and generating dynamic content. (3:2-2)

GAME 2344 DirectX Programming
This course covers the exploration of the advanced suite of multimedia application programming interfaces (API) built into the Microsoft Windows operating system. Included are fundamentals of DirectX's API that give multimedia applications access to advanced features of high-performance hardware such as 3D graphics acceleration chips and sound cards. Addresses control of low-level functions including 2D graphics acceleration. Support for input devices such as joysticks, keyboards, and mice; and control of sound mixing and sound output will be covered. Prerequisites: Math level 6 and ITSE 2331 (or COSC 2336) or department chair approval (3:2-2)
INEW 2301 Macros for Applications
This course is a study of macros used for applications. Topics include analysis of the need for macros in various applications, macro design considerations, and macro coding and implementation. Students write macro code using available tools for rapid development; customize existing macros for special use, and create and enhance the applications user interface. Prerequisite: COSC 1337 or ITSE 1307 or department chair approval (3:2-2)

INEW 2330 Comprehensive Software Project: Planning and Design
This is a comprehensive application of skills learned in previous courses in a simulated workplace. The course covers the development, testing, and documenting of a complete software and/or hardware solution. This course may be used as a capstone course for a certificate or degree. Prerequisite: INEW 2330 or department chair approval (3:2-2)

INEW 2332 Comprehensive Software Project: Coding, Testing and Implementation
This course covers a comprehensive application of skills learned in previous semesters in a simulated workplace including coding, testing, maintenance, and documentation of a complete software and/or hardware solution. This course may be used as a capstone course for a certificate or degree. Prerequisite: INEW 2330 or department chair approval (3:2-2)

INEW 2334 Advanced Web Programming - E-Commerce
This course focuses on programming for web authoring. Includes industry-standard languages and data stores. It includes an in-depth study of the Internet as a marketing and sales tool with emphasis on developing a working prototype for electronic commerce. The topics include database technology, creating websites in order to collect information, performing online transactions, and generating dynamic content. Students will develop their own e-commerce website. Prerequisite: ITSE 1319 or department chair approval (3:2-2)

INEW 2340 Object-Oriented Design - Game Design
This course offers further applications of programming techniques, including system analysis and design concepts from the object-oriented perspective. The student will build/use case models, sequence diagrams, class diagrams, and state charts. The topics include determining what objects will be required, what members an object requires, and the relationships between objects. It also includes an in-depth look at various data structures and the operations performed on them. The students will develop and correct well-documented programs containing records, stacks, queues, lists, and trees; and use searching sorting, traversal, and recursion techniques. (3:2-2)

ITCC 1401 Cisco Exploration 1 - Network Fundamentals
This is a course introducing the architecture, structure, functions, components, and models of the Internet. It describes the use of OSI and TCP layered models to examine the nature and roles of protocols and services at the applications, network, data link, and physical layers. This course covers principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations. The students will build simple LAN topologies by applying basic principles of cabling; performing basic configurations of network devices, including routers and switches; and implementing IP addressing schemes. Prerequisite: ITSE 1305 or department chair approval (4:3-2)

ITCC 1404 Cisco Exploration 2 - Routing Protocols and Concepts
This course describes the architecture, components, and operation of routers, and explains the principles of routing and routing protocols. Students analyze, configure, verify, and troubleshoot the primary routing protocols RIPv1, RIPv2, EIGRP, and OSPF. Students will recognize and correct common routing issues and problems, and model and analyze routing processes. Prerequisite: ITCC 1401 or department chair approval (4:3-2)

ITCC 2408 Cisco Explorations 3 - LAN Switching and Wireless
This course helps students develop an in-depth understanding of how switches operate and are implemented in the LAN environment for small and large networks. Topics include detailed explanations of LAN switch operations, VLAN implementation, Rapid Spanning Tree Protocol (RSTP), VLAN Trunking Protocol (VTP), Inter-VLAN routing, and wireless network operations. Students will analyze, configure, verify, and troubleshoot VLANs, RSTP, VTP, and wireless networks. Campus network design and Layer 3 switching concepts are introduced. Prerequisite: ITCC 1404 or department chair approval (4:3-2)

ITCC 2410 Cisco Exploration 4 - Accessing the WAN
This course explains the principles of traffic control and access control lists (ACLs) and provides an overview of the services and protocols at the data link layer for wide-area access. Students will learn how to describe user access technologies and devices and discover how to implement and configure Point-to-Point Protocol (PPP), Point-to-Point Protocol over Ethernet (PPPoe), DSL, and Frame Relay. WAN security concepts, tunneling, and VPN basics are introduced. Students will discuss the special network services required by converged applications and an introduction to quality of service (QoS). Prerequisite: ITCC 2408 or department chair approval (4:3-2)

ITCC 2432 CCNP 1: Advanced Routing
This course is the study of advanced network development issues and methods used to configure Cisco routers for effective LAN and WAN traffic management. Topics include designing scalable internetworks, managing traffic, configuring OSPF in single and multiple areas, configuring EIGRP, configuring and using interior and border gateway routing protocols, and techniques used for route filtering and route redirection. In addition, this course will help prepare the student for the Cisco Certified Network Associate (CCNA) exam. Prerequisite: ITCC 2410 or department chair approval (4:3-2)

ITCC 2436 CCNP 2: Remote Access
This course includes the designing and building of remote access networks with Cisco products. Topics include assembling and cabling WAN components, configuring network connections via asynchronous modem, ISDN, X.25, broadband, Virtual Private Network (VPN), and frame relay architectures and associated protocols. This course will help prepare the student for the Cisco Certified Network Associate (CCNP) exam. Prerequisite: ITCC 2432 or department chair approval (4:3-2)

ITCC 2440 CCNP 3: Multilayer Switching
This course introduces students to the deployment of state-of-the-art campus LANs. The course focuses on the selection and implementation of the appropriate Cisco IOS services to build reliable scalable multilayer-switched LANs. Students will develop skills with VLANs, VTP, STP, inter-VLAN routing, multi-layer switching, redundancy, Cisco AVVID solutions, Quality of Service (QoS) issues, campus LAN security, and emerging transparent LAN services. Key course stresses the design, implementation, operation, and troubleshooting of switched and routing environments. This course helps prepare students for the Cisco Certified Network Associate (CCNA) exam. Prerequisite: ITCC 2436 or department chair approval (4:3-2)
Course Descriptions

ITCC 2444 CCNP 4: Internetwork Troubleshooting
This course focuses on documenting and baselining networks and Layer 1 through 4 troubleshooting. Topics include Cisco Troubleshooting Tools, diagnosing and correcting problems within TCP/IP, Frame Relay, and ISDN network connections. This course helps prepare the student for the Cisco Certified Network Associate (CCNP) exam. Prerequisite: ITCC 2440 or department chair approval (4:3-2)

ITMC 2337 Programming a Microsoft SQL Server Database
This course includes mastering programming and implementing a database solution by using SQL Server. Topics include designing a SQL Server application, describe transact-SQL, create and manage databases, implement data integrity, optimize query performance, and create and maintain indexes. This course helps prepare students for the Microsoft Certified Network Engineer (MCSE) or Microsoft Certified Database Administrator (MCDBA) exams. This is a Microsoft IT Academy course. Prerequisite or co-requisite: ITMC 2303 or department chair approval (3:2-2)

ITMT 1340 Managing and Maintaining a Microsoft Windows Server 2003 Environment
This course encompasses managing accounts and resources, maintaining server resources, monitoring server performance, and safeguarding data in a Microsoft Windows Server 2003 environment. This course helps prepare students for the Microsoft Certified Network Administrator (MCSA) and the Microsoft Certified Network Engineer (MCSE) exams. This is a Microsoft IT Academy course. Prerequisite: ITMT 1300 (or ITMC 1358) and ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITMT 1350 Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure: Network Services
This course covers implementing routing; implementing, managing, and maintaining Dynamics Host Configuration Protocol (DHCP), Domain Name System (DNS), and Windows Internet Name Service (WINS), securing Internet Protocol (IP) traffic with Internet Protocol security (IPSec) and certificates; implementing a network access infrastructure by configuring the connections for remote access clients; and maintaining and monitoring network access. This course helps prepare students for the Microsoft Certified Network Administrator (MCSA) and the Microsoft Certified Network Engineer (MCSE) exams. This is a Microsoft IT Academy course. Prerequisites: ITMT 1300 (or ITMC 1358) and ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITMT 2300 Planning, Implementing, and Maintaining a Microsoft Windows Server 2003 Active Directory Infrastructure
This course covers the Windows Server 2003 directory service environment. It includes forest and domain structure; Domain Name System (DNS); site topology and replication; organizational unit structure and delegation of administration; group policy; and user, group, and computer account strategies. This course helps prepare the student for the Microsoft Certified Network Engineer (MCSE) exam. This is a Microsoft IT Academy course. Prerequisite: ITMT 1340 or ITNW 1354 or department chair approval (3:2-2)

ITMT 2303 Administering a Microsoft SQL Server Database
This course is an in-depth coverage of the knowledge and skills required to install, configure, administer, and troubleshoot the client-server database management system of Microsoft SQL Server databases. This course helps prepare students for the Microsoft Certified Network Engineering (MCSE) exam. This is a Microsoft IT Academy course. Prerequisite: ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITMT 2330 Designing a Microsoft Windows Server 2003 Active Directory and Network Infrastructure
This course covers designing a Microsoft Active Directory service and network infrastructure for designing directory Server 2003 environment intended for systems engineers who are responsible for designing directory service and/or network infrastructures. This course helps prepare the students for the Microsoft Certified Network Administrator (MCSA) and the Microsoft Certified Network Engineer (MCSE) exams. This is a Microsoft IT Academy course. Prerequisites: ITMT 1300 (or ITMC 1358) and ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITMT 2340 Designing Security for Microsoft Networks
This course covers assembling the design team, modeling threats, and analyzing security risks in order to meet business requirements for securing computers in a networked environment. Topics include decision-making skills through an interactive tool that simulates real-life scenarios focusing on collecting information and sorting through details to resolve a given security requirement. This course helps prepare students for the Microsoft Certified Network Engineer (MCSE) exam. This is a Microsoft IT Academy course. Prerequisites: ITMT 1300 (or ITMC 1358) and ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITMT 2350 Implementing and Managing Microsoft Exchange
This course offers information on updating and supporting a reliable, secure messaging infrastructure used for creating, sorting, and sharing information by using Microsoft Exchange Server 2003. Topics include a significant amount of hands-on practices, discussion, and assessments to assist students in becoming proficient in the skills necessary to update and support Exchange Server 2003. This course helps prepare students for the Microsoft Certified Network Engineer (MCSE) exam. This is a Microsoft IT Academy course. Prerequisites: ITMT 1300 (or ITMC 1358) and ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITNW 1308 Implementing and Supporting Client Operating Systems
This course involves installing and configuring network clients. It also covers how to set up users, groups, policies, and profiles; configure hardware components and applications; set up and maintain a logon security and security for files and printers; configure clients in multiple environments including Microsoft, TCP/IP, and Novell Networks, implement dial-up networking, and tune system performance. Prerequisite: ITNW 1325 or ITNW 1401 or department chair approval (3:2-2)
ITNW 1325 Fundamentals of Networking Technologies
This course covers instruction in networking technologies and their implementation. Topics include network fundamentals and terminology, the OSI reference model; network protocols; transmission media; networking hardware and software; identifying media used in network communication; connecting servers and clients in a network; recognizing the primary network architectures/topologies; determining how to implement and support the major networking components, including the server, operating system, and clients; distinguishing between Local Area Networks (LANs) and Wide Area Networks (WANs); identifying the components used to expand a LAN into a WAN; how to implement connectivity devices in the larger LAN/WAN environments; and networking technologies as they apply to current Microsoft Windows Operating Systems. The students will gain experience installing, configuring and maintaining current Windows Operating Systems. (3:2-2)

ITNW 1345 Implementing Network Directory Services
This course provides students with the knowledge and skills necessary to install, configure, and administer Network Directory service. Windows Server 2003 directory service environment will be used. Course includes forest and domain structure; Domain Name System (DNS); site topology and replication; organizational unit structure and delegation of administration; group policy; and user, group, and computer account strategies. Prerequisite: ITNW 1354 or ITMT 1340 (or ITMC 1358) or department chair approval (3:2-2)

ITNW 1353 Supporting Network Server Infrastructure
Installing, configuring, managing, and supporting a network infrastructure are covered in this course. Implementing routing; implementing, managing and maintaining Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), and Windows Internet Name Service (WINS); securing Internet Protocol (IP) traffic with Internet Protocol security (IPSec) and certificates; implementing a network access infrastructure by configuring the connections for remote access clients; and managing and monitoring network access are topics covered in this course. (Non-vendor specific course.) Prerequisite: ITNW 1354 or ITMT 1340 (or ITMC 1319) or department chair approval (3:2-2)

ITNW 1354 Implementing and Supporting Servers
This is a course in the development of skills necessary to implement, administer, and troubleshoot information systems that incorporate servers in a networked computing environment. Topics include managing accounts and resources, maintaining server resources, monitoring server performance, and safeguarding data in a Microsoft Windows Server 2003 environment, including skills necessary to implement, administer, and troubleshoot information systems that incorporate Windows Based Servers in a networked computing environment. Topics include setting up servers for various client computers. It also covers how to configure directory applications, how to manage licensing, user group accounts, user profiles, system policies and profiles, administer remote servers, disk resources, create and share resources, implement permissions and security, fault-tolerance, install and configure RAS, identify, monitor, and resolve performance bottlenecks and configuration problems. Prerequisite: ITNW 1308 or ITMT 1300 (or ITMC 1358) or department chair approval (3:2-2)

INTW 1392 Special Topics in Computer Systems Networking and Telecommunications
Topics in this course address current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Prerequisite: department chair approval (3:2-2)

ITNW 2305 Network Administration
This course provides preparation to effectively manage a Novell NetWare network. Topics include network components, user accounts and groups, network file systems, file system security, network printing, and administration utilities. Prerequisite: ITNW 1325 or ITMC 1301 or department chair approval (3:2-2)

ITNW 2346 Designing a Secure Network
This course provides students with the knowledge and skills necessary to design a security framework for small, medium, and enterprise networks. (3:2-2)

ITNW 2352 Administering SQL Server
This is a skills development course in the installation, configuration, administration, and troubleshooting of SQL Servers client/server database management system version. Prerequisites: ITSW 2337 and ITNW 1325 or department chair approval (3:2-2)

ITNW 2354 Internet/Intranet Server
This course covers designing, installing, configuring, maintaining, and managing an Internet/Intranet server. Topics include workstation maintenance and Internet-related protocols; implementation of Internet servers such as World Wide Web (WWW), file transfer protocols (FTP), new, mail and gopher. Course includes hands-on experience building web servers. Prerequisite: ITNW 1325 or ITCC 1401 (or ITMC 1301) or department chair approval (3:2-2)

ITNW 2356 Designing Network Directory Infrastructure Servers
This course includes designing, implementing, and supporting a network directory infrastructure in a multi-domain environment. Prerequisite: ITNW 1345 or department chair approval (3:2-2)

ITSC 1301 Introduction to Computers
This is an overview of Computer Information Systems and introduces computer hardware, software, procedures, and human resources. The course explores integration and application in business and other segments in society. The fundamentals of computer problem-solving and programming may be discussed and applied. The course also examines applications and software relating to specific curricular area. (3:3-0)

ITSC 1305 Introduction to PC Operating Systems
This course covers an introduction to personal computer operating systems. Topics include installation and configuration, file management, memory and storage management, control of peripheral devices, and use of utilities. Operating systems covered include DOS, Windows and UNIX. (3:2-2)

ITSC 1307 UNIX Operating System I
This course covers an introduction to the UNIX operating system, including multi-user concepts, terminal emulation, use of system editor, basic UNIX commands, and writing script files. Topics include introductory systems management concepts. Prerequisite: ITSC 1305 or department chair approval (3:2-2)

ITSC 1309 Integrated Software Applications I
This course covers an introduction to business productivity software suites using word processing, spreadsheets, databases, and/or presentation software. It includes instruction in embedding data, linking and combining documents using word processing, spreadsheets, databases, and/or presentation media software. Fundamentals of personal computer operations and the Windows operating system will also be covered. (3:2-2)
Course_descriptions

ITSE 1311 Beginning Web Programming with Photoshop
This course covers skill development in Web page programming including markup and scripting languages. The course includes instruction in the use of Internet services and the fundamentals of Web page design and website development. It is an introduction to designing and publishing Web documents, and includes basic markup language, hyperlinks, tables, frames, images, and forms. The course also includes the exploration of tools available for creating and editing Web documents. (3:2-2)

ITSC 1319 Internet/Web Page Development
This course includes instruction in the use of Internet concepts and the introduction to Web page design and website development. It is an introduction to designing and publishing Web documents. It includes basic markup language, hyperlinks, tables, frames, images, forms, and an exploration of tools available for creating and editing Web documents. (3:2-2)

ITSC 1321 Intermediate PC Operating Systems
The course covers custom operating system installation, configuration, and troubleshooting. Topics include installation and configuration, file management, memory and storage management, continued study in advanced installation, configuration troubleshooting, advanced file management, memory, storage management. It also covers how to update peripheral device drivers, and use of utilities to increase system performance. This will extend the student's knowledge of hardware, systems and application software, data integration and communications. Prerequisite: ITSC 1325 or department chair approval (3:2-2)

ITSC 1325 Personal Computer Hardware
This course is a study of current personal computer hardware, including personal computer assembly, upgrading, setup and configuration, and troubleshooting. Major topics include an overview of the computer system, installing and configuring hardware and software, troubleshooting hardware and software problems, management of the computer's resources (including hard drive space and memory) data storage on hard drives and external drives, data recovery methods, and installing peripheral equipment. (3:2-2)

ITSC 1391 Special Topics in Computer and Informational Sciences, General
Topics addressed in this course include current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Prerequisite: department chair approval (3:2-2)

ITSC 2321 Integrated Software Applications II
This course is an intermediate study of computer applications from business productivity software suites. It also covers instruction in embedding data and linking and combining documents using word processing, spreadsheets, databases, and/or presentation media software. Prerequisite: ITSC 1309 or department chair approval (3:2-2)

ITSC 2335 Application Software Problem Solving
Utilization of current application software to solve advanced problems and generate customized solutions, involving projects and software specific to a specific curricula area is covered in this course. Prerequisites: ITSE 2331, ITSE 2349, ITSE 2305 or ITSE 2317 (ITSE 2317 and ITSE 1331 may also be taken as co-requisites), or department chair approval (3:2-2)

ITSC 2337 UNIX Operating System II
This course is a continued study of the UNIX operating system commands. It includes advanced concepts of system management and communication, the installation and maintenance of software, network security, and data integrity issues. This course heavily utilizes the Linux OS and includes additional topics such as CGI, PERL, and scripting languages. Prerequisite: ITSC 1307 or department chair approval (3:2-2)

ITSC 2339 Personal Computer Help Desk
This course covers diagnosis and solution of user hardware and software related problems with on-the-job and/or simulated projects. Emphasis will be placed upon hands-on training (e.g., participation in the construction of an expert system). Prerequisite: ITSC 1325 or ITSC 2321 or department chair approval (3:2-2)

ITSC 2364 Practicum - Computer and Informational Sciences, General
This practicum class is a practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. Prerequisites include: 15 credit hours of computer courses (9 of these credit hours must be earned at San Jacinto College) which must include one of the following courses: ITSE 2351, ITSE 2349, ITSE 2331, ITSE 2334, ITSE 2337, ITNW 2305, ITNW 2354, ITMT 1340, ITCC 1404, or ITSE 2313. An accumulative GPA of at least 2.0 is required. An interview and department chair approval are required 60 days prior to enrollment. (3:0-21)

ITSE 1302 Computer Programming
This is an introduction to computer programming with emphasis on the fundamentals of structured design, development, testing, implementation, and documentation. It includes language syntax, data and file structures, input/output devices, and files. It also covers how to structure programming techniques, develop correct executable programs; and creating appropriate documentation. (3:2-2)

ITSE 1307 Introduction to C++ Programming
This course is an introduction to computer programming using C++. The emphasis is on the fundamentals of object-oriented design with development, testing, implementation, and documentation. It includes language syntax, data and file structures, input/output devices, and files. Since C++ is based on the C language, the course will also cover some C language functions and techniques. Students will learn/use standard C++ to complete assignments which give experience in coding, testing, and debugging applications. (3:2-2)

ITSE 1318 Introduction to COBOL Programming
This is an introduction to computer programming using COBOL. Emphasis on the fundamentals of structured design, development, testing, implementation, and documentation. Includes language syntax, data and file structures, input/output devices, files, and files. An introduction to tables. Prerequisite: ITSE 1329 or department chair approval (3:2-2)

ITSE 1329 Programming Logic and Design
This course covers problem-solcing by applying structured techniques and representation of algorithms using appropriate design tools such as hierarchy charts, flowcharts, and pseudocode. It includes discussions of methods for testing, evaluating, and documenting programs. (3:3-4)
**Course Descriptions**

**ITSE 1331 Introduction to Visual BASIC Programming**
This is an introduction to computer programming using Visual BASIC, with an emphasis on the fundamentals of structure design, development, testing, implementation, and documentation. The course includes language syntax, data and file structures, input/output devices, and files, sequence, branch, and loop control structures; use of sequential files; interactive screen processing; printed report generation; and event driven programming are also covered. Prerequisite or co-requisite: ITSE 1329 or department chair approval (3:2-2)

**ITSE 1345 Introduction to Oracle SQL**
This course is an introduction to the design and creation of relational databases using Oracle. Topics include storing, retrieving, updating, and displaying data using Structured Query Language (SQL). Prerequisite or co-requisite: ITSW 1307 or department chair approval (3:2-2)

**ITSE 1391 Special Topics in Computer Programming**
Topics in this course address current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. (3:2-2)

**ITSE 2305 Windows Programming**
This is an introductory course to computer programming for Windows. Emphasis will be placed on the fundamentals of structured design, development, testing, implementation, and documentation. Topics include language syntax, data and file structures, input/output devices, and files. Prerequisite: ITSE 1331 or department chair approval (3:2-2)

**ITSE 2309 Database Programming**
This is a course in database development using database programming techniques emphasizing database structures, modeling, and database access. Topics include developing database applications using a structured query language (SQL Server) to design SQL Server applications; architecture describing Transact-SQL. It also covers how to create and manage databases, implement data integrity, create queries and reports from database tables, optimize query performance, create and maintain indexes, and create appropriate documentation. Prerequisite: ITSW 2337 or department chair approval (3:2-2)

**ITSE 2313 Web Authoring**
This course provides instruction in designing and developing Web pages that incorporate text, graphics, and other supporting elements using current technologies and authoring tools. Prerequisite: ITSE 1311 or ITSE 1305 or ITSC 1313 or ITSC 1319 or department chair approval (3:2-2)

**ITSE 2317 Java Programming**
This course is an introduction to object-orientation Java programming. It emphasizes the fundamental syntax and semantics of Java for applications and web applets. Prerequisite: ITSE 1307 or department chair approval (3:2-2)

**ITSE 2331 Advanced C++ Programming**
This course includes further application of C++ programming techniques including file access, abstract data structures, class inheritance and other advanced techniques. Students will study Object Oriented Programs (OOP) by using, creating and modifying C++ classes. In addition, students will use many of the standard built-in C++ classes and data structures to solve programming assignments. Prerequisite: ITSE 1307 or department chair approval (3:2-2)

**ITSE 2343 Advanced Windows Programming**
This course covers continued applications of Windows programming, including file access methods, data structures, modular programming, program testing, and documentation. It provides instruction in developing correct, well-documented programs containing complex data structures, incorporating complex input/output and file handling techniques, developing graphical user interfaces to other applications, and integrated external programs and libraries. Prerequisite: ITSE 2305 (3:2-2)

**ITSE 2345 Data Structures**
This course introduces advanced programming techniques, including an in-depth look at various data structures and the operations performed on them. Topics include developing correct, well-documented programs containing complex data structures; incorporating arrays, records, stacks, queues, lists and trees, and using search, sort, traversal and recursion techniques. Prerequisite: GAME 1303; or prerequisite or co-requisite: ITSE 1307 or department chair approval (3:2-2)

**ITSE 2346 Oracle Application I**
This course provides skill development in the use of forms in a developer environment. Topics include the use of Object Navigator and Virtual Graphics System (VGS), Layout Editor, and Menu Options. Prerequisite: ITNW 1325 or ITCC 1401 or department chair approval (3:2-2)

**ITSE 2349 Advanced Visual BASIC Programming**
This is an Advanced Visual Basic programming course with topics that include file access methods, data structures and modular programming, program testing and documentation. Topics include common Graphical User Interface controls, sequential/random file processing, and database processing, and formatted screen/printer output. Prerequisite: ITSE 1331 or department chair approval (3:2-2)

**ITSE 2351 Advanced COBOL Programming**
This course includes further applications of programming techniques using COBOL, including file access methods, data structures and modular programming, program testing and documentation. Assigned programs will include subscribed tables, sorting, loading and updating files, maintenance programming and linked lists. Prerequisite: ITSE 1318 or department chair approval (3:2-2)

**ITSE 2354 Advanced Oracle PL/SQL**
This course is a continuation of Oracle SQL. Topics include hierarchical queries, set based queries, correlated subqueries, scripting, and scripting generation. Prerequisite: ITSE 1345 or department chair approval (3:2-2)

**ITSE 2357 Advanced Object-Oriented Programming**
This is a course for application of advanced object-oriented programming techniques such as abstract data structures, class inheritance, polymorphism, and exception handling. Prerequisite: ITSE 2305 or department chair approval (3:2-2)

**ITSW 1307 Introduction to Database**
This course is an introduction to database theory and the practical applications of a database. Students will plan, define, and design a database; design and generate tables, forms, and reports; and devise and process queries. Prerequisite: ITSE 1309 or department chair approval (3:2-2)

**ITSW 1310 Introduction to Presentation Media Software**
This course offers instruction in the utilization of presentation software to produce multimedia presentations. Graphics, test, sound, animation and/or video may be used in presentation development. Prerequisites: ARTC 1325 or ARTS 2348 (3:2-4)

**ITSW 2334 Advanced Spreadsheets**
This course includes advanced techniques for developing and modifying spreadsheets, including macros and data analysis functions. Topics covered include data entry, graphics, table building and searching, macro development, customized reports, database administration, and statistical analysis. Prerequisite: ITSE 1309 or department chair approval (3:2-2)
Course Descriptions

ITSW 2337 Advanced Database
This course covers advanced concepts of database design and functionality. It is designed to provide an understanding of advanced functionality of databases, including physical representation, design criteria, and application implementation. A data control language is used in the implementation of database processing applications. Programs written will include report generation, multiple file management, relational database management, online screen generation, and menu driven systems. Prerequisite: ITSW 1307 or department chair approval (3:2-2)

ITSY 1300 Fundamentals of Information Security
This course covers basic information security goals of availability, integrity, accuracy, and confidentiality. Vocabulary and terminology specific to the field of information security are discussed. Identification of exposures and vulnerabilities and appropriate countermeasures are addressed. The importance of appropriate planning and administrative controls is also discussed. (3:3-0)

ITSY 1342 Information Technology Security
Instruction is provided in security for network hardware, software, and data including physical security; backup procedures; relevant tools; encryption; and protection from viruses. Prerequisite: ITNW 1325 or ITCC 1401 or department chair approval (3:2-2)

ITSY 2300 Operating System Security
This course covers the safeguarding of computer systems by demonstrating server support skills and designing and implementing a security system. Students will identify security threats and monitor network security implementations, and use best practices to configure operating systems to industry security standards. Prerequisite or co-requisite: ITSY 1342 or department chair approval (3:2-2)

ITSY 2301 Firewalls and Network Security
Students will identify elements of firewall design, types of security threats and responses to security attacks using best practices to design, implement, and monitor a network security plan, as well as perform security incident postmortem reporting and ongoing network security activities. Prerequisite: ITSY 1342 or department chair approval (3:2-2)

ITSY 2341 Security Management Practices
This course provides in-depth coverage of security management practices, including asset evaluation and risk management; cyber law and ethics issues; policies and procedures; business recovery and business continuity planning; network security design; and developing and maintaining a security plan. Prerequisite: ITSY 2301 (3:2-2)

ITSY 2342 Incident Response and Handling
This course presents an in-depth coverage of incident response and incident handling, including identifying sources of attacks and security breaches; analyzing security logs; recovering the system to normal; performing postmortem analysis; and implementing and modifying security measures. Prerequisite: ITSY 2301 (3:2-2)

ITSY 2343 Computer System Forensics
This course provides an in-depth study of system forensics including methodologies used for analysis of computer security breaches. It also includes gathering and evaluating evidence to perform postmortem analysis of a security breach. Prerequisites: ITSY 1342 and ITSY 2301 or department chair approval (3:2-2)

ITSY 2359 Security Assessment and Auditing
This course is the capstone experience for the security curriculum. It synthesizes technical material covered in prior courses to monitor, audit, analyze, and revise computer and network security systems to ensure appropriate levels of protection are in place to assure regulatory compliance. (3:2-2)

Computer Science

COSC 1336 Programming Fundamentals II
This course is a review of control structures and data types places. The emphasis is on structured data types. The students apply object-oriented programming paradigm, focusing on the definition and use of classes along with fundamentals of object-oriented design. The course includes basic analysis of algorithms, searching and sorting techniques, and an introduction to software engineering. (3:3-0)

COSC 2325 Computer Organization and Machine Language
This course focuses on basic computer organization, machine cycle, digital representation of data and instructions, assembly language programming, and assembler, loader, macros, subroutines, and program linkages. Prerequisite: COSC 1337 or department chair approval (3:3-0)

COSC 2336 Programming Fundamentals III
This course explores further applications of programming techniques, introducing the fundamental concepts of data structures and algorithms. The topics include recursion, fundamental data structures (including stacks, queues, linked lists, hash tables, trees, and graphs), and algorithmic analysis. Prerequisite: COSC 1337 or department chair approval (3:3-0)

Cosmetology

CSME 1302 Applications of Facial/Esthetics Technology I
This course is an introduction to the application of facial/esthetic technology. It includes identifying and utilizing professional skin care products. Prerequisites and co-requisites: Reading level 4, and concurrent enrollment in CSME 1421 and CSME 1520 or department chair approval (Students may not receive credit for CSME 1302 if they have previously earned credit for CSME 1371 or CSME 1271.)-80 contact hours per term (3:2-3)

CSME 1310 Introduction to Haircutting and Related Theory
Introduction to the theory and practice of hair cutting. Topics include terminology, implements, sectioning, and finishing techniques. Prerequisites: Reading level 4 and courses taken in level sequence or department chair approval (Students may not receive credit for CSME 1310 if they have previously earned credit for COSM 1421 or COSM 1511.)-112 contact hours per semester (3:1-6)
CSME 1330 Orientation to Nail Technology
This course presents students with an overview of the fundamental skills and knowledge required for the field of nail technology. The course includes bacteriology, sanitation, safety, orientation, preparation, and professional practices which help prepare students to take the Texas Department of Licensing and Regulation examination. Department and campus rules and regulations, hand and arm massage, and basic manicure procedures will also be covered. Prerequisite and co-requisites: Reading level 4 and courses taken in level sequence order, or department chair approval-144 contact hours per semester. (3:1-8)

CSME 1354 Artistry of Hair Design I
This course is an introduction to hair design. Topics include the theory and applications of wet styling, braiding, thermal hair styling, finishing techniques, and client communications. Prerequisites: Reading level 4 and courses taken in level sequence order or department chair approval (3:1-6)

CSME 1355 Artistry of Hair Design II
This is a continuation of the study of hair design. Topics include additional theory and applications of current trends in hair design. Additional topics include salon operations and wigology. Prerequisite: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 1355 if they have previously earned credit for COSM 1232, COSM 1332 or CSME 1251.)-112 contact hours per semester (3:1-6)

CSME 1421 Principles of Facial/Esthetic Technology I
This is an introduction to the principles of facial/esthetic technology. Topics include anatomy, physiology, theory, and related skills of facial/esthetic technology. Prerequisite: Reading level 4, and co-requisites: CSME 1520 and CSME 1302 or department chair approval-128 contact hours per semester (4:2-6)

CSME 1435 Orientation to the Instruction of Cosmetology
This course presents an overview of skills and knowledge required for the instruction of cosmetology students, including methods and techniques of teaching skills, orientation, the theory of teaching basic unit planning, and daily skill lesson plan development. Prerequisites: Reading level 6, Math level 4, and Writing level 6, valid Texas Department of Licensing and Regulation Operator License, high school diploma or GED. Co-requisite: CSME 1534 or department chair approval-112 contact hours per semester (4:2-5)

CSME 1457 Applications of Hair Weaving and Braiding
This course emphasizes hair weaving and braiding techniques to prepare students for the Texas Department of Licensing and Regulation (TDLR) examination. Prerequisite and co-requisites: Reading level 4 and concurrent enrollment with CSME 1552 (Students may not receive credit for CSME 1457 if they have previously earned credit for CSME 1473 or CSME 1474.)-160 contact hours per semester (4:2-8)

CSME 1501 Orientation to Cosmetology
This course provides an overview of the skills and knowledge necessary for the field of cosmetology. Topics include the theory and/or skills related to service preparation, braiding, facials, manicuring, pedicuring, anatomy, physiology, electricity, light therapy, bacteriology, contamination and infection control. Prerequisites: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 1501 if they have previously earned credit for COSM 1451 or COSM 1521.)-176 contact hours (5:3-8)

CSME 1505 Fundamentals of Cosmetology
Fundamentals of cosmetology are presented in this course for high school dual credit students. Topics will include service preparation, manicure, facial, chemical services, shampoo, haircut, wet styling, and comb out. Topics are included to prepare students to take the Texas Department of Licensing and Regulation examination. Prerequisite and co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval-112 contact hours per semester (5:3-4)

CSME 1520 Orientation to Facial Specialist
This is an overview of the skills and knowledge necessary for the field of facials and skin care. Prerequisite: Reading level 4 and co-requisites: CSME 1421 and CSME 1302 or department chair approval-176 contact hours per semester (5:3-8)

CSME 1531 Principles of Nail Technology I
This is a course in the principles of nail technology. Topics include anatomy, physiology, theory, and related skills of nail technology. Additional topics include the theory and techniques of basic pedicure, oil manicure, buffing, nail repair, and removal of stains. Emphasis will be directed toward major structures and functions of the bones, muscles and nerves of the hands and arms, feet and lower leg. Other topics include sanitation and safety measures. Prerequisite: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 1331 if they have previously earned credit for COSM 1404 or COSM 1402)-176 contact hours per semester (5:3-8)

CSME 1534 Cosmetology Instructor I
This course covers the fundamentals of instructing cosmetology students, including methods of teaching skills in a lab situation. Prerequisites and co-requisites: Reading level 6, Math level 4, Writing level 6, and CSME 1435 or department chair approval-144 contact hours per semester (5:3-6)

CSME 1541 Principles of Nail Technology II
This course is a continuation of the concepts and principles of nail theory. Emphasis will be directed toward application of artificial nails, including equipment, implements and supplies for application of cosmetic fingernails. Other topics include sanitation, safety measures, hazardous chemicals and Material Safety Data Sheets (MSDS) information data. Prerequisite and co-requisite: Reading level 4 and courses taken in level sequence order or department chair (Students may not receive credit for CSME 1541 if they have previously earned credit for CSME 1324.)-176 contact hours per semester (5:3-8)

CSME 1545 Principles of Facial/Esthetic Technology II
This course is a continuation of the study of concepts and principles of skin care and other related technologies. Topics include the study of advanced instruction and anatomy, physiology, theory and related skills of facial and esthetic technology. Prerequisites: Reading level 4, CSME 1520, CSME 1421, CSME 1302 and co-requisites: CSME 2431 and CSME 2333 or department chair approval-176 contact hours per semester (5:3-8)

CSME 1552 Orientation to Hair Weaving and Braiding
This course will cover the skills necessary for the field of hair weaving and braiding. Students may not receive credit for CSME 1552 if they have previously earned credit for CSME 1541 or CSME 1472. Prerequisites and co-requisites: Reading level 4 and concurrent enrollment with CSME 1457-160 contact hours per semester. (5:3-7)

CSME 1553 Chemical Reformation and Related Theory
Presentation of the theory and practice of chemical reformation including terminology, application and workplace competencies. Emphasis on history, chemistry, hair structure, chemical texturizing techniques, service preparation, brush and scalp techniques/analysis, shampooing and conditioning. Prerequisites and co-requisites: Reading level 4, courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 1553 if they have previously earned credit for COSM 1321 or COSM 1312.)-176 contact hours (5:3-8)
**Course Descriptions**

**CSME 2244 Preparation for the State LicensingWritten Examination**
This course prepares the student for the state licensing written examination. Emphasis will be directed towards the preparation for the state written exam, the refinement of professional skills to serve clients and the development of business practices for successful entry into the industry. Prerequisites: Reading level 4, CSME 1501, CSME 1553, CSME 1310, CSME 1354, and courses taken in level sequence order or department chair approval-80 contact hours per semester (2:1-4)

**CSME 2310 Advanced Haircutting and Related Theory**
This course focuses on advanced concepts and practices of haircutting. Topics include haircuts utilizing scissors, razors, and/or clippers. Emphasis will be directed towards men’s haircutting techniques, women’s haircutting techniques, and client services in the salon. Prerequisite: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 2310 if they have previously earned credit for COSM 1342 or COSM 1303.)-112 contact hours per semester (3:1-6)

**CSME 2333 Application of Facial/Esthetics Technology II**
This course is a continuation of the Application of Facial/Esthetics Technology I. Emphasis will be on preparing for the Texas Department of Licensing and Regulation Facial Exam. Prerequisites: Reading level 4, CSME 1520, CSME 1421, CSME 1302 and co-requisites: CSME 1545 and CSME 2431 or department chair approval (Students may not receive credit for CSME 2333 if they have previously earned credit for COSM 1372 or CSOM 1272.)-80 contact hours per semester (3:2-3)

**CSME 2343 Advanced Cosmetology Techniques**
This course presents students with advanced cosmetology techniques including hair designs, professional cosmetology services, and workplace competencies including the creation of an employment portfolio. Prerequisites and co-requisites: Reading level 4 and department chair approval-80 contact hours per semester (3:1-4)

**CSME 2414 Cosmetology Instructor II**
This course is a continuation of the fundamentals of instructing cosmetology students, and introduces students to methods and techniques of teaching informational theory relative to cosmetology. Prerequisites: Reading level 6, Math level 4, Writing level 6, CSME 1435 and CSME 1534. Co-requisite: CSME 2515 or department chair approval-112 contact hours per semester (4:2-5)

**CSME 2430 Nail Enhancement**
This is a course in the theory, application, and related technology of artificial nails. Topics include the theory of the skin and nail structure, functions, condition, lesions, growth, irregularities, and diseases. Emphasis will be directed toward applications of nail extensions, to include sculpture nails, tips, wraps, fiberglass, gels, odorless products, and nail art. Simulated work experience provides the opportunity for the students to enhance and further develop learned skills, safety measures, human relations, employment related skills, salesmanship, and public relations. Prerequisite and co-requisite: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 2430 if they have previously earned credit for COSM 1234 or COSM 1334.)-112 contact hours per semester (4:3-4)

**CSME 2431 Principles of Facial/Esthetic Technology III**
This course focuses on advanced concepts and principles of skin care and other related technologies. Prerequisites: Reading level 4, CSME 1520, CSME 1421, CSME 1302 and co-requisites: CSME 1545, CSME 2333, or department chair approval-128 contact hours per semester (4:2-6)

**CSME 2445 Instructional Theory and Clinic Operation**
This course is an overview of the objectives required by the Texas Department of Licensing and Regulation Instructor Examination. It provides employment-seeking skills and instructs students in the preparation of resumes and interviewing techniques. Prerequisites: Reading level 6, Math level 4, Writing level 6, CSME 1435, CSME 1534, CSME 2414, CSME 2515, and co-requisite: CSME 2544 or department chair approval-112 contact hours per semester (4:2-5)

**CSME 2501 Principles of Hair Coloring and Related Theory**
Presentation of the theory, practice and chemistry of hair color. Topics include terminology, application, and workplace competencies related to hair color. Emphasis will be directed toward hair lightening, temporary, semi-permanent, demi-permanent, and permanent hair coloring using current applications, formulations, and mixing techniques. Prerequisite and co-requisite: Reading level 4 and courses taken in level sequence order or department chair approval (Students may not receive credit for CSME 2501 if they have previously earned credit for COSM 1322 or COSM 1313.)-176 contact hours per semester (5:3-8)

**CSME 2515 Cosmetology Instructor III**
This course includes lesson plan assignment preparation and evaluation techniques, including assessing cosmetology student techniques. Prerequisites: Reading level 6, Math level 4, Writing level 6, CSME 1435 and CSME 1534. Co-requisites: CSME 2414 or department chair approval-144 contact hours per semester (5:3-6)

**CSME 2539 Advanced Hair Design**
This course presents advanced concepts in the theory and practice of hair design including advanced cosmetology techniques, professional cosmetology services, and workplace competencies, with emphasis directed toward client services in a simulated salon. Prerequisite and co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval-176 contact hours per semester (5:3-8)

**CSME 2541 Preparation for the State Licensing Examination**
This course is a preparation for the state licensing examination which emphasizes the study of theory and skill procedures, the refinement of professional skills to serve clients, and the development of business practices for successful entry into the industry. Prerequisites and co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval (5:3-8)

**CSME 2544 Cosmetology Instructor IV**
This course focuses on advanced concepts of instruction in a cosmetology program. Topics include demonstration, development and implementation of advanced evaluation and assessment techniques. Prerequisites: Reading level 6, Math level 4, Writing level 6, CSME 1435, CSME 1534, CSME 2414, CSME 2515 and co-requisite: CSME 2445 or department chair approval-144 contact hours per semester. (5:3-6)

*(See Massage Therapy for program courses)*
Criminal Justice

Academic Transfer Courses

CRIJ 1301 Introduction to Criminal Justice
This course covers the history and philosophy of criminal justice and ethical considerations; crime defined, its nature and impact, overview of criminal justice system; law enforcement; court system; prosecution and defense; trial process; and corrections. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 1301 and CJSA 1322.) (3:3-0)

CRIJ 1306 Court Systems and Practices
This course includes examination of the role of the judiciary in the criminal justice system. Topics include the structure of the American court system, prosecution, right to counsel, pretrial release, grand jury process, adjudication process, types and rules of evidence, and sentencing concepts. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 1306 and CJSA 1313.) (3:3-0)

CRIJ 1307 Crime in America
This course covers the study of crime problems in historical perspective, social and public policy factors affecting crime, impact and crime trends, social characteristics of specific crimes, and crime prevention. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 1307 and CJSA 1312.) (3:3-0)

CRIJ 1310 Fundamentals of Criminal Law
This course is a study of the nature of criminal law. Topics include philosophical and historical development; major definitions and concepts; classification of crime; elements of crimes and penalties and individual criminal responsibilities. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 1310 and CJSA 1327.) (3:3-0)

CRIJ 1313 Juvenile Justice System
This course is a study of the juvenile justice process. Topics include specialized juvenile law, role of the juvenile courts, role of police agencies, role of correctional agencies, and theories concerning delinquency. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 1313 and CJSA 1317.) (3:3-0)

CRIJ 2301 Community Resources in Corrections
This is an overview of diversionary practices and treatment programs available to offenders in a local context. Topics include selected recognized models and future trends in community treatment. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 2301 and CICR 2324.) (3:3-0)

CRIJ 2313 Correctional Systems and Practices
This course covers corrections in the criminal justice system; organization of correctional systems; correctional role; institutional operations; alternatives to institutionalization; treatment and rehabilitation; current and future issues. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 2313 and CICR 1307.) (3:3-0)

CRIJ 2314 Criminal Investigation
This is a study of investigative theory, the collection and preservation of evidence, sources of information, concepts of interviewing and interrogation, the use of forensic sciences; and trial preparation. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 2314 and CJSA 1342.) (3:3-0)

CRIJ 2323 Legal Aspects of Law Enforcement
This is a study of police authority; responsibilities; constitutional constraints; laws of arrest; search and seizure; police civil liability. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 2323 and CJSA 2300.) (3:3-0)

CRIJ 2328 Police Systems and Practices
This course covers exploration of the profession of police officer. Topics include: organization of law enforcement systems; the police role; police discretion; ethics; police community interaction; and current and future issues. Prerequisite: Reading level 4 (Note: credit will not be given for both CRIJ 2328 and CJSA 1359.) (3:3-0)

Technical Courses
CICR, CJLE, and CJSA courses are not intended for transfer to a university criminal justice degree plan.

CJCR 1304 Probation and Parole
This is a survey of the structure, organization, and operation of probation and parole services. Emphasis on applicable state statutes and administrative guidelines. Prerequisite: Reading level 4 (3:3-0)

CJCR 1307 Correctional Systems and Practices
A study of the role of corrections in the criminal justice system. Topics include organization and theory of correctional systems, institutional operations, management, alternatives to institutionalization, treatments and rehabilitation, and current and future issues. Prerequisite: Reading level 4 (Note: credit will not be given for both CICR 1307 and CICR 2313.) (3:3-0)

CJCR 2324 Community Resources in Corrections
This course is an overview of diversionary practices and treatment programs available to offenders in a local context. Topics include selected recognized models and future trends in community treatment. Prerequisite: Reading level 4 (Note: Credit will not be given for both CICR 2324 and CICR 2301.) (3:3-0)

CJCR 2325 Legal Aspects of Corrections
This course is a study of the operation, management, and legal issues affecting corrections. Analysis of constitutional issues involving rights of the convicted, as well as civil liability of correctional agencies and staff. Prerequisite: Reading level 4 (3:3-0)

CJLE 1327 Interviewing and Report Writing for Criminal Justice Professions
This course covers instruction and skill development in interviewing, note taking, and report writing in the criminal justice context; development of skills to conduct investigations by interviewing witnesses, victims, and suspects properly; and organization of information regarding incidents into effective written reports. Prerequisite: Reading level 4 (3:3-0)

CJLE 1333 Traffic Law and Investigation
This course covers instruction in the basic principles of traffic control, traffic law enforcement, court procedures, and traffic law. Emphasis is on the need for a professional approach in dealing with traffic law violators, and the police role in accident investigation and traffic supervision. Prerequisite: Reading level 4 (3:3-0)

CJLE 2420 Texas Peace Officer Procedures
This course is a study of the techniques used by police officers on patrol. It includes controlled substance identification, persons with abnormal behavior, traffic collision investigation, note taking and report writing, vehicle operations, traffic direction, crowd control and jail operations. Prerequisites: Texas Peace Officer Law (CJLE 2421), approval of department chair, and Reading (4:3-4)
Course Descriptions

CJSA 1308 Criminalistics I
This course is an introduction to the field of criminalistics. Topics include the application of scientific and technical methods in the investigation of crime, including location, identification, and handling of evidence for scientific analysis. Prerequisite: Reading level 4 (3:3-0)

CJSA 1312 Crime in America
This course covers the study of crime problems in historical perspective, social and public policy factors affecting crime, impact and crime trends, social characteristics of specific crimes, and crime prevention. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 1312 and CRIJ 1307.) (3:3-0)

CJSA 1313 Court Systems and Practices
This course examines the role of the judiciary in the criminal justice system. Topics include the structure of the American court system, prosecution, right to counsel, pretrial release, grand jury process, adjudication process, types and rules of evidence, and sentencing concepts. Prerequisite: Reading level 4 (Note: Credit will not be given for both CJSA 1313 and CRIJ 1306.) (3:3-0)

CJSA 1317 Juvenile Justice System
This course is a study of the juvenile justice process. Topics include specialized juvenile law, role of the juvenile law, role of the juvenile courts, role of police agencies, role of correctional agencies, and theories concerning delinquency. Prerequisite: Reading level 4 (Note: Credit will not be given for both CJSA 1317 and CRIJ 1313.) (3:3-0)

CJSA 1322 Introduction to Criminal Justice
This course is an overview of the criminal justice system. Topics include the history and philosophy of criminal justice, the definition of crime, and its nature and impact. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 1322 and CRIJ 1301.) (3:3-0)

CJSA 1327 Fundamentals of Criminal Law
This course is a study of the nature of criminal law. Topics include philosophical and historical development, major definitions and concepts, classification of crime, elements of crimes and penalties, and individual criminal responsibilities. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 1327 and CRIJ 1310.) (3:3-0)

CJSA 1342 Criminal Investigation
This course is a study of investigative theory, collection and preservation of evidence, sources of information, concepts of interviewing and interrogation, the use of forensic sciences, and trial preparation. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 1342 and CRIJ 2314.) (3:3-0)

CJSA 1348 Ethics in Criminal Justice
This course is a study of ethical thought and issues facing the criminal justice professional. Topics include constitutional ethics, codes of conduct, and standards of conduct. Prerequisite: Reading level 4 (3:3-0)

CJSA 1351 Use of Force
This course is a study of the use of force including an introduction to and statutory authority for the use of force, force options, deadly force, and related legal issues. Satisfies the TCOLEOS Use of Force Intermediate Certificate requirements. Prerequisite: Reading level 4 (3:3-0)

CJSA 1359 Police Systems and Practices
This course explores the profession of police officer. Topics include organization of law enforcement systems, the police role, police discretion, ethics, police-community interaction, and current and future issues. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 1359 and CRIJ 2328.) (3:3-0)

CJSA 1373 Police/Community Relations
This course covers the role of the individual officer in achieving and maintaining positive police-community relations, and public information. Prerequisite: Reading level 4 (3:3-0)

CJSA 1374 Crime Prevention
This course is a study of the prevention of crime through cooperative ventures between law enforcement agencies and the communities they serve. Emphasis is on the prevention of crimes against property both in businesses and in the home. It includes history of crime prevention, physical security measures, special problems in loss control, and security survey procedures. Prerequisite: Reading level 4 (3:3-0)

CJSA 2300 Legal Aspects of Law Enforcement
This is an exploration of police authority. Topics include responsibilities and constitutional restraints, law of arrest, search and seizure, and police liability. Prerequisite: Reading level 4 (Note: credit will not be given for both CJSA 2300 and CRIJ 2323.) (3:3-0)

CJSA 2302 Police Management, Supervision, and Related Topics
This course covers techniques and theories regarding dealing with people, their performance and problems. Topics include basic supervision, leadership, time management, first-line supervision, and management by objectives. Prerequisite: Reading level 4 (3:3-0)

CJSA 2323 Criminalistics II
This course focuses on both the theory and practice of crime scene investigation, and includes hands-on lab exercises. Topics include report writing, blood and other body fluids, document examination, etchings, casts and molds, glass fractures, use of microscopes, and firearms identification. Prerequisite: Reading level 4 (3:3-1)

CJSA 2364 Practicum (or Field Experience) - Criminal Justice/Safety Studies
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. The plan relates the workplace training and experiences to the student’s general and technical course of study, and it includes a written agreement between the educational institution and a business or industry. Monitored and supervised by the instructor and a workplace employee, the student achieves objectives that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. Prerequisite: 15 credit hours of criminal justice courses (9 of these credit hours must be earned at San Jacinto College) and an accumulating GPA of at least 2.0 is required. (Note: the student must receive approval to enroll from instructor at least 60 days prior to start of course.) (3:0-21)

CJSA 2388 Internship - Criminal Justice Studies
This is an intermediate or advanced type of work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Direct supervision is provided by the faculty or the work supervisor. An internship may be a paid or non-paid learning experience in the criminal justice profession. This course may be repeated if topics and learning outcomes vary. Prerequisite: department chair approval (3:0-9)
Course Descriptions

Culinary Arts

CHEF 1301 Basic Food Preparation
This course is a study of the fundamental principles of food preparation and cookery to include the Brigade System, cooking techniques, material handling, heat transfer, sanitation, safety, nutrition, and professionalism. It also includes a study of composition nutritive value and use of foods, and physical and chemical principles affecting preparation. (3:2-4)

CHEF 1305 Sanitation and Safety
This is a study of personal cleanliness; sanitary practices in food preparation, causes, investigation, control of illness caused by food contamination (Hazard Analysis Critical Control Points); and workplace safety standards. (3:3-0)

CHEF 1310 Garde Manger
This is a study of specialty foods and garnishes, with an emphasis on design, techniques, and display of fine foods. It also emphasizes basic garde manger principles and training techniques for food service professionals. (3:2-4)

CHEF 1312 Food Service Operations/Systems
This course is an overview of the information needs of food and lodging properties. Emphasis is on both front, back, and material management utilizing computer systems. (3:3-0)

CHEF 1314 A La Carte Cooking
This is a course in a la carte or “cooking to order” concepts. Topics include menu and recipe interpretation and conversion, organization of work station, employment of appropriate cooking methods, plating and saucing principles. (3:2-4)

CHEF 1345 International Cuisine
This course covers the study of classical cooking skills associated with the preparation and service of international and ethnic cuisines. Topics include similarities between food production systems used in the United States and in other regions of the world. (3:1-6)

CHEF 1401 Basic Food Preparation
This is a study of the fundamental principles of food preparation and cookery to include the Brigade System, cooking techniques, material handling, heat transfer, sanitation, safety, nutrition, and professionalism. Study will include basic skills and terminology. (4:3-3)

CHEF 2301 Intermediate Food Preparation
This is a continuation of a previous food preparation course. Topics include the concept of pre-cooked food items, as well as scratch preparation. Covers full-range of food preparation techniques. This course meets one lecture hour per week, eight lab hours per week and carries three semester hours credit. (3:1-8)

CHEF 2365 Practicum (or Field Experience) - Culinary Arts/Chef Training
This course offers practical general workplace training supported by an individualized learning plan developed by the employer, the College, and student. The plan relates workplace training and experiences to the student's general and technical course of study. The guided external experiences may be for pay or not for pay. The course may be repeated if topics and learning outcomes vary. (3:0-21)

CHEF 2402 Saucier
This course focuses on instruction in the preparation of stocks, soups, classical sauces, contemporary sauces, accompaniments, and the pairing of sauces with a variety of foods. (4:3-3)

IFWA 1318 Nutrition for the Food Service Professional
This course is an introduction to nutrition including nutrients, digestion and metabolism, menu planning, recipe modification, dietary guidelines and restrictions, diet and disease, and healthy cooking techniques. Students may not receive credit for IFWA 1318 if they have previously earned credit for RSTO 1217. (3:3-0)

IFWA 1305 Food Service Equipment and Planning
This course is a study of various types of food service equipment and the planning of equipment layout for product flow and efficient operation. Prerequisite: Reading (3:3-0)

IFWA 1310 Garde Manger
This is a course in fundamentals of baking including dough, quick breads, pies, cakes, cookies, tarts and doughnuts, and instruction in flours, fillings, and ingredients. Topics include baking terminology, tool and equipment use, formula conversions, functions of ingredients, and the use of proper flours. Prerequisite: Reading level 4 (3:2-4)

PSTR 1401 Fundamentals of Baking
This is a course in fundamentals of baking including dough, quick breads, pies, cakes, cookies, tarts and doughnuts, and instruction in flours, fillings, and ingredients. Topics include baking terminology, tool and equipment use, formula conversions, functions of ingredients, the evaluation of baked products, and the use of proper flours. (4:3-3)

PSTR 2331 Advanced Pastry Shop
This is a study of classical desserts, French and international pastries, hot and cold desserts, ice creams and ices, chocolate work, and decorations, with an emphasis on advanced techniques. (3:2-4)

PSTR 2431 Advanced Pastry Shop
This is a study of classical desserts, French and international pastries, hot and cold desserts, ice creams and ices, chocolate work, and decorations, with an emphasis on advanced techniques. (4:3-3)

RSTO 1217 Nutrition for the Food Service Professional
This is an introduction to nutrition including nutrients, digestion and metabolism, menu planning, recipe modification, dietary guidelines and restrictions, diet and disease, and healthy cooking techniques. Topics include fundamental principles of the basic food nutrients, their digestive and absorptive characteristics, and the relationship of food to the development and maintenance of health, study of people's eating habits, and the nutritional needs of all age groups. Application of the concepts of good nutrition to the planning of satisfying and interesting meals for commercial and institutional food service operations is also included. Prerequisite: Reading (2:2-0)
RSTO 1301 Beverage Management
This is a study of the beverage service of the hospitality industry including spirits, wines, beers, and non-alcoholic beverages. Topics include purchasing, resource control, legislation, marketing, physical plant requirements, staffing, serving, and the selection of wines to enhance foods. (3:3-0)

RSTO 1313 Hospitality Supervision
This course includes fundamentals of recruiting, selection, and training of food service and hospitality personnel. Topics include job descriptions, schedules, work improvement, motivation, and applicable personnel laws and regulations, with an emphasis on leadership development. (3:3-0)

RSTO 1325 Purchasing for Hospitality Operations
This is a study of purchasing and inventory management of foods and other supplies to include development of purchase specifications, determination of order quantities, formal and informal price comparison, proper receiving procedures, storage management, and issue procedures, with an emphasis on product cost analysis, yields, pricing formulas, controls, and record keeping at each stage of the purchasing cycle. (3:3-0)

RSTO 2301 Principles of Food and Beverage Control
This is a study of financial principles and controls of food service operation including review of operation policies and procedures. Topics include financial budgeting and cost analysis emphasizing food and beverage labor costs, operational analysis, and international and regulatory reporting procedures. (3:3-0)

RSTO 2365 Practicum (or Field Experience) - Restaurant, Culinary, and Catering Management/Manager
This course offers practical general workplace training supported by an individualized learning plan developed by the employer, the College, and student. The plan relates workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be for paid or unpaid. The course may be repeated if topics and learning outcomes vary. (3:0-21)

RSTO 2405 Management of Food Production and Service
This is a study of quantity cookery and management problems pertaining to commercial and institutional food service, merchandising and variety in menu planning, and customer food preferences. It includes laboratory experiences in quantity food preparation and service. (4:3-3)

RSTO 2431 Food Service Management
This course covers mastery of actual management experiences in supervision, training, planning, and control of a variety of food service operation formats to include cafeteria, table service, meetings, banquets, and catered events. Students may not receive credit for RSTO 2431 if they have previously earned credit for RSTO 2405. (4:2-8)

RSTO 2435 Modern I
This course includes beginning technique in modern dance with emphasis on floor and center work, rhythm, and movement combinations. (3:1-5)

RSTO 2515 Dance Performance III
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Prerequisite: concurrent enrollment in ballet or modern dance or department chair approval required. (1:0-3)

RSTO 2515 Dance Performance IV
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Prerequisite: concurrent enrollment in ballet or modern dance or department chair approval required. (1:0-3)

DANC 1101 Dance Composition I
This course includes exploration of the qualitative use of the body through manipulation of the variables of space, time, weight, and flow. (1:0-3)

DANC 1102 Dance Composition II
This course includes explorations of choreographic tools with emphasis on basic compositional forms, spatial design, dynamics, rhythmic structure, character, and the use of props. Prerequisite: Dance Composition I (1:0-3)

DANC 1151 Dance Performance I
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Co-requisite: concurrent enrollment in ballet or modern or department chair approval required. (1:0-3)

DANC 1152 Dance Performance II
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Co-requisite: concurrent enrollment in ballet or modern or department chair approval required. (1:0-3)

DANC 1341 Ballet I
This course includes introduction to the theory, practice, and terminology of classical ballet with emphasis on development and refinement of barre and center technique. (3:1-5)

DANC 1342 Ballet II
This course includes exploration and progression of DANC 1341 with emphasis on development and refinement of barre and center technique. (3:1-5)

DANC 1345 Modern I
This course includes beginning technique in modern dance with emphasis on floor and center work, basic rhythm, and movement combinations. (3:1-5)

DANCE 1346 Modern II
This course includes continuation and progression of DANC 1345 with emphasis on floor and center work, rhythm, and movement combinations. (3:1-5)

DANCE 2151 Dance Performance III
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Co-requisite: concurrent enrollment in ballet or modern dance or department chair approval required. (1:0-3)

DANCE 2152 Dance Performance IV
This course includes exploration of dance as an art form through participation in and performance of choreographed works. Co-requisite: concurrent enrollment in ballet or modern dance or department chair approval required. (1:0-3)

DANCE 2303 Dance Appreciation
This course is an introduction to dance as an art form with emphasis on historical perspectives, observation, and analysis of live and video performance, and exploration/analysis of creative and expressive experiences in dance. Prerequisite: Reading level 7 and Writing level 7 (3:3-0)

DANCE 2325 Anatomy and Kinesiology for Dance
This course is an exploration of the sciences of anatomy and kinesiology as they apply to and support the analysis of human movement. Prerequisite: Reading level 6 and Writing level 6 (3:3-1)

DANCE 2341 Ballet III
This is a further exposure to the theory, practice, and terminology of classical ballet with emphasis on expansion and refinement of the skills developed in DANC 1341 and DANC 1342. (3:1-5)

DANCE 2342 Ballet IV
This is a further exposure to the theory, practice, and terminology of classical ballet with emphasis on expansion and refinement of the skills developed in DANC 2341. (3:1-5)

DANCE 2345 Modern Dance III
DANCE 2345 is intended to build upon and expand the technical skills developed in DANC 1345/1346 as well as to emphasize and enhance artistic aspects of movement. (3:1-5)

DANCE 2346 Modern Dance IV
DANCE 2346 is intended to build upon and expand the technical skills developed in DANCE 2345 as well as to emphasize and enhance artistic aspects of movement. (3:1-5)
Course Descriptions

Diesel Technology

DEMR 1229 Preventative Maintenance
This is an introductory course designed to provide the student with basic knowledge of proper servicing practices. Content includes record keeping and condition of major systems. (2:1-2)

DEMR 1301 Shop Safety and Procedures
This is a study of shop safety, rules, basic shop tools, and test equipment. Prerequisite: Reading level 4 (3:3-0)

DEMR 1306 Diesel Engine I
This is an introduction to the basic principles of diesel engines and systems. Prerequisite: Reading level 4 (4:3-3)

DEMR 1317 Basic Brake Systems
This is an introduction to the basic principles of brake systems of diesel powered equipment, with an emphasis on maintenance, repairs, and troubleshooting. Prerequisite: Reading level 4 (3:2-4)

DEMR 1323 Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair
This is an introduction to heating, ventilation, and air conditioning theory, testing, and repair, with an emphasis on refrigerant reclamation, safety procedures, specialized tools and repairs. Prerequisite: Reading level 4 (3:2-4)

DEMR 1380 Cooperative Education-Diesel Mechanics
This course offers career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. This course is designed to substitute for a DEMR three semester hour course in which a student has extensive diesel work experience and in which the student is currently working. The student must have permission from the lead diesel instructor before he/she can enroll in this class. This course can be taken only once for credit. Course includes a lecture component. Prerequisite: 12 credit hours in diesel technology at San Jacinto College (3:1-20)

DEMR 1405 Basic Electrical Systems
This is an introduction to the basic principles of electrical systems of diesel powered equipment with emphasis on starters, alternators, batteries, and regulators. Prerequisite: Reading level 4 (4:3-3)

DEMR 1410 Diesel Engine Testing and Repair I
This is an introduction to testing and repairing diesel engines including related systems specialized tools. Prerequisite: Reading (4:3-3)

DEMR 1421 Power Train I
This is an introduction to fundamentals, repair and theory of power trains including clutches, transmissions, drive shafts, and differentials, with an emphasis on inspection and repair. Specific attention will include the Allison V-Drive, HD 740, World Transmission, and the 1000 and 2000 Series Transmissions. Prerequisite: Reading level 4 (4:3-3)

DEMR 1423 Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair
This is an introduction to heating, ventilation, and air conditioning theory, testing and repair, with an emphasis on refrigerant reclamation, safety procedures, specialized tools and repairs. Prerequisite: Reading level 4 (4:3-3)

DEMR 1449 Diesel Engine II
This course is an in-depth coverage of disassembly, repair, identification, evaluation, and reassembly of diesel engines. Prerequisite: Reading level 4 (4:3-3)

DEMR 1480 Cooperative Education-Diesel Mechanics
This course offers career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the College, employer, and student. Under the supervision of the College and the employer, the student combines classroom learning with work experience. This course is designed to substitute for a DEMR four semester hour course in which a student has extensive diesel work experience and in which the student is currently working. The student must have permission from the lead diesel instructor before he/she can enroll in this class. This course can be taken only once for credit. Course includes a lecture component. Prerequisite: 12 credit hours in diesel technology at San Jacinto College (4:1-25)

DEMR 2266 Field Experience-Diesel Mechanics
This course offers practical and general workplace training supported by an individual learning plan developed by the employer, college, and student. Prerequisite: 15 credit hours in diesel technology at San Jacinto College (2:0-16)

DEMR 2334 Advanced Diesel Tune-up and Troubleshooting
This course includes advanced concepts and skills required for tune-up and troubleshooting procedures of diesel engines, with an emphasis on the science of diagnostics with a common sense approach. Prerequisite: Reading level 4 (4:3-3)

DEMR 2412 Diesel Engine Testing and Repair II
This course includes coverage of testing and repairing diesel engines including related systems using specialized tools. Prerequisite: Reading level 4 (4:3-3)

DEMR 2432 Electronic Controls
This course covers advanced skills in diagnostic and programming techniques of electronic control systems. Prerequisite: Reading level 4 (4:3-3)

Dietetic Technology

DITA 1400 Dietary Manager I
This preparation for supervisory roles in food service departments emphasizes normal and therapeutic nutrition and food service systems management. Major topics include dietary and meal planning guidelines, sources and functions of nutrients, diet therapy, nutritional assessment and care, food production management and purchasing, and regulatory agencies. Program director’s approval and concurrent enrollment in FDNS 1168 is required. (4:4-0)

DITA 1401 Dietary Manager II
This course is a continuation of Dietary Manager I which emphasizes food service sanitation and safety, and administrative personnel management. Major topics include regulatory agencies, computer applications, production management, budgeting and cost control, personnel management, quality assurance, leadership skills, human relations, and communications. Program director’s approval and concurrent enrollment in FDNS 1169 is required. (4:4-0)

FDNS 1168 Practicum - Dietetics/Dietitian (RD)
This course provides practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. Program director’s approval and concurrent enrollment in DITA 1400 is required. (1:0-10)
FDNS 1169 Practicum-Dietetics/ Dietitian (RD)  
This course provides practical, general workplace training supported by an individualized learning plan developed by employer, the College and the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. Program director’s approval and concurrent enrollment in DITA 1401 is required. (1:0-10)

FDNS 1309 Nutrition in the Community  
This is a study of the nutritional status of populations at the national, state, and local community levels. It includes socioeconomic cultural and psychological influences on eating behavior; national and state health objectives, marketing strategies for objective implementation, and community nutrition program serving risk-group populations. Basic teaching/counseling methods for the nutrition education of small groups and individual clients/patients is also covered. (3:3-0)

HECO 1322 Nutrition and Diet Therapy  
This course focuses on fundamental principles of human nutrition and metabolic processes. Topics include food selection and quality of nutrients in normal and therapeutic diets related to needs of individuals through the life cycle. (3:3-0)

IFWA 1318 Nutrition for the Food Service Professional  
This course is an introduction to nutrition including nutrients, digestion and metabolism, menu planning, recipe modification, dietary guidelines and restrictions, diet and disease, and healthy cooking techniques. Students may not receive credit for IFWA 1318 if they have previously earned credit for RSTO 1217. (3:3-0)

Drafting Technology  
(See Engineering Design Graphics)

Drama  

DRAM 1120 Rehearsal and Performance  
This course is open to all students interested in theatre. Credit is earned for acting, technical work, or other participation. Course may be taken a maximum of four times for credit. (1:0-6)

DRAM 1310 Theatre  
This is an introduction to the basic practices, history, theories and styles of theatre, and includes a survey of major fields of theatrical art. Elementary stage techniques are studied along with fundamental acting techniques. (3:3-0)

DRAM 1330 Technical Production  
This is an introduction to the theory and practical application of theatre lighting, set design and construction techniques. Students are provided the opportunity to participate in actual production situations as members of the stage crew. Workshop hours will be scheduled as required. (3:3-0)

DRAM 1341 Stage Makeup  
This course will instruct the student actor in the theory and practice of stage makeup, encompassing all forms of corrective and character application. Enrollment is open to all students without prerequisite. (3:3-0)

DRAM 1342 Introduction to Costuming  
Costuming will focus on the design and building of stage costumes for production. Students will learn to sketch costume designs and will be responsible for a full costume plot for a production. Students will also learn to sew and construct costumes as well as work within a given costume budget. (3:2-2)

DRAM 1351 Acting I  
This is introduction to the basic skills and techniques of acting, with character analysis and development. It includes characterization and lab work in scenes from great dramatic literature. Rehearsal will be scheduled as required. (3:3-0)

DRAM 1352 Acting II  
This is a continuation and consolidation of the gains made in DRAM 1351. Rehearsal will be scheduled as required. (3:3-0)

DRAM 1353 Technical Production II  
This is an advanced study of the theory and practical application of theatre lighting, set design, construction techniques, and stage sound. Students are provided the opportunity to participate in actual production situations as members of the stage crew. Workshop hours will be scheduled as required. (3:3-0)

DRAM 1366 Introduction to Motion Picture Arts  
This course includes an comparative study of the different genres of motion pictures, with an emphasis on the evaluation and appreciation of the motion picture structure within each genre. Full length movies will be watched in their entirety during a two-hour lab. Visual, oral, and written evaluations of each movie are required. (3:2-2)

Economics  

ECON 1301 Introduction to Economics  
This course is a study of consumer problems of the individual and of the family in the American economy. Areas of study may include: money and credit management, saving and personal investment, estate planning, wills, buying food and clothing, home ownership or rental, transportation, insurance, taxes and consumer protection. It is designed to expose non-business majors to a broad range of economic issues and policies. It may not be taken for credit toward any degree plan for: Business Administration, Accounting, Finance, Economics. Pre-requisites: Reading level 6, Writing level 6 and Math level 6 (3:3-0)
ECON 2301 Principles of Macroeconomics
This is a survey of contemporary economic problems, including the concepts of national income and economic growth, determinants of aggregate demand and supply, business cycles, stabilization policies, and international economics and economic systems. Prerequisites: Reading level 7, Writing level 7 and Math level 7 (3:3-0)

ECON 2302 Principles of Microeconomics
This is a survey of the concepts of price determination and resource allocations in a market economy, including the economics of consumption, production and factor income, and the relationships of money and government to the market. Prerequisites: Reading level 7, Writing level 7, and Math level 7 (3:3-0)

ECON 2311 Economic Geography
This course is an analytical study of the historical development of particular economic distribution as they relate to social, cultural, political, and physical factors. It includes critical inquiry into the reasons for location of various types of economic activity, production, and marketing. It also includes critical inquiry into markets and people across time and spatial dimensions and the geographical influence on poverty, economic growth, and sustainability. Prerequisites: ECON 2301 and ECON 2302 or approval of department chair. (3:3-0)

ELECTRICAL TECHNOLOGY

ELPT 1315 Electrical Calculations I
This is an introduction to mathematical applications utilized to solve problems in the electrical field. Topics include fractions, decimals, percentages, simple equations, ratio and proportion, unit conversions, and applied geometry. Electrical calculations to solve DC and AC electrical circuits are included. (2:2-0)

ELPT 1311 Basic Electrical Theory
This course covers the basic theory and practice of electrical circuits. It includes calculations as applied to alternating and direct current, and covers electrical terminology, circuit analysis and mathematical formulas as applied to direct and alternating current circuits. (3:2-2)

ELPT 1325 National Electric Code I
This is an introductory study of the National Electric Code (NEC) for those employed in the field requiring knowledge of the Code. Emphasis will be on wiring design, protection, methods, and materials; and equipment for general use, and basic calculations. (3:3-0)

ELPT 1345 Commercial Wiring
This course provides instruction in commercial wiring methods. It includes overcurrent protection, raceway panel board installation, proper grounding techniques, and associated safety procedures. The National Electrical Code (NEC) is used to size branch circuits, feeders, service equipment, outlet and junction boxes, and conduit; and installation of lighting and utilization of equipment. Students gain experience in safe workplace practices, the proper use of hand tools and ladders, interpreting blueprints and specifications, bending and installation of conduit, installation of armored cable, and wiring of devices, load centers and service equipment. (3:2-2)

ELPT 1351 Electrical Machines
This is a study of direct current (DC) motors, single-phase and polyphase alternating current (AC) motors, generators, and alternators. Emphasis will be on construction, characteristics, efficiencies, starting, and speed control. Prerequisite: ELPT 1311 (3:2-2)

ELPT 1355 Electronic Applications
This course is a study of electronic principles and the use of electronic devices. Electronic devices include diodes, transistors, and rectifiers. Also included are zener diodes, light emitting diodes, silicon controlled rectifiers (SCRs), diacs, triacs, and supplies. Prerequisite: ELPT 1311 (3:2-2)

ELPT 1357 Industrial Wiring
This course covers wiring methods used for industrial installations. It includes motor circuits, raceway and bus way installations, proper grounding techniques, and associated safety procedures. (3:2-2)

ELPT 1429 Residential Wiring
This is a study of wiring methods for single family and multi-family dwellings that includes load calculations, service entrance sizing, proper grounding techniques, and associated safety procedures. (4:3-3)
Course Descriptions

ELPT 1440 Master Electrician Exam Review I
This is an introductory study of electrical theory, code calculations, and interpretations applicable to becoming a master electrician. It emphasizes residential, commercial, and industrial installations using the current edition of the National Electrical Code (NEC) and local ordinances. Prerequisite or co-requisite: ELPT 2325 or approval of department chair (4:4-0)

ELPT 1441 Motor Control
This is a study of operating principles dealing with solid-state and conventional controls along with their practical applications. It includes braking, jogging, plugging, safety wiring, ladder diagrams, relay logic, and timers. Prerequisite: ELPT 1311 or approval of department chair (4:3-3)

ELPT 2215 Electrical Calculations II
This is a further study of mathematical applications used to solve problems in the electrical field. The course includes fractions, decimals, ratio and proportion, applied geometry, and utilization of right triangles to calculate electrical values. It also includes power factor correction, fault currents, neutral currents, conductor ampacity, and other advanced calculations. Prerequisite: ELPT 1215 or approval of department chair (2:2-0)

ELPT 2301 Journeyman Electrician Exam Review
This course provides preparation for journeyman electricians with emphasis on calculations and the National Electrical Code (NEC). Special attention is directed toward test taking skills and practice exams as they apply to the local area journeyman exams. Prerequisite: ELPT 2325 or approval of department chair (3:3-0)

ELPT 2305 Transformers and Motors
This course focuses on the operation of single- and three-phase motors and transformers. It includes transformer banking, power factor correction, and protective devices. Also included are lessons on three-phase power concepts, transformer and motor connections, transformer and motor metering, and transformer and motor troubleshooting theory. Prerequisite: ELPT 1311 or approval of the department chair (3:3-1)

ELPT 2319 Programmable Logic Controllers I
This course covers the fundamental concepts of programmable logic controllers, principles of operation, and numbering systems as applied to electrical controls. It includes history, terminology, typical applications, hardware and software, and incorporates lab and project activities that address operating, monitoring, programming, troubleshooting, and repairs of PLC controlled lab trainers as well as actual industrial equipment. (3:2-2)

ELPT 2325 National Electrical Code II
This course includes in-depth coverage of the National Electrical Code (NEC) for those employed in fields requiring knowledge of the Code, with an emphasis on wiring protection and methods, special conditions, and advanced calculations. Prerequisite: ELPT 1325 or department chair approval (3:3-0)

ELPT 2337 Electrical Planning and Estimating
This course covers planning and estimating for residential, commercial and industrial wiring systems. Statistical procedures of various methods of estimating are introduced along with a variety of electrical techniques. Prerequisite: ELPT 2325 or approval of department chair (3:2-2)

ELPT 2343 Electrical System Design
This is a course in electrical design of commercial and/or industrial projects, including building layout, types of equipment, placement, sizing of electrical equipment, and all electrical calculations according to the requirements of the National Electrical Code (NEC). Prerequisite: ELPT 2325 or approval of department chair (3:3-0)

ELPT 2364 Practicum-Electrical and Power Transmission Installation/Installer, General
This course provides practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. The course may be repeated if topics and learning outcomes vary. Prerequisite: Approval of department chair (3:0-21)

ELPT 2449 Industrial Automation
This is an advanced study of electrical control systems, applications, and interfacing utilized in industrial automation. Ladder logic diagramming and programmable logic controllers are covered as they apply to electrical controls. Prerequisite: ELPT 1441 (4:3-3)

ELPT 2452 Master Electrician Exam Review II
This is an advanced study of electrical theory, code calculations, and interpretations applicable to becoming a master electrician. Emphasis will be on residential, commercial, and industrial applications using the current edition of the National Electrical Code (NEC). Prerequisite or co-requisite: ELPT 2451 or approval of department chair (4:4-0)

Non-Credit Continuing Education Courses

IEIR 1002 Direct Current: Electrical I
(Continuing Education Course)
This course focuses on fundamentals of direct current, including Ohm’s law, with an emphasis on methods of analyzing series, parallel, and combination circuits, including measurement devices. (128 contact hours)

IEIR 1006 Electric Motors: Electrical 3
(Continuing Education Course)
This course focuses on fundamentals of single-phase and three-phase alternating current motors and direct current motors, including operating principles, characteristics, application, selection, installation, maintenance, and troubleshooting. (128 contact hours)

IEIR 1012 Distribution Systems: Electrical 2
(Continuing Education Course)
This is a course in fundamentals of distribution systems, including the study of single-phase and three-phase systems, grounding, ground fault protection, and the National Electric Code (NEC). (128 contact hours)

ELPT 2043 Electrical Systems Design: Electrical 4
(Continuing Education Course)
This course promotes skill development in the electrical design of a commercial or industrial project, including building layout, types of equipment, placement, sizing of electrical equipment, and all electrical calculations according to the requirements of the National Electrical Code (NEC). (128 contact hours)

Electronics Technology

CETT 1303 DC Circuits
This is a study of the fundamentals of direct current including Ohm’s law, Kirchhoff’s laws, and circuit analysis techniques. Emphasis is on circuit analysis of resistive networks and DC measurements. (3:2-2)
CETT 1305 AC Circuits
This is a study of the fundamentals of alternating current, including series and parallel AC circuits, phasors, capacitive and inductive networks, transformers, and resonance. Prerequisite: CETT 1303 or department chair approval (3:2-2)

CETT 1325 Digital Fundamentals
This entry level course in digital electronics covers number systems, binary mathematics, digital codes, logic gates, Boolean algebra, Karnaugh maps, and combinational logic, with an emphasis on circuit logic analysis and troubleshooting digital circuits. (3:2-2)

CETT 1329 Solid State Devices
This course is a study of diodes, transistor characteristics and other semiconductor devices, including analysis of static and dynamic characteristics, biasing techniques, and thermal considerations. (3:2-2)

CETT 1345 Microprocessor
This introductory course in microprocessor software and hardware focuses on architecture, timing sequence operation, and programming. It also reviews appropriate software diagnostic language and tools. Prerequisite: CETT 1325 or department chair approval (3:2-2)

CETT 1349 Digital Systems
This course in electronics covers digital systems. Emphasis is on application and troubleshooting digital systems using counters, registers, code converters, multiplexers, analog-to-digital-to-analog circuits, and large-scale integrated circuits. Prerequisite: CETT 1325 or department chair approval (3:2-2)

CETT 1357 Linear Integrated Circuits
This is a study of the characteristics, operations, stabilization, testing, and feedback techniques of linear integrated circuits. It focuses on computation, measurements, instrumentation, and active filtering. Prerequisite: CETT 1329 or department chair approval (3:2-2)

CETT 2449 Research and Project Design
This course focuses on the principles of electrical/electronics design, encompassing schematics wiring diagrams, materials lists, operating characteristics, completion schedules, and cost estimates. (4:3-3)

CPMT 1349 Computer Networking Technology
This beginning course in computer networks focuses on networking fundamentals, terminology, hardware, software, and network architecture. It includes study of local/wide area networking concepts and networking installations and operations. Prerequisites: CPMT 1345, ITSC 1325 or department chair approval (3:2-2)

CPMT 2333 Computer Integration
This is an advanced course in integration of hardware, software, and applications. A key focus is customization of computer systems for specific applications in engineering, multimedia, or data acquisition. Prerequisite: CPMT 1345, ITSC 1325 or department chair approval (3:2-2)

CMPT 2345 Computer System Troubleshooting
This course focuses on principles and practices involved in computer system troubleshooting techniques and repair procedures, including advanced diagnostic test programs and the use of specialized test equipment. Prerequisites: CPMT 1345, ITSC 1325 or department chair approval (3:2-2)

CPMT 2349 Advanced Computer Networking
This is an in-depth study of network technology, with emphasis on network operating systems, network connectivity, hardware, and software. It helps students gain mastery of implementation, troubleshooting, and maintenance of LAN and/or WAN network environments. Prerequisite: CPMT 1349 or ITCC 1404 (3:2-2)

EECT 1305 AC Circuits
This is a study of the fundamentals of alternating current, including series and parallel AC circuits, phasors, capacitive and inductive networks, transformers, and resonance. Prerequisite: CETT 1303 or department chair approval (3:2-2)

EECT 1307 Convergence Technologies
This course is a study of telecommunications convergence technologies including telephone, LAN, WAN, wireless, voice, video, and Internet protocol. Prerequisite: Reading level 4 (3:2-2)

EECT 1340 Telecommunications Transmission Media
This course introduces the fundamentals of telecommunications media, including installation, maintenance, and troubleshooting. Topics address media characteristics and connectorization. (3:2-2)

EECT 2367 Practicum, (Field Experience) Electronic Technology/Technician
This course offers practical general training and experience in the workplace. The College, with the employer, develops an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general education and technical course of study. The guided external experiences may be paid or unpaid. This course may be repeated if topics and learning outcomes vary. Prerequisite: CPMT 1345 or department chair approval (3:0-21)

EECT 2439 Communications Circuits
This is a study of communications systems with emphasis on amplitude modulation, frequency modulation, phase modulation, and digital pulse modulation. There is discussion of several types of modulators, demodulators, receivers, transmitters, and transceivers. Prerequisite: CETT 1357 or department chair approval (4:3-3)

ELMT 1305 Basic Fluid Power
This is a basic fluid power course covering pneumatic and hydraulic systems, fluid power symbols, operating theory, components, and basic electrical and manual controls. Prerequisite: Reading level 4 (3:2-2)

ELMT 2333 Industrial Electronics
This is a study of devices, circuits, and systems primarily used in automatic manufacturing and/or process control, including computer controls and interfacing between mechanical, electrical, electronic, and computer equipment. It also presents programming schemes. Prerequisite: CETT 1357 or department chair approval (3:2-4)

ELMT 2335 Certified Electronics Technician Training
This course is a review of electronics concepts and principles in preparation for sitting for a certification examination administered by an outside organization or agency. Prerequisite: Reading level 4 (3:2-2)

ELMT 2341 Electromechanical Systems
This course covers application of electromechanical systems and emphasizes programmable control devices and solid state systems. Prerequisite: Reading level 4 (3:2-2)

FCEL 1405 Fuel Cell and Alter/Renew Energy
This course covers types and applications of alternative/renewable energy sources and emphasizes fuel cell applications and processes, reformation of fossil fuels, heat transfer, chemical reaction, power conditioning, combined heat and power, and distributed generation systems. Prerequisites and/or co-requisites: CETT 1303, and Reading level 4 (4:3-3)

RBTC 1355 Sensors and Automation
This course is a study of the basic principles of industrial sensors for automated systems with an emphasis on the operation and application of position, rate, proximity, opto-electronics, ranging, and pressure switches. Prerequisite: Reading level 4 (3:2-2)
Course Descriptions

Emergency Medical Technology

EMSP 1160 - Clinical-Emergency Medical Technician-Basic
This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Specific detailed learning objectives are developed for the course. Continuous enrollment may be required until these are met. prerequisite or co-requisites: EMSP 1501 or department chair approval, four hours orientation, 32 clinical, 48 field hours (1:0-5.25)

EMSP 1260 Clinical-Emergency Medical Technology-Intermediate
This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by a clinical professional. Specific detailed learning objectives are developed for the course. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 1338, EMSP 1355, EMSP 1356 or department chair approval, four hours orientation, 64 hours clinical, 64 field hours, and six credentialing practical hours (2:0-9)

EMSP 1338 Introduction to Advanced Practice
This is an exploration of the foundations necessary for mastery of the advanced topics of clinical practice out of the hospital. The curriculum is based on Department of National Standard Curriculum. The student must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 1335 and EMSP 1356, Reading level 6, Writing level 6, Math level 6, 32 lecture and 32 laboratory hours (3:2-2)

EMSP 1355 Trauma Management
This is a detailed study of the knowledge and skills necessary to reach competency in the assessment and management of patients with traumatic injuries. The curriculum is based on Department of Transportation National Standard Curriculum. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 1338, EMSP 1356, Reading level 6, Writing level 6, Math level 6, 32 lecture and 32 laboratory hours, including International Trauma life support-advanced course (3:2-2)

EMSP 1356 Patient Assessment and Airway Management
This is a detailed study of the knowledge and skills required to reach competence in performing patient assessments and airway management. The curriculum is based on Department of Transportation National Student Curriculum. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 1338 and EMSP 1355, Reading level 6, Writing level 6, and Math level 6, 32 lecture and 32 laboratory hours (3:2-2)

EMSP 1371 Anatomy and Physiology for Emergency Care
This course is an introduction into normal anatomy and physiology of the human body with a particular emphasis and clinical correlation and application to emergency care. Included is an introduction to the pathophysiology of common injuries and illnesses found in the emergency care setting. NOTE: Completion of both BIOL 2401 and BIOL 2402 are acceptable substitutes for EMSP 1371. Prerequisites: Reading level 6, Writing level 4, and Math level 4, 48 lecture hours and 16 lab hours including field trips (3:3-1)

EMSP 1501 Emergency Medical Technician - Basic
This is an introduction into normal medical technician-basic (EMT-B), including all the skills necessary to provide emergency medical care at a basic life support level with an ambulance service or other specialized services. The curriculum is based on Department of Transportation National Standard Curriculum. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites: Reading level 6, Math level 4, Writing level 4, 72 lecture, 64 laboratory and 48 clinical hours (3:0-5.25)

EMSP 2161 Clinical-EMT-Paramedic I
This is a health related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Specific detailed learning objectives are developed for the course. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 2330, EMSP 2334 or department chair approval, four hours orientation, 64 hours clinical (1:0-4.25)

EMSP 2162 Clinical-EMT-Paramedic II
This is a health related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Specific detailed learning objectives are developed for the course. Continual enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 2330, EMSP 2334 or department chair approval, four hours orientation, 64 hours clinical (1:0-4.25)

EMSP 2168 Practicum/Field Experience-Emergency Medical Technician-Paramedic
This is a practical, general workplace training supported by an individualized learning plan developed by the employer, the College, and student. Direct supervision is provided by a health care professional. Practical/field experience are unpaid external learning experiences. Specific detailed learning objectives are developed for the course. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 2338, EMSP 2243 or department chair approval, four hours orientation, 144 field hours and eight credentialing practical examination hours (1:0-10)

EMSP 2243 Assessment Based Management
This is one of the capstone courses of the EMSP program designed to provide for teaching and evaluating comprehensive assessment-based patient care management. At the completion of the course, students will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for patients with common complaints. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites or co-requisites: EMSP 2168, EMSP 2338 or department chair approval. Reading level 6, Writing level 6 and Math level 6, 64 laboratory hours (2:0-4)
EMSP 2330 Special Populations
This is a detailed study of the knowledge and skills necessary to reach competency in the assessment and management of ill or injured patients in non-traditional populations. The curriculum is based on Department of Transportation National Standard Curriculum. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites: EMSP 2348 and EMSP 2444. Prerequisite or co-requisite: EMSP 2434 or department chair approval. Reading level 6, Writing level 6, and Math level 6, 32 lecture and 48 laboratory hours, including advanced life support or pediatric education for pre-hospital providers course (3:2-3)

EMSP 2338 EMS Operations
This is a detailed study of the knowledge and skills necessary to reach competency to safely manage the scene of an emergency. Curriculum is based on the Department of Transportation National Standard Curriculum. Practical field exercises will be performed, some may require weekend participation. The student must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisite: department chair approval (3:1.5-4.5)

EMSP 2348 Emergency Pharmacology
This is a comprehensive course covering all aspects of the utilization of medications in treating emergency situations. The course is designed to compliment cardiology, special populations and medical emergency courses. The curriculum is based on the Department of Transportation National Standard Curriculum. Students must meet the expected outcomes and terminal objectives of the class. Continuous enrollment may be required until these are met. Prerequisites: EMSP 1338, EMSP 1355, EMSP 1356 or department chair approval. Reading level 6, Writing level 6, and Math level 6, 48 lecture and 64 laboratory hours, including advanced cardiovascular life support course (4:3-4)

Engineering

ENGR 2301 Engineering Mechanics I - Statics
This is a calculus-based study of composition and resolution of forces, equilibrium of force systems, friction, centroids, and moments of inertia. Prerequisite: PHYS 2425. Co-requisite: MATH 2414 (3:3-0)

ENGR 2302 Engineering Mechanics II - Dynamics
This is a calculus-based study of dynamics of rigid bodies, force- mass-acceleration, work-energy, and impulse-momentum computation. Prerequisite: ENGR 2301 Co-requisite: MATH 2415 (3:3-0)

ENGR 2304 Computer Programming
This is an introduction to computer programming using the FORTRAN77 language for the solution of mathematical and engineering problems. Students will learn to create and compile programs using IBM-compatible personal computers. Programming projects will include numerical approximation of functions, numerical integration, solution of linear systems, and curve-fitting. Prerequisite: MATH 2413 or approval by department chair (3:3-0)

Engineering Design Graphics

ARCE 1421 Architectural Illustration
This course focuses on architectural drawing and sketching emphasizing freehand drawing, perspectives, delineation in various media, and development of students' graphical expression including an introduction to various reproduction methods. (4:3-3)

ARCE 1452 Structural Drafting
This course is a study of structural systems including concrete foundations and frames, wood framing and trusses, and structural steel framing systems, including detailing of concrete, wood, and steel to meet industry standards of the American Institute of Steel Construction and The American Concrete Institute. Prerequisites: DFTG 1405 and DFTG 1409 or department chair approval (4:3-3)

ARCE 2444 Statics and Strength of Materials
This course focuses on internal effects of forces acting upon elastic bodies and the resulting changes in form and dimensions, including stress, shear, bending moments, and simple beam design. Prerequisite: Math 1333 or department chair approval (4:4-0)

ARTV 1402 Introduction to Technical Animation and Rendering
This is a basic study of technical computer models and animation, including basic animation principles, model creation, light sources, camera positioning, rendering, importing, and modification of external files. (4:3-3)

ARTV 1440 Intermediate Technical Animation and Rendering
This course provides a basic study of technical computer models and animation. Prerequisite: ARTV 1402 (4:3-3)

DFTG 1405 Technical Drafting
This course is an introduction to the principles of drafting to include terminology and fundamentals, including size and shape descriptions, projection methods, geometric construction, sections, auxiliary views and reproduction processes. (4:3-3)

DFTG 1409 Basic Computer-Aided Drafting
This course is an introduction to computer-aided drafting with an emphasis on setup, creating and modifying geometry, storing and retrieving predefined shapes; placing, rotating, and scaling objects, adding text and dimensions, using layers, coordinate systems, and plot/print to scale. (4:3-3)

DFTG 1410 Specialized Basic Computer-Aided Drafting (CAD)
This is a supplemental course to Basic Computer-Aided Drafting using an alternative computer-aided drafting (CAD) software to create detail and working drawings. (4:3-3)

DFTG 1413 Drafting for Specific Occupations
This is a discussion of theory and practice with drafting methods and the terminology required for non-drafting majors to prepare working drawings in their occupational fields. (4:3-3)
DFTG 1417 Architectural Drafting-Residential
This course focuses on architectural drafting procedures, practices, terms, and symbols, including preparation of detailed working drawings for residential structures with emphasis on light frame construction methods. Prerequisites: DFTG 1405 or DFTG 1413, and DFTG 1409 or department chair approval (4:3-3)

DFTG 1445 Parametric Modeling and Design
This course offers training with a parametric-based software for 3D design and drafting. (4:3-3)

DFTG 1458 Electrical/Electronics Drafting
This course includes electrical and electronic drawings stressing modern representation used for block diagrams, schematic diagrams, logic diagrams, wiring/assembly drawings, printed circuit board layouts, motor control diagrams, power distribution diagrams, and electrical one-line diagrams. Prerequisites: DFTG 1409 or DFTG 1413 or department chair approval (4:3-3)

DFTG 2386 Internship-Drafting and Design Technology/Technician
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. An internship may be either paid or unpaid. Students will have one orientation class with the instructor at the start of the semester. The job description for the worksite must relate to the general curriculum of the engineering design graphics department. Department chair approval required. NOTE: 16 hours of engineering design graphics courses from the following group: ARCE 1452, ARTV 1440, DFTG 1417, DFTG 2402, DFTG 2406, DFTG 2407, DFTG 2408, DFTG 2421, DFTG 2423, DFTG 2428, DFTG 2445, DFTG 2458; eight of these credits must be earned at San Jacinto College (3:0-18)

DFTG 2402 Machine Drafting
This course will include a study of production of detail and assembly drawings of machines, threads, gears, utilizing tolerances, limit dimensioning, and surface finishes. Prerequisites: DFTG 1405 and DFTG 1409 or department chair approval (4:3-3)

DFTG 2406 Machine Design
This course covers the theory and practice of design and includes projects in problem solving, including press fit, bolted and welded joints, and transmission components. Prerequisite: DFTG 1409 or department chair approval (4:3-3)

DFTG 2407 Electrical Drafting
This course is a study of area lighting, control systems and power layouts, electrical and safety codes, local factors and distribution requirements. Prerequisites: DFTG 1405 and DFTG 1409 or department chair approval (4:3-3)

DFTG 2408 Instrumentation Drafting
This course will include a study of principles of instrumentation applicable to industrial applications, fundamentals of measurement and control devices, currently used ISA (Instrumentation Society of America) symbology, and basic flow sheet layout and drafting practices. Prerequisites: DFTG 1405 and DFTG 1409 or department chair approval (4:3-3)

DFTG 2417 Descriptive Geometry
This course covers graphical solutions to problems involving points, lines, and planes in space. Prerequisite: DFTG 1405 (4:3-3)

DFTG 2419 Intermediate Computer-Aided Drafting
This is a continuation of practices and techniques used in basic computer-aided drafting emphasizing advanced dimensioning techniques, the development and use of prototype drawings, construction of pictorial drawings, construction of 3-dimensional drawings, interfacing 2-D and 3-D environments and extracting data. This course uses MicroStation software. Prerequisite: DFTG 1410 or department chair approval (4:3-3)

DFTG 2421 Topographic Drafting
This course focuses on the plotting of surveyor’s field notes, including drawing elevations, contour lines, plan and profiles, and laying out traverses. Prerequisite: DFTG 1405 or DFTG 1409 or department chair approval (4:3-3)

DFTG 2423 Pipe Drafting
This course is a study of pipe fittings, symbols, specifications and their applications to a piping process system, including the creation of symbols and their usage in flow diagrams, plans, elevations, and isometrics. Prerequisites: DFTG 1405 and DFTG 1409 or department chair approval (4:3-3)

DFTG 2428 Architectural Drafting-Commercial
This course focuses on architectural drafting procedures, practices, governing codes, terms and symbols including the preparation of detailed working drawings for a commercial building, with emphasis on commercial construction methods. Prerequisites: DFTG 1405 or DFTG 1413, and DFTG 1409 or department chair approval (4:3-3)

DFTG 2432 Advanced Computer-Aided Drafting
This course covers advanced techniques, including the use of a customized system, and presentation of advanced drafting applications, such as three-dimensional solids modeling and linking graphic entities to external non-graphic data. Prerequisite: DFTG 1409 or department chair approval (4:3-3)

DFTG 2436 Computer-Aided Drafting Programming
This course covers the use of programming language to enhance CAD software. Prerequisite: DFTG 1409 or department chair approval (4:3-3)

DFTG 2438 Final Project - Advanced Drafting
This is a drafting course in which students participate in a comprehensive project from conception to conclusion. Department chair approval required. NOTE: 16 credit hours of Engineering Design Graphics courses from the following group: ARCE 1452, ARTV 1440, DFTG 1417, DFTG 2402, DFTG 2406, DFTG 2407, DFTG 2408, DFTG 2421, DFTG 2423, DFTG 2428, DFTG 2445, DFTG 2458; eight of these credits must be earned at San Jacinto College (4:3-3)

DFTG 2440 Solid Modeling/Design
This is a computer-aided modeling course that includes development of three-dimensional drawings and models from engineering sketches and orthographic drawings and utilization of three-dimensional models in design work. Prerequisite: DFTG 1409 or department chair approval (4:3-3)

DFTG 2445 Advanced Pipe Drafting
A continuation of pipe drafting concepts building on basic principles acquired in pipe drafting. Prerequisites: DFTG 2423 or department chair approval (4:3-3)

DFTG 2447 Advanced Technical Animation and Rendering
This course focuses on advanced 3D modeling, rendering and animation techniques using industry standard software. It emphasizes advanced use of camera settings, lighting, and surface to create detailed environments. Prerequisite: ARTV 1440 or department chair approval (4:3-3)

DFTG 2458 Advanced Machine Design
This course covers design process skills for the production of a complete design package, which includes jig and fixture design, extrusion dies, and injection mold design. Prerequisite: DFTG 2406 or department chair approval (4:3-3)
**Course Descriptions**

**English**

**ENGL 0306 Beginning Writing Skills**
This course is designed for systematic study and review of applicable grammatical forms and proper punctuation in a gradual progression from sentence structure to paragraph writing. The course offers opportunities to develop basic writing skills and to enhance critical thinking. The course includes one hour of lab weekly. This course is not applicable to any degree. Prerequisite: Writing level 4. (3:3-1)

**ENGL 0307 Preparation for College English**
This course is a comprehensive review of the fundamentals of composition and grammar with emphasis on paragraph writing, beginning theme construction, and mechanical and syntactical correctness. It provides students with opportunities to develop critical reading and writing skills through reading and discussing the works of professional writers. This course is not applicable to any degree. Prerequisite: A grade of C or above in ENGL 0306 or writing score within defined range (3:3-0)

**ENGL 0308 Writing and Grammar: English for Speakers of Other Languages**
This course reviews the fundamentals of composition and grammar with emphasis on logical paragraph and essay construction, clear and idiomatic English, appropriate syntactical features, and mechanical correctness. In addition, the course provides for the development of critical reading, thinking, writing, and speaking skills through the analysis and discussion of professional essays. Laboratory sessions provide group and individual practice with a variety of second language problem areas. This course is not applicable to any degree. Prerequisite: A grade of C or above in ENGL 0306 or writing score within defined range (3:3-1)

**ENGL 1111 Creative Writing Workshop**
This composition course is designed for students interested in practicing and criticizing artistic expression through writing. The course also provides experience in producing San Jacinto College’s literary magazines. Course may be taken a maximum of six times for credit. Prerequisite: Writing level 7 (1:1-0)

**ENGL 1301 Composition I**
The student is given extensive practice in reading and writing expository and argumentative prose. The various elements of composition, such as logical organization, effective diction, and complete and varied development, are stressed. A formal research paper is required. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

**ENGL 1302 Composition II**
A continuation of ENGL 1301, this course extends the writing and critical reading and thinking skills developed in Composition I through the careful reading of major literary genres and the preparation of critical and analytical writing assignments. Research writing is required. Prerequisite: ENGL 1301 (3:3-0)

**ENGL 1303 Honors Composition I**
This course is designed for students who have strong backgrounds in composition and who make high scores on an English placement test. Assignments in the course will emphasize reading and writing skills, argumentation, the informal essay, and the research paper. Prerequisites: Writing level 9 and recommendation of department chair. (A student may not receive credit for both ENGL 1301 and ENGL 1303.) (3:3-0)

**ENGL 1304 Honors Composition II**
A continuation of ENGL 1303, this course extends a student’s skills in reading and writing critically by introducing him or her to works of literature that represent various genres and that suggest a number of ideas. Students will write a number of short papers analyzing ideas and concepts from the works they read, and they will submit a documented study of one author or of a significant theme in a number of works. Examinations and quizzes may also be a part of the semester grade. Prerequisite: ENGL 1303 or nomination by the department chair. (A student may not receive credit for both ENGL 1302 and ENGL 1304.) (3:3-0)

**ENGL 2307 Creative Writing**
This elective composition course provides an opportunity for students to create imaginative works for pleasure and publication within the supportive atmosphere of a writing workshop. The workshop may emphasize a single genre, such as poetry, fiction, or drama. Alternatively, the workshop may allow individual students to specialize on projects longer than those typically covered in English 2307 within such literary areas as personal and narrative essay, poetry, prose fiction or drama. Students analyze significant contemporary literature, finding models of successful forms and effective techniques. Additionally, students critique the work of classmates. Literary theory and strategies for publication are discussed. Students are also encouraged to participate as editors for the college literary magazines and to submit their best work for publication. This three-credit-hour course may be taken once for college credit. Students may elect a maximum of six hours of creative writing courses for college credit (English 1111, English 2307, and English 2308). English 2308 may also be taken through Continuing Education as a non-credit course. Prerequisite: ENGL 1301 (3:3-0)

**ENGL 2311 Technical Report Writing**
This course applies the principles of composition to actual writing situations in technical areas, stressing correctness and effectiveness in a variety of report forms, including an investigative paper on a technical topic. Prerequisite: ENGL 1301 (3:3-0)

**ENGL 2322 A Survey of Early British Literature: The Anglo-Saxon Age Through the Neo-Classical Age**
This course offers opportunities for reading and discussing the works of major British writers as well as significant events and persons in cultural history. Students will be asked to complete a variety of writing assignments including essay examinations, short compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2323 A Survey of Later British Literature: The Romantic Age Through the Present Age**
This course offers opportunities for reading and discussing the works of major Romantic, Victorian, and Modern British writers as well as significant events and personalities in the development of cultural history from the late Eighteenth Century to the present. Students will be asked to complete a variety of writing assignments including essay examinations, short compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)
**Course Descriptions**

**ENGL 2327 A Survey of Early American Literature**
This course offers opportunities for discussing and reading works by major American writers from the Puritan Period through the Romantic Period, making an effort to identify those themes and literary forms which are characteristic of the American heritage. Students will be asked to complete a variety of writing assignments including essay examinations, short critical compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2328 A Survey of Later American Literature**
This course offers opportunities for discussing and reading works by major American writers from the Realistic/Naturalistic Period to the present, making an effort to identify those themes and literary forms which are characteristic of the American heritage. Students will be asked to complete a variety of writing assignments including essay examinations, short critical compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2330 A Survey of Early World Literature**
By reading, discussing, and writing about works of selected writers from a number of cultures from ancient times to the eighteenth century, the student will become aware of the diverse ways in which human beings have attempted to understand themselves and their relationship to nature, art, the supernatural, and society. The course is especially relevant to students majoring in humanities or human studies. Students will be asked to complete a variety of writing assignments including essay examinations, short compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2331 A Survey of Later World Literature**
A continuation of ENGL 2332, this course offers opportunities for the discussion of writers representing many cultures from the Eighteenth Century to the present. This course is especially relevant to students majoring in humanities or human studies. Students will be asked to complete a variety of writing assignments including essay examinations, short compositions, and investigative papers. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2341 Literature and Film**
This course covers the study of one or more literary genres including, but not limited to, fiction, drama, and film are included in this course. The course offers an analytical approach to both literature and film. Through various methods, students will learn conceptual frameworks and vocabulary for understanding and explaining how films and literature enhance our perception of society and inform our awareness and judgment. The course strives to help students critically approach culture by analyzing literary works. Prerequisite: ENGL 1302 (3:3-0)

**ENGL 2351 Mexican-American Literature**
This is a survey course of Mexican-American/Chicano literature including fiction, non-fiction, poetry, and drama. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

**ENGL 2370 Selected Studies in Literature**
This course offers students opportunities for intensive analysis of literary works that may be unified by theme, period, or subject matter. Students will be asked to complete a variety of writing assignments including essay examinations, short compositions, and investigative papers. The course may be repeated a maximum of two times for transfer credit provided the repeated course covers a different topic. Prerequisite: ENGL 1302 (3:3-0)

**English for Speakers of Other Languages**

**ESOL 0311 Introductory Listening and Speaking**
This course helps students learn to comprehend and use the basic structures of English and perform simple writing tasks such as using complete sentences, filling out forms, writing invitations, and communicating through short notes. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0321 or minimum score on a standardized test of English language proficiency (3:3-0)

**ESOL 0312 Intermediate Listening and Speaking**
This course is designed for the non-native speaker. It focuses on English language development through reading activities such as comprehension and vocabulary. This course does not apply toward any degree. Prerequisite: standardized test of English language proficiency (3:3-0)

**ESOL 0321 ESOL Introductory Reading**
This course introduces the development of organizational structures, logic patterns, and basic grammar. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0321 or minimum score on a standardized test of English language proficiency (3:3-0)

**ESOL 0322 ESOL Intermediate Reading**
This course continues language development through reading comprehension, vocabulary building, and adapting reading rate for different purposes. This course can be taken with other skill areas of ESOL. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0321 or minimum score on a standardized test of English language proficiency (3:3-0)

**ESOL 0323 Advanced Reading**
This course continues language development through reading comprehension, vocabulary building, and adapting reading rate for different purposes. This course can be taken with other skill areas of ESOL. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0322 or minimum score on a standardized test of English language proficiency (3:3-0)

**ESOL 0331 Introductory Writing and Grammar**
This course develops public and academic oral language skills through active participation in group activities. Rhetorical skills such as narration and description are practiced. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0331 or minimum score on standardized test of English language proficiency (3:3-1)

**ESOL 0332 Intermediate Writing and Grammar**
This course introduces the development of controlled and guided paragraphs using a variety of organizational structures, logic patterns, and basic grammar. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0331 or minimum score on standardized test of English language proficiency (3:3-1)
ESOL 0333 Advanced Writing and Grammar
This course stresses the process of paragraph writing and the characteristics of effective paragraphs. The student will learn how to write controlled essays, to develop and support opinions, and to write introductions and conclusions. This course does not apply toward any degree. Prerequisite: a grade of C or better in ESOL 0332 or minimum score on standardized test of English language proficiency (3:3-1)

ESOL 0351 Introductory Composition for Non-native Speakers
This course is designed for non-native students who need to master the rhetorical modes for academic and professional English writing and reading situations. This course will introduce them to essays, short stories, and poetry. This course does not apply toward an associate degree. Prerequisite: standardized test of English language proficiency (3:3-0)

ESOL 0352 Intermediate Composition for Non-native Speakers
This course is designed for non-native speakers who have taken ESOL 0351 and need to master the rhetorical modes for academic and professional English writing and reading situations. This course does not apply toward the associate degree. Prerequisite: completion of ESOL 0351 with a grade of C or better, or minimum score on standardized test of English language proficiency (3:3-0)

ESOL 0353 ESOL Advanced Composition
This course is designed for non-native speakers who have taken ESOL 0352 and need to master the rhetorical modes for academic and professional English writing and reading situations and learn to recognize the different uses of language. This course does not apply toward the associate degree. Prerequisite: completion of ESOL 0352 with a grade of C or better or minimum score on standardized test of English language proficiency (3:3-0)

Eye Care Technology

HPRS 1106 Essentials of Medical Terminology
This course is a study of medical terminology, word origin, structure and application. (1:1-0)

HPRS 2200 Pharmacology for Health Professions
This is a study of drug classifications, actions, therapeutic uses, adverse effects, routes of administration, and calculation of doses. (2:2-0)

OPTS 1166 Ophthalmic Practicum I
This course covers practical general training and experiences in the workplace. The College with the employer develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. This course may be repeated if topics and learning outcomes vary. (1:0-8)

OPTS 1191 Special Topics in Opticianry/Dispensing Optician
This course covers recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the students. This is an introductory course for first-year students. (1:1-0)

OPTS 1311 Visual System
This is an overview of the ophthalmic field including the anatomy and physiology of the eye, related structures, and the visual system. (3:3-0)

OPTS 1315 Basic Contact Lenses
This is an introduction to contact lens theory and practice. Topics include the history, development, and manufacture of contact lenses; lens materials, designs, fitting, and care techniques; and skill necessary for the accurate measurement of lens parameters. (3:2-3)

OPTS 1319 Vision Care Office Procedures
This is an overview of procedures used in an optical, optometric, ophthalmological office. Instruction on government, third party, and other managed care insurance claim forms, maintenance of patient records, safety regulations, correspondence and ethics. (3:3-0)

OPTS 1392 Special Topics in Optical
This course covers current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Prerequisite: OPTS 1191 (3:3-0)

OPTS 1471 Anatomy and Physiology for Eye Care Technology
This is an introduction to the normal structures and functions of the human body relating to homeostasis as it is relate to ophthalmic medical personnel. (4:4-0)

OPTS 1501 Ophthalmic Dispensing
This is an introduction to the basic principles of frame selection, styling, refractive errors, and lens design and to the use of tools and instruments used to measure and make adjustments necessary to properly dispense spectacles. (5:3-6)

OPTS 2266 Ophthalmic Practicum II
This course covers practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. Prerequisite: OPTS 1166 (2:0-16)

OPTS 2350 Ophthalmic Surgical Techniques
A continuation of Ophthalmic Techniques, this course introduces the student to aseptic and non-aseptic sterilization techniques used in the surgical field and provides knowledge and practice in scrubbing techniques used when assisting during ophthalmic surgical procedures. (3:2-3)

OPTS 2431 Advanced Ophthalmic Dispensing
This is an advanced study of the procedures necessary to dispense eyewear. Topics include lens aberrations, magnification, tilt, reflection, absorption and transmission, advanced lens materials, high-powered prescription considerations, and partial vision. Prerequisite: OPTS 1501 (4:2-6)

OPTS 2441 Ophthalmic Techniques
This course covers presentation of information and practical training in the techniques necessary to properly assist the refractionist or eye physician. Topics include visual acuity assessments and performance of various diagnostic tests. (4:2-6)

OPTS 2445 Advanced Ophthalmic Techniques
This is a continuation of Ophthalmic Techniques with an introduction to principles and techniques of various diagnostic evaluations. Topics include refractometry and retinoscopy, ophthalmic photography, applanation tonometry, and advanced clinical assessments. An overview of standardized tools prevalent in the field will be covered. Prerequisite: OPTS 2441 (4:2-6)

Fire Protection Technology

FIRS 1301 Firefighter Certification I
This is an introduction to firefighter safety and development. Topics include Texas Commission on Fire Protection Rules and Regulations, fire safety, fire science, personal protective equipment, self-contained breathing apparatus, and fire reports and records. This includes 32 lecture hours, 48 hours of skills development, and Firefighter Training Academy participation. Prerequisite: Reading level 6 (3:2-3)
FIRS 1313 Firefighter Certification III
This course covers the general principles of fire apparatus, pump operations, fire streams, and public operations as they relate to fundamental development of basic firefighter skills. It includes 48 hours of lecture, 16 hours of skills development, and Firefighter Training Academy participation. Prerequisite: Reading level 6 (3:3-1)

FIRS 1319 Firefighter Certification IV
This is a study of equipment, tactics and procedures used in forcible entry, ventilation, salvage, and overhaul. It includes preparation for certification as a basic firefighter, 32 lecture hours, 32 hours of skills development, and Firefighter Training Academy participation. Prerequisite: Reading level 6 (3:2-2)

FIRS 1329 Firefighter Certification VI
This course covers the study of fire inspection techniques and practices, public transportation, fire cause determination. Topics include fire protection systems, wild land fire, and pre-incident planning. It includes preparation for certification as a basic firefighter, 48 hours of lecture, 16 hours of skills development, and Firefighter Training Academy participation. Prerequisite: Reading level 6 (3:3-1)

FIRS 1407 Firefighter Certification II
This course covers the study of basic principles and skill development in handling fire service hose and ladders. Topics include the distribution system of water supply, basic building construction, and emergency service communication, procedures, and equipment, 32 hours of lecture, 62 hours of skills development, and Firefighter Training Academy participation. Prerequisite: Reading level 6 (4:2-5)

FIRS 1423 Firefighter Certification V
This course covers the study of ropes and knots, rescue procedures and techniques, and hazardous materials, with preparation for certification as a basic firefighter. Forty-eight hours of lecture, 48 hours of skills development, and Firefighter Training Academy activities are included. Prerequisite: Reading level 6 (4:3-3)

FIRS 1433 Firefighter Certification VII
This course covers an in-depth study and practice of simulated emergency operation and hands-on live fire training exercises, incident command procedures and combined operations using proper extinguishing methods, with an emphasis on safety. Thirty- two lecture hours, 62 hours of skills development, and Firefighter Training Academy activities are included. Prerequisite: Reading level 6 (4:2-5)

FIRS 1403 Fire and Arson Investigation I
This is an in-depth study of basic fire and arson investigation practices, with an emphasis on fire investigation procedures related to fire cause and origin determination. This includes 48 lecture hours and 16 hours of skills development. (3:3-1)

FIRS 1309 Fire Administration I
This is an introduction to the organization and management of a fire department and the relationship of government agencies to the fire service, with an emphasis on fire service leadership from the perspective of the company officer. It includes 48 lecture hours. (3:3-0)

FIRT 1315 Hazardous Materials I
This is a study of the chemical characteristics and behavior of various materials. Topics include storage, transportation, handling hazardous emergency situations, and the most effective methods of hazard mitigation. It is the equivalent to Hazardous Materials Operations Level Training, and includes 48 lecture hours, and 16 hours of skills development. (3:3-1)

FIRT 1319 Firefighter Health and Safety
This is a study of firefighter occupational safety and health in emergency and non-emergency situations. The student will identify and describe components of a firefighter safety and health program; explain safety practices and procedures related to emergency and non-emergency operations; and outline the components of a firefighter wellness program. It includes 48 lecture hours. (3:3-0)

FIRT 1327 Building Construction for the Fire Service
This course covers the exploration of building construction and design related to fire spread suppression in various structures, and examination of potential hazards resulting from construction practices and materials. The student will identify types of building construction: recognize hazards associated with construction practices; identify fire resistive levels of building materials; and recognize signs of potential structural collapse. It includes 48 lecture hours. (3:3-0)

FIRT 1338 Fire Protection Systems
This is a study of fire detection, alarm, and extinguishing systems and includes 48 lecture hours. (3:3-0)

FIRT 1345 Hazardous Materials II
This is an in-depth study of mitigation practices and techniques to effectively control hazardous materials spills and leaks. It is the equivalent to Hazardous Materials Technician Level Training, and includes 48 lecture hours, and 16 hours of skills development. (3:3-1)

FIRT 1349 Fire Administration II
This is an in-depth study of fire service management as pertaining to budgetary requirements, administration, organization of divisions within the fire service, and relationships between the fire service and outside agencies. It includes 48 lecture hours. Prerequisite: FIRT 1309 (3:3-0)

FIRT 1370 Technical Rope Rescue I
This is an in-depth study of Technical Rope Rescue including extensive skills development. Upon completion of this course students should be able to identify, describe, and demonstrate rope rescue and confined space rescue procedures at the Technical Rescuer-Level I level. The content of this course meets and/or exceeds Texas Commission on Fire Protection requirements specified in National Fire Protection Association 1006- Standard for Technical Rescuer Professional Qualifications, 2008 Edition including the specialty areas of rope rescue and confined space rescue. This course may be repeated in order to maintain student skill proficiency. (3:2-3)

FIRT 1408 Fire Inspector I
This course covers fire inspection including rules, codes, and field inspection practices to meet certification requirements of the Texas Commission on Fire Protection. Students select and limit applicable rules and regulations; select and apply appropriate codes; list different types of construction and allowable occupancy classifications; and describe building service equipment and processes. Learn how to describe and list possible hazards; list different types of fire protection systems and water supplies; and demonstrate field proficiency in inspection practices. This course meets and/or exceeds Texas Commission on Fire Protection requirements for Fire Inspector I certification. (4:3-3)

FIRT 1440 Fire Inspector II
This course covers fire inspection rules, procedures, and inspection practices to meet the Texas commission on Fire Protection requirements for Fire Inspector II. It covers how to process a permit applying the appropriate codes, rules, hazard identification processes, building processes, emergency plans, and fire protection systems. This course meets and/or exceeds Texas Commission on Fire Protection requirements for Fire Inspector II certification. (4:3-3)

FIRT 2305 Fire Instructor I
This course prepares fire and emergency services personnel to deliver instruction from a prepared lesson plan, including the use of instructional aids and evaluation instruments to meet the Texas Commission on Fire Protection requirements for Fire Instructor I certification. It includes 48 lecture hours (3:3-0)
FIRT 2309 Firefighting Strategies and Tactics I
This course covers an analysis of the nature of fire problems and selection of initial strategies and tactics including an in-depth study of efficient and effective use of manpower and equipment to mitigate the emergency. It includes 48 lecture hours (3:3-0)

FIRT 2323 Fire and Arson Investigation II
This is a continuation of Fire and Arson Investigation I. Topics include reports, courtroom demeanor, and expert witnesses. It includes 48 lecture hours and 16 hours of skills development. (3:3-1)

FIRT 2331 Firefighting Strategies and Tactics II
This is a continuation of Firefighting Strategies and Tactics I with an emphasis on use of incident command in large-scale command problems and other specialized fire problems. It includes 48 lecture hours. Prerequisite: FIRT 1311 (3:3-0)

FIRT 2345 Hazardous Materials III
This is a continuation of Hazardous Materials II. Topics include radioactive materials and radiation; poisons and toxicology; cryogenics; oxidizers; corrosives; flammable solids; hazards of Class A fuels, plastics and organic and inorganic peroxides and water reactivity, and polymerization and polymerizing substances. It includes 48 lecture hours and 16 hours of skills development. (3:3-1)

FIRT 2351 Company Fire Officer
This is a capstone course covering fire ground operations and supervisory practices. It includes performance evaluation of incident commander, safety officer, public information officer, and shift supervisor duties and 48 lecture hours. (3:3-0)

FIRT 2370 Technical Rope Rescue II
This is an in-depth study of Technical Rope Rescue including extensive skills development. Upon successful completion of this course, students should be able to identify, describe, and demonstrate rope rescue and confined space rescue procedures at the Technical Rescuer-Level I level. The content of this course meets and/or exceeds the job performance requirements specified in National Fire Protection Association 1006-Standard for Technical Rescuer Professional Qualifications, 2008 Edition including the specialty areas of rope rescue and confined space rescue. This course may be repeated in order to maintain student skill proficiency. Prerequisite: FIRT 1370 (3:2-3)

Foreign Languages

CHIN 1411 Beginning Chinese I
This course offers fundamental skills in listening comprehension, speaking, reading, and writing including basic vocabulary, grammatical structures, and culture. This course is an introduction to the Mandarin Chinese language in both written and spoken form. Students will spend three hours a week learning language patterns and forms, and two hours a week in lab activities. Students who have successfully completed two years of Chinese in high school, may, with department chair approval, begin with CHIN 1412. However, students should be aware that some degrees require two semesters of beginning Chinese. Prerequisite: Reading level 6 (4:3-2)

CHIN 1412 Beginning Chinese II
This course presents fundamental skills in listening comprehension, speaking, reading, and writing, including basic vocabulary, grammatical structures, and culture. This course is the second half of an introduction to the Mandarin Chinese language in written and spoken form. Students will spend three hours a week learning language patterns and forms and two hours a week in lab activities. Students who have successfully completed two years of Chinese in high school, may, with department chair approval, begin with CHIN 1412. However, students should be aware that some degrees require two semesters of beginning Chinese. Prerequisite: CHIN 1411 (4:3-2)

CHIN 2311 Intermediate Chinese I
This course covers a review and application skills in listening comprehension, speaking, reading, and writing. It emphasizes conversation, vocabulary acquisition, reading, composition, and culture. This course is designed to give the student who has completed CHIN 1411 and CHIN 1412 increased fluency and confidence in the use of the Chinese language. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: CHIN 1412 (3:3-0)

CHIN 2312 Intermediate Chinese II
This course is a review and application of skills in listening comprehension, speaking, reading and writing, emphasizing conversation, vocabulary acquisition, reading, composition, and culture. This course is a continuation of CHIN 2311. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: CHIN 2311 (3:3-0)

GERM 1411 Beginning German I
This course is an introduction to the German language in both written and spoken form. Students will spend three hours a week learning language patterns and forms and two hours a week in lab activities. Students who have successfully completed two years of German in high school may, with the department chair approval, begin with GERM 1412. However, students should be aware that some degrees require two semesters of beginning German. Prerequisite: Reading level 6 (4:3-2)

GERM 1412 Beginning German II
This course continues the introduction to the German language begun in GERM 1411. Students who have had two or more years of German in high school or can demonstrate adequate proficiency may begin with this course, provided they have approval from the department chair. Students will spend three hours a week learning language patterns and forms and two hours a week in lab activities. Prerequisite: GERM 1411-1412 (4:3-2)

GERM 2311 Intermediate French I
This course is designed to give the student who has completed FREN 1411 and 1412 increased fluency and confidence in the use of the French language. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisites: FREN 1411-1412 (3:3-0)

GERM 2312 Intermediate French II
This course is a continuation of FREN 2311. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: FREN 2311-2312 (3:3-0)
Course Descriptions

GERM 1412 Beginning German II
This course continues the introduction to the German language begun in German 1411. Students who have had two or more years of German in high school or can demonstrate adequate proficiency may begin with this course, provided they have approval from the department chair. Students will spend three hours a week in lab activities. Prerequisite: GERM 1411 (4:3-2)

GERM 2311 Intermediate German I
This course is designed to give the student who has completed GERM 1411 and 1412 increased fluency and confidence in the use of the German language. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: GERM 1411-1412 (3:3-0)

GERM 2312 Intermediate German II
This course is a continuation of GERM 2311. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: GERM 2311 (3:3-0)

SPAN 1411 Beginning Spanish I
This course is an introduction to the Spanish language in written and spoken form, enabling a beginning student to lay foundations for later study. Students will spend three hours a week in lab activities. Prerequisite: SPAN 1411 (4:3-2)

SPAN 1412 Beginning Spanish II
This course continues the introduction to the Spanish language begun in Spanish 1411. Students who have had two or more years of Spanish in high school or can demonstrate adequate proficiency may begin with this course, provided they have approval from the department chair. Prerequisite: SPAN 1411 (4:3-2)

SPAN 1415 Essentials of Spanish for Health Occupations
This course requires intensive practice in basic grammar, pronunciation, reading and simple conversation; emphasis is placed on medical terminology. This course cannot be substituted for SPAN 1411 (4:3-2)

SPAN 2311 Intermediate Spanish I
This course is designed to give the student who has completed Spanish 1411 and 1412 increased fluency and confidence in the use of the Spanish language. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisites: SPAN 1411-1412 (3:3-0)

SPAN 2312 Intermediate Spanish II
This course is a continuation of Spanish 2311. Although no lab is scheduled, students will have access to tapes and other lab materials and will be encouraged to use these supplemental learning tools. Prerequisite: SPAN 2311 (3:3-0)

SPAN 2316 Spanish on the Job I
The primary purpose of this course is to give the student an opportunity to develop an accurate oral use of the language (in simulated on-the-job situations), based on a sound understanding of structure. Reading will be incidental to the oral objective. Prerequisite: eight hours of Spanish or approval (3:3-0)

SPAN 2317 Spanish on the Job II
This course has the same objectives as SPAN 2316 but utilizes different simulated on-the-job situations. Prerequisite: eight hours of Spanish or approval (3:3-0)

Geography

GEOG 1301 Physical Geography
This course includes a study of climate, vegetation, soils, and landforms from a location perspective with an emphasis on map skills. The role of humans in altering their environment is considered, especially the human impact on climate and vegetation. Other topics include the study of latitude and longitude; time zones; earth-sun relationships and the changing seasons; along with severe weather, such as hurricanes and tornadoes. (GEOG 1301 does not satisfy the geography elementary education majors. Check with the Counseling Center.) Prerequisite: Reading level 6 (3:3-0)

GEOG 1302 Cultural Geography
This course introduces students to the study of where and why people and activities are located on the earth’s surface. Geographic concepts include spatial organization of economic, social, political, and perceptual environments in an increasingly interrelated world community. Prerequisite: Reading level 6 (3:3-0)

GEOG 1303 World Geography
(Required of all elementary education majors)
This course includes a survey of world regions and the geographical factors that shape them. It includes basic geography concepts; world population trends; regional economic, political, language and religious characteristics; topography, vegetation, and climate of regions; the world food problem; economic development; non-industrial cultures and cultural change; and geopolitical analysis. Prerequisite: Reading level 6 (3:3-0)

Geology

GEOL 1403 Physical Geology
This is an introduction to the scope of geology, including the study of Earth’s composition, structure, and internal and external processes, such as volcanic activity, earthquakes, tsunamis, and plate tectonics. Prerequisite: Reading level 6 (4:3-3)

GEOL 1404 Historical Geology
This is the study of Earth, its origin, and the processes and events that shaped it. This course encompasses the relationship between geologic history and evolution of life. Prerequisite: Reading level 6 (4:3-3)

GEOL 1405 Environmental Geology
This is an overview of the interrelationships between humans and the environment, using regional examples and human land use. Field trip(s) are required. Prerequisites: Reading level 6, Math level 6 (4:3-3)

GEOL 1447 Meteorology
This is a one-semester survey course in meteorology, intended for both science and non-science majors. The course covers a broad range of topics within the atmospheric sciences at an introductory level and includes laboratory activities. It will provide the student with a general understanding of the Earth’s atmosphere and its behavior. Course objectives include being able to identify and explain observed weather phenomena, being able to describe the structure, composition, and dynamics of the atmosphere, and how our atmosphere has changed and can change. This course should provide a deeper appreciation of the forces acting and motions occurring in the atmosphere to produce various weather and climate conditions. Prerequisites: MATH 1314, Reading level 7, Writing level 7, and Math level 9 (4:3-3)
**Government**

**GOVT 2301 United States and Texas Politics and Constitutions**
This course is an introductory survey of the United States and Texas political systems. Topics include a theoretical study of the discipline of political science, democratic and authoritarian systems, historical and environmental factors, the United States and Texas Constitutions, federalism and local units of government, public opinion, voting behavior, the electoral system, interest groups, and political parties. (GOVT 2301 satisfies the Legislative requirement of a course emphasizing the United States and Texas Constitutions). The college recommends that a student earn a minimum of six hours of history before taking government. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

**GOVT 2302 United States and Texas Government Institutions: Legislative, Executive and Judicial Branches**
This course is an introductory survey of United States and Texas political systems. Topics include the executive, legislative, and judicial branches of government at both national and state levels. Other areas of investigation are civil rights, civil liberties, criminal justice, as well as economics, social, regulatory, foreign and defense policy. The College recommends that a student earn a minimum of six hours of history before taking government. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

**GOVT 2304 Introduction to Political Science**
This introductory survey of the discipline of political science focuses on the history, scope, and methods of the field, and the substantive topics in the discipline. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

**GOVT 2311 Mexican-American Politics**
This course is a study of Mexican-American/Chicano - a politics within the American political experience. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

---

**Health Information Management**

**HITT 1301 Health Data Content and Structure**
This is an introduction to systems and processes for collecting, maintaining, and disseminating primary and secondary health related information. The instruction in delivery and organizational structure includes content of health record, documentation requirements, registries, indices, licensing, regulatory agencies, forms and screens. Prerequisites: Reading level 4 and Writing level 4 (3:3-0)

**HITT 1305 Medical Terminology**
This is a study of word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols, surgical procedures, medical specialties, and diagnostic procedures. Prerequisites: Reading level 4, Writing level 4 (3:3-0)

**HITT 1307 Cancer Data Management I**
This introduction to cancer data management includes cancer program requirements, the American College of Surgeons Cancer Program Survey process, and data collection/retrieval-abstracting coding, staging and reporting. Prerequisites: HITT 1305, HITT 1374, HPRS 2301 (3:3-0)

**HITT 1341 Coding and Classification Systems**
This is an application of basic coding rules, principles, guidelines and conventions. Prerequisite: Reading level 4 (3:2-2)

**HITT 1345 Health Care Delivery Systems**
This is an introduction to organization, financing, and delivery of health care services, accreditation, licensure and regulatory agencies. Prerequisites: Reading level 4 and Writing level 4 (3:3-0)

**HITT 1353 Legal and Ethical Aspects of Health Information**
This course focuses on concepts of confidentiality, ethics, health care legislation and regulations relating to the maintenance and use of health information. Prerequisites: Reading level 4 and Writing level 4 (3:3-0)

**HITT 1355 Health Care Statistics**
This course covers general principles of health care statistics with emphasis in hospital statistics. It includes skill development in computation and calculation of health data and includes variability, probability, correlation and regression. Prerequisites: Reading level 4, Writing level 4, Math level 4 (3:3-0)

**HITT 1360 Clinical-Coding**
A health-related work-based learning experience that enables the coding student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisites: Reading level 4 and department chair approval (3:0-9)

**HITT 1361 Clinical-CDM**
This is a health-related work-based learning experience that enables the cancer data management student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Prerequisites: Reading level 4 and department chair approval (3:0-9)

**HITT 1371 RHIT Exam Preparation**
This course is designed to prepare the student to take the national certification exam for the Registered Health Information Technician. Mock examinations covering the various competencies will be administered throughout the course. Prerequisites: Reading level 4 and Writing level 4, department chair approval (3:3-0)

**HITT 1374 Anatomy and Physiology**
This is a general overview of the normal structure and function of human body systems. Prerequisites: Reading level 4, Writing level 4, Math level 4 (3:3-1)

**HITT 1377 Clinical-Billing and Coding**
This advanced health professions work-based instruction helps students synthesize a new knowledge, apply previous knowledge, and gain experience managing the workflow in a clinical setting. Prerequisite: department chair approval (3:0-9)

**HITT 2245 Coding Certification Exam Review**
This is a review of coding competencies and skills pertinent to the technology and relevant to the professional development of the student in preparation for a coding certification exam are covered in this course. Prerequisites: Reading level 4, Writing level 4, Math level 4 (2:2-0)

**HITT 2249 RHIT Competency Review**
This is a review of HITIT competencies, skills, knowledge and/or attitudes and behavior pertinent to the technology and relevant to the professional development of the student. (2:1-2)

**HITT 2307 Cancer Data Management II**
This is a continuation of HITT 1307 and is an intermediate Cancer Data Management course. This course includes cancer program requirements by the National Cancer Registrars Association. It includes ACS survey process, and data collection/retrieval, abstracting, coding, and staging and reporting. Prerequisite: HITT 1307, co-requisite: HITT 2370 (3:3-0)
Course Descriptions

HITT 2335 Coding and Reimbursement Methodologies
This course focuses on the development of advanced coding technique with emphasis on case studies, health records, and federal regulations regarding perspective payment systems and methods of reimbursement. Prerequisites: Reading level 4 and Writing level 4, HITT 1341 (3:2-2)

HITT 2339 Health Information Organization and Supervision
This course covers principles of organization, management, and supervision of human, fiscal, and capital resources in the health care setting. Prerequisites: Reading level 4, Writing level 4, Math level 4 (3:3-0)

HITT 2343 Quality Assessment and Performance
This is a study of the many facets of quality standards and methodologies in the health information management environment. Topics include licensing, accreditation, compilation, and presentation of data in statistical formats, quality tools, utilization management, risk management, and medical staff data quality issues. Prerequisites: Reading level 4 and Writing level 4 (3:3-0)

HITT 2346 Advanced Medical Coding
This is an in-depth coverage of ICO and CPT coding rubrics, conventions, principles, and updates as they apply to accurate coding of complex medical/surgical cases, with emphasis on case studies. Government regulations and changes in health care reporting will be addressed. Prerequisite: Reading level 4 (3:3-0)

HITT 2360 Clinical-AAS I
This is a basic type of health profession work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in a clinical setting. Prerequisites: Reading level 4 and department chair approval (3:0-9)

HITT 2361 Clinical II
This is an advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in a clinical setting. Prerequisites: Reading level 4 and department chair approval (3:0-9)

HITT 2370 Cancer Data Management III
This is an advanced level course in Cancer Data Management to include Cancer Program requirements, the American College of Surgeons guidelines, and heavy concentration in abstracting, coding, staging and State and National reporting requirements. Prerequisites: HITT 1307, co-requisite: HITT 2307 (3:3-0)

HPRS 2301 Pathophysiology
This is a study of the pathology and general health management of diseases and injuries across the life span. Topics include etiology, symptoms, and physical and psychological reactions to diseases and injuries. (3:3-0)

Health Professions

HPRS 1106 Essentials of Medical Terminology
This course is a study of medical terminology, word origin, structure and application. (1:1-0)

HPRS 1191 Special Topics in Allied Health-Clinical Lab Assistant
This course covers recently identified current events, skills, knowledge and/or attitudes and behaviors pertinent to the occupation and relevant to the professional development of the student. The student will learn to utilize critical thinking skills to evaluate relevant journal articles and case studies. Various professional organizations will be discussed. The value of continuing education and opportunities such education affords will be stressed. The student will be introduced to the computer resources available for the field. Prerequisite: HPRS 1391 (1:1-0)

HPRS 1391 Special Topics in Allied Health-Clinical Lab Assistant
This course covers recently identified current events, skills, knowledge and/or attitudes and behaviors pertinent to the occupation and relevant to the professional development of the student. The student will learn how to perform waived tests and aid the technologists in the clinical laboratory. Topics to be addressed include microbiology, hematology, serology and urinalysis, as well as specimen processing. The importance of safety and patient confidentiality will be emphasized. The student will also learn how to screen donors for blood bank donations. Prerequisite: PLAB 1223, prerequisite or co-requisite: PLAB 1166 (3:2-2)

HPRS 2200 Pharmacology for Health Professions
This is a study of drug classifications, actions, therapeutic uses, adverse effects, routes of administration, and calculation of doses. (2:2-0)

HPRS 2301 Pathophysiology
This is a study of the pathology and general health management of diseases and injuries across the life span. Topics include etiology, symptoms, and physical and psychological reactions to diseases and injuries. (3:3-0)

History

HIST 1301 American History Before 1877
This is a general survey of the history of the United States before 1877, including its European background, discovery, exploration, revolution, independence, federation, westward expansion, slavery, the Civil War, and Reconstruction. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

HIST 1302 American History Since 1877
This is a general survey of the history of the United States since Reconstruction, including industrialization, reform movements, emergence as a world power, participation in World War I and World War II, and other foreign and domestic developments to present date. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

HIST 2301 History of Texas
This is a general survey of the history of Texas under Spanish and Mexican control; the Republic, statehood, the Confederacy; reconstruction resources, the development of industries, agriculture and education. This course satisfies one-half of the legislative requirements of six semester hours in American history. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

HIST 2311 History of Western Civilization Before 1660 (European History)
This is a survey of western civilization prior to 1660, including ancient and medieval background. The Renaissance, Reformation, rise of the monarchies, new discoveries, downfall of feudalism, and European expansion are also covered in the course. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

HIST 2312 History of Western Civilization Since 1660 (European History)
This is a survey of world history with special emphasis on Europe from 1660 to the present. This course includes the Industrial Revolution, French Revolution, Congress of Vienna, age of Metternich, rise of democracy, Europeanization of the world, British Empire, World War I, World War II and present-day Europe. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)
### Course Descriptions

#### HIST 2313 History of England I
This is a survey of the political, social, economic, military, and intellectual development of England from prehistory to 1688. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

#### HIST 2314 History of England II
This is a survey of the political, social, economic, military, and intellectual development of England from 1688 to the present. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

#### HIST 2321 World Civilization I
This is a survey of the political, social, economic, military, and intellectual development of ancient and medieval history with emphasis on Asian, African, and European cultures to 1750. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

#### HIST 2323 World Civilization II
This is a survey of the political, social, economic, military, and intellectual development of modern history and culture of Asia, Africa, Europe, and the Americas from 1750 to 1750. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

#### HIST 2327 Mexican-American History I
This course is a study of historical, economic, social, and cultural development of Mexican-Americans/Chicanos to 1900. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

#### HIST 2328 Mexican-American History II
This course is a study of historical, economic, social, and cultural development of Mexican-Americans/Chicanos from 1900 to the present. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

#### INTC 1301 Principles of Industrial Measurements I
This course is a study of principles of measurement and devices used to measure process variables such as temperature, pressure, flow, and level and basic control functions. Topics include atmospheric, absolute, gauge, differential and hydrostatic pressure. Temperature topics include filled thermal systems, thermocouples, thermistors and the resistance temperature detector. Test equipment, setup, calibration, maintenance, and safe work practices will be included. (3:2-2)

#### INTC 1302 Principles of Industrial Measurements II
This course is a study of principles of measurement and devices used to measure process variables such as temperature, pressure, flow, and level and basic control functions. Topics include atmospheric, absolute, gauge, differential and hydrostatic pressure. Temperature topics include filled thermal systems, thermocouples, thermistors and the resistance temperature detector. Test equipment, setup, calibration, maintenance, and safe work practices will be included. (3:2-2)

#### INTC 1310 Configured Control Course
This course is a study of the various designs of final control elements including disassembly, assembly, calibration, troubleshooting, and required documentation. It includes instruction in basic techniques and calculations for proper valve sizing. Topics will include louveres, dampers, metering pumps, valve selection and an introduction to variable frequency drives as a final control element. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. (3:2-2)

#### INTC 1313 Final Control Elements
This course is a study of the various designs of final control elements including disassembly, assembly, calibration, troubleshooting, and required documentation. It includes instruction in basic techniques and calculations for proper valve sizing. Topics will include louveres, dampers, metering pumps, valve selection and an introduction to variable frequency drives as a final control element. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. (3:2-2)

#### INTC 1314 Instrumentation and Safety
This course is an introduction to instrumentation calibrators and instrumentation test equipment and calibration of potentiometers, temperature circuits used in analog control systems. It features instruction in instrumentation calibrators and calibration circuits used for servicing and calibration of potentiometers, temperature transmitters and various transducers. Topics include terminology, electrical symbols, electrical drawings, electrical connections and fittings, wire sizes, lighting switches, circuit breakers, fuses, enunciators, annunciators, alarms and safety shutdowns. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite or co-requisite: ELPT 1311 (3:2-2)

#### INTC 1312 Instrumentation and Safety
This course is an introduction to instrumentation calibrators and instrumentation test equipment and calibration of potentiometers, temperature circuits used in analog control systems. It features instruction in instrumentation calibrators and calibration circuits used for servicing and calibration of potentiometers, temperature transmitters and various transducers. Topics include terminology, electrical symbols, electrical drawings, electrical connections and fittings, wire sizes, lighting switches, circuit breakers, fuses, enunciators, annunciators, alarms and safety shutdowns. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite or co-requisite: ELPT 1311 (3:2-2)

#### INTC 1315 Digital Measurement and Controls
This course offers a review of basic measurement control instrumentation and digital concepts including a study of the movement of digital data through common systems and employing parallel and serial transfers. Prerequisite: ELPT 1311 (3:2-2)

#### INTC 1316 Digital Measurement and Controls
This course is a study of digital controls and electronic instrumentation systems. It introduces discrete components and digital power supplies and amplifiers. Topics include the industrial electrical distribution system, motor controls, electrical relay ladder logic and the variable frequency drive. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite: INTC 1322 (3:2-2)

#### INTC 1317 Analog Controls II
This course is a study of analog controls and electronic instrumentation systems. It introduces discrete components and basic power supplies and amplifiers. Topics include the industrial electrical distribution system, motor controls, electrical relay ladder logic and the variable frequency drive. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite: INTC 1322 (3:2-2)

#### INTC 1318 Unit Operations
This course is an in-depth study of industrial processes including fluid flow and material transport, distillation, extraction, and automatic control requirements of these processes. It includes instruction in control system design and control loop adjustments and analysis. Topics will include piping systems, pumps, compressors, agitators, tanks, heat exchangers, filters, cooling towers, refrigeration, filtration, adsorption, absorption, extruding, material handling and the distribution of utilities. Startup, operation, safe work practices and shutdown of a simulated or actual operating system will be included. (3:2-2)
INTC 1371 Distributed Control Systems
This course is designed to be a study of the philosophy and application of distributed control systems. Topics will include hardware, firmware, software, configuration, communications, and networking requirements that are necessary to implement a distributed control strategy. It includes how the measurement, control data acquisition and data analysis provides for enterprise resource planning and management. An operating system will be used to provide hands-on experience. Prerequisites: INTC 1353 and INTC 1372 (3:2-2)

INTC 1372 Principles of Industrial Measurement II
This course is designed to be a study of the physical principles and devices used to measure the process variables of level and flow. Level topics will include hydrostatic tank gauging, buoyancy, capacitance, ultrasonic, nuclear, radar, and level as a function of weight. Flow topics will include variable area, differential pressure, positive displacement, turbine, magnetic, vortex sensor, mass, thermal and ultrasonic flow meters. Laboratory exercises will include calibration, repair, documentation and safe work practices associated with level and flow measurement, indicating and recording instruments. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite: INTC 1301 (3:2-2)

INTC 1375 Sample Systems
This course is designed to foster a comprehensive understanding of sample systems used in conjunction with process analytical instrumentation. Coverage will include sample system theoretical foundations, various sample system applications, design, testing and safety procedures, along with basic troubleshooting and maintenance techniques used when working with this hardware. (3:2-2)

INTC 1443 Applications of Industrial Automatic Control
This is a study of automatic process control including measuring devices, analog and digital instrumentation, signal transmitters, recorders, alarms, controllers, control valves, and process and instrument alarms, controllers, control valves, and process and instrument drawings. It includes connection and troubleshooting of loops. (4:3-3)

INTC 1445 Instrumentation Repair
This course includes an analysis of the procedures necessary to isolate faults in microcomputer or programmable logic controller based process control systems including symptom analysis, schematic and print reading, and proper use of test equipment to isolate failures to the repairable unit. (4:3-3)

INTC 2310 Principles of Industrial Measurement II
This course is a study of advanced principles of measurement and devices used to measure process variables and basic control functions. Topics include hydrostatic tank gauging, buoyancy, capacitance, ultrasonic, nuclear, radar, and level as a function of weight. Flow topics include variable area, differential pressure, positive displacement, turbine, magnetic vortex sensor, mass, thermal, and ultrasonic flow meters. Laboratory exercises will include calibration, repair, documentation and safe work practices associated with level and flow measurement, indicating and recording instruments. Test equipment, setup, calibration, testing, maintenance and safe work practices will be included. Prerequisite: INTC 1301 (3:2-2)

INTC 2330 Troubleshooting
This course is an in-depth coverage of the techniques of troubleshooting in a complex instrumented environment. Laboratory exercises require troubleshooting upsets in chemical processes. Topics will include examples and discussions of historical, input/output and logical analysis as a methodology for solving problems. Prerequisites: INTC 1353 and INTC 2310 (3:2-2)

INTC 2333 Instrumentation Systems Installation
This course covers synthesis, application, and integration of instrument installation components and includes a comprehensive final project. Prerequisites: INTC 1353 and INTC 2310 (3:2-2)

INTC 2339 Instrument and Control Review
This course is an overview of instrument and control technology, stressing preparation for industry employment testing for the National Institute of Engineering Technologist Certification (level 2) or the Instrumentation Systems and Automatic Certified Control Systems Technician (level I) Certificate (ISA CCST). This course prepares graduating students with the background necessary to take the ISA Technician Training certification in preparation for industry employment and national testing. Prerequisites: INTC 1353 and INTC 2310 (3:3-0)

INTC 2359 Distributed Control Systems
This course is a study of philosophy and application of distributed control systems. Topics include hardware, firmware, software, configuration, communications and networking systems required to implement a distributed control strategy. Prerequisites: INTC 1353 and INTC 2310 (3:2-2)

INTC 2388 Internship Instrumentation Technology/Technician
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. In this course students apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology for the occupation and the business/industry. Prerequisite: department chair approval (3:0-16)

INTC 2436 Distributed Control and Programmable Logic
This is an overview of distributed control systems including configuration of programmable logic controllers, smart transmitters, and field communicator; functions of digital systems in a process control environment. (4:3-3)

Interior Design

INDS 1411 Fundamentals of Interior Design
This is an introduction to the elements and principles of design, and interior design profession, and the interior design problem-solving process. (4:3-3)

INDS 1415 Materials, Methods and Estimating
This is a study of materials, methods of construction and installation, and estimating for interior design applications. (4:3-3)

INDS 1445 Commercial Design I
This is a study of design principles applied to furniture layout and space planning for commercial interiors. (4:3-3)

INDS 1449 Fundamental of Space Planning
This course covers the study of residential and light commercial spaces, including programming, codes, standards, space planning, drawings and presentations. (4:3-3)
INDS 1451 History of Interiors I
This course is an historical survey of design in architecture, interiors, furnishings, and decorative elements from the ancient cultures through the Italian Renaissance time period and includes a historical survey of antiquities and European styles and periods of architecture, interiors, and furnishings focusing on Egypt, Greece, Italy, Spain, and France. (4:4-0)

INDS 1452 History of Interiors II
This course is a multi-cultural historical survey of design in architecture, interiors, furnishings, and decorative elements from the post-Renaissance period to present time and includes an historical survey of English and American styles and periods of architecture, interiors, and furnishing focusing on the twentieth century. (4:4-0)

INDS 2386 Internship-Interior Design
This course is a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. It offers experiences external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-9)

INDS 2387 Internship-Interior Design
This course is a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. It offers experiences external to the College for an advanced student in a specialized field, involving a written agreement between the educational institution and a business or industry. Monitored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. The course may be repeated if topics and learning outcomes vary. (3:0-9)

INDS 2407 Textiles for Interior Design
This course covers the study of interior design textiles including characteristics, care, codes, and applications. (4:3-3)

INDS 2413 Residential Design I
This course covers the study of residential spaces, including the identification of client needs, programming, standards, space planning, drawings, and presentations. (4:3-3)

INDS 2421 Presentation Drawing
This is an introduction to two- and three-dimensional presentations, including drawings with one- and two-point perspectives, plans, and elevations. (4:3-3)

INDS 2425 Professional Practices for Interior Design
This is a study of business practices and procedures for interior designers, including professional ethics, project management, marketing, and legal issues. (4:3-3)

INDS 2431 Commercial Design II
This course covers advanced concepts of specialized commercial interior design projects, including hospitality, corporate, retail, health care, institutional or other specialized commercial design projects. (4:3-3)

INDS 2435 Residential Design II
This is a comprehensive study of complex residential interior design problems, including advanced space planning, specifications, budgets, and presentation renderings. (4:3-3)

International Business, Logistics, and Maritime

HMSY 1337 Introduction to Homeland Security
This course is an overview of homeland security including an evaluation of the profession of homeland security issues throughout Texas and the United States. The course includes an examination of the roles undertaken and methods used by government agencies and individuals to respond to those issues. Prerequisite: Reading level 4 (3:3-0)

IBUS 1301 Principles of Exports
This course is a study of export management processes and procedures including governmental control and compliance licensing or product. The course discusses documentation, commercial invoices, and traffic procedures, emphasizing human and public relations, management of personnel, finances, and accounting. Prerequisite: Reading level 4 (3:3-0)

IBUS 1302 Principles of Imports
This course covers the study of practices and processes of import management operations which may include such factors as government controls and compliance. It emphasizes the preparation and understanding of import documents such as customs invoices, packing lists, and commercial invoices. (3:3-0)

IBUS 1305 Introduction to International Business and Trade
This course covers techniques of entering the international marketplace, with an emphasis on the impact and dynamics of sociocultural, demographic, economic, technological, and political-legal factors in the foreign trade environment. Topics include patterns of world trade, internationalization of the firm, and operating procedures of the multinational enterprise. Prerequisite: Reading level 4 (3:3-0)

IBUS 1341 Global Supply Chain Management
This course is a study of international purchasing or sourcing. Topics include the advantages and the barriers of purchasing internationally, global sourcing and procurement technology, and purchasing processes. It emphasizes issues of contract administration location, and evaluation of foreign suppliers, total cost approach, exchange fluctuations, customs procedures, and related topics. Prerequisite: Reading level 4 (3:3-0)

IBUS 1354 International Marketing Management
This course includes the study and analysis of international marketing strategies using market trends, costs, forecasting, pricing, sourcing, and distribution factors. Development of an international marketing plan is included. (3:3-0)

www.sanjac.edu
IBUS 2341 Intercultural Management
This course covers cross-cultural comparisons of demographic, economic, technological, and political-legal management and communications processes, emphasizing cultural geographic distinctions and antecedents that affect individual, group, and organizational behavior. The course may include sociocultural demographics, economics, technology, political and legal issues, negotiations, and processes of decision making in the international cultural environment. Prerequisite: Reading level 4 (3:3-0)

IBUS 2345 Import Customs Regulations
This course includes the study of duties and responsibilities of the licensed customs broker such as processes for customs clearance including appraiser, bonded warehouse entry, examination of goods, harmonized tariffs, fees, bonding, penalties, quotas, immediate delivery, consumption, and liquidation, computerized systems, laws and regulations. (3:3-0)

IBUS 2366 Field Experience-International Business
This course offers practical general training and experiences in the workplace. The College with the employer develops and documents an individualized plan for the student. The plan relates to the workplace training and experiences to the student’s general and technical course of study. The guided external experiences may be paid or unpaid. Prerequisites: 12 credit hours from IBUS courses; IBUS 1301, IBUS 1302, IBUS 1305, IBUS 2341, IBUS 2345, and 12 credit hours from the following: HRPO 1311, BUSI 2301, MRKG 1311, BUSI 1311, BMGT 1313, ITSC 1309; a GPA of at least 2.0 on prerequisite courses; an interview with department chair and approval by instructor are required 60 days prior to enrolling. (3:0-21)

IBUS 2367 Practicum - Field Experience
This course provides general practicum training and field experience in the workplace emphasizing key components of international business, including human resources, management, organizational structure, import and export procedures, and compliance issues. Prerequisites: IBUS 2366 and Reading level 4 (3:0-21)

LMGT 1319 Introduction to Business Logistics
This course is a systems approach to managing activities associated with traffic transportation, inventory management and control, warehouse, packaging, order processing, and materials handling. Prerequisite: Reading level 4 (3:3-0)

LMGT 1325 Warehouse and Distribution Center Management
This course emphasizes physical distribution and total supply chain management. It includes warehouse operations management, hardware and software operations, bar codes, organization effectiveness, just-in-time manufacturing, continuous replenishment, and third-party issues. Prerequisite: Reading level 4 (3:3-0)

LMGT 1345 Economics of Transportation and Distribution
This is a study of the basic economic principles and concepts applicable to transportation and distribution. Prerequisite: Reading level 4 (3:3-0)

MART 1471 Introduction to Ships and Shipping
This is an introduction to the maritime industry and ships used in the transportation of goods and services. Shipboard nomenclature, types and missions of merchant ships, shipbuilding, shipbuilding materials and methods, modes of cargo handling and their impact on ship design. Prerequisite: Reading level 4 (4:3-2)

Journalism
(See Communications)

Legal Assistant
(See Paralegal)

Long Term Care

LTCA 1313 Organization and Management of Long Term Care Facilities
This is an overview of the functional organizational structures common to long term health care facilities. It includes an examination of the departments in long-term care facilities, chain of command, personnel, regulatory requirements, quality indicators, and the role of the long term care administrator. (3:3-0)

LTCA 1314 Long Term Care Law
This is an examination of the types and sources of law relating to the long-term care industry. A study of federal, state, and local statutes and regulations affecting the long-term care industry is covered. (3:3-0)

LTCA 2315 Financial Management of Long Term Care Facilities
This is a study of techniques and strategies for gathering and using financial information to make decisions in the long-term care facility and includes an examination of budget processes, accounting principles, financial statements, and inventory controls. Topics include the special accounting requirements of Medicare, Medicaid, and other third-party payment systems. (3:3-0)

LTCA 1313 Organization and Management of Long Term Care Facilities
This is an overview of the functional organizational structures common to long-term care facilities. It includes an examination of the departments in long-term care facilities, chain of command, personnel, regulatory requirements, quality indicators, and the role of the long-term care administrator. (3:3-0)

LTCA 2388 Internship
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer. (3:0-18)

LTCA 2488 Internship-Health Care Facilities Administration/Management
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer. (3:0-22)

LTCA 2489 Internship-Health Care Facilities Administration/Management
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer. (3:0-23)

LTCA 2688 Internship/Long Term Care
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer. This course may be repeated if topics or learning outcomes vary. Prerequisite: Six (6) hours of management courses (6:0-32)
Course Descriptions

**Massage Therapy**

**MSSG 1105 Hydrotherapy**
This course is a study of the use of accepted hydrotherapy and holistic health care modalities of external application of temperature for its reflexive effect. It meets the minimum 20 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 32 contact hours (1:1-1)

**MSSG 1109 Health and Hygiene**
This course is the study of safety and sanitation practices including universal precautions. The importance of proper body mechanics, maintaining a healthy lifestyle, maintaining the massage environment, and the advantage of therapeutic relationships is also included. It meets the minimum 20 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 32 contact hours (1:1-1)

**MSSG 1207 Business Practices and Professional Ethics**
This course is a study of physical and financial office practices and marketing. It includes ethical practices for massage therapists as established by law or regulatory agency. It meets the minimum 45 contact hours requirement of licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 48 contact hours (2:2-1)

**MSSG 1411 Massage Therapy Fundamentals I**
This course is an introduction to the theory and the application of skills necessary to perform Swedish massage to meet the minimum 125 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 128 contact hours (4:2-6)

**MSSG 1413 Anatomy and Physiology for Massage**
This course offers an in-depth coverage of the structure and function of the human body. It includes cell structure and function, tissues, body organization, and the integumentary, skeletal, muscular, and nervous, and endocrine systems, and emphasizes homeostasis/wellness care. It meets the minimum 75 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 80 contact hours (4:3-2)

**MSSG 2101 Chair Massage**
This course provides therapy and practice of chair massage using proper techniques for a variety of settings. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 16 contact hours (1:1-1)

**MSSG 2186 Internship-Massage Therapy/Therapeutic Massage**
This is a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the College and the employer, taken in the last 250 hours of instruction, limited to 50 total hours by the Massage Therapy Board. (The student would stop at 50 total hours of massage.) Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 64 contact hours (1:0-4)

**MSSG 2311 Massage Therapy Fundamentals II**
This course is a continuation of Massage Therapy Fundamentals I, emphasizing specialized techniques and assessment of client needs to identify a specific plan of care. It completes the requirements for Massage Techniques for Licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 96 contact hours (3:1-5)

**MSSG 2314 Pathology for Massage**
This course covers general discussion of pathologies as they relate to massage therapy. Includes universal precautions and their management in professional practice. It also covers etiology, signs, symptoms, and the physiological and psychological reactions to disease and injury. It meets the minimum 40 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 48 contact hours (3:0-3)

**MSSG 2413 Kinesiology for Massage**
This course focuses on applied study of kinesiology. Muscle movements and dysfunctions will be discussed and palpated. It includes theory and practice of functional muscle testing. It meets the minimum 50 contact hour requirement for licensure. Prerequisites and/or co-requisites: Reading level 4 and courses taken in level sequence order or department chair approval, 64 contact hours (4:4-0)

**Mathematics**

**MATH 0303 Basic Mathematics**
This is a pre-algebra course which integrates the study of integers, fractions, decimals, percents, ratio and proportion with basic algebra. Additional topics covered include: measurement, estimation, elementary statistics, reasoning skills, number relationships, order of operations, and basic geometry. The emphasis in all topics is on their application to real life situations. This course is not applicable toward any degree. Prerequisite: Math level 1 (3:2-2)

**MATH 0304 Pre-Algebra**
This is a pre-algebra course which integrates the study of integers, fractions, decimals, percents, ratio and proportion with basic algebra. Additional topics covered include: measurement, estimation, elementary statistics, reasoning skills, number relationships, order of operations, and basic geometry. The emphasis in all topics is on their application to real life situations. This course is not applicable toward any degree. Prerequisite: Math level 1 (3:3-1)

**MATH 0305 Introductory Algebra**
This course is a study of the basic algebra of solving and graphing linear equations, inequalities, and systems. Other topics include formulas, literal equations, polynomials, integral exponents, factoring, basic operations of radicals and rational expressions. Algebraic and basic geometric applications are included. This course promotes critical thinking and problem solving techniques. This course is not applicable toward any degree. Prerequisite: a grade of C or better in MATH 0304 or Math level 1 (3:3-0)
**Course Descriptions**

**MATH 0306 Intermediate Algebra**
This course is a study of intermediate algebra including sets, variation, polynomials, exponents, radicals, and functions. Studies of quadratic and rational equations and inequalities, as well as graphs of quadratics and other nonlinear equations and inequalities are also included. The course emphasizes applications in both single- and multi-step real world problems. This course is not applicable toward any degree. Prerequisite: a grade of C or better in MATH 0305 or math score within defined range (3:3-0)

**MATH 1314 College Algebra**
This course covers the following topics: algebraic skills, problem solving/applications, equations and inequalities, graphing, relations and functions (including exponential and logarithmic), systems of equations, and matrices. Prerequisite: a grade of C or better in MATH 0306 or math score within defined range (3:3-0)

**MATH 1316 College Trigonometry**
This course covers circular functions, identities, trigonometric equations, inverse functions, solution of triangles, graphing, polar coordinates, and complex numbers. Prerequisite: MATH 1314 or approval by department chair (3:3-0)

**MATH 1324 Finite Mathematics**
This course covers logic, sets, counting, probability, statistics, relations, functions, linear inequalities, matrices, introduction to linear programming and applications. Prerequisite: MATH 1314 or approval by department chair (3:3-0)

**MATH 1325 Calculus with Applications**
This is an introduction to special concepts and techniques of calculus which are of particular importance in the social and business sciences as well as technical fields. Topics covered will include differentiation, integration, applications, sequences and series, concepts of limits, continuity, and maximum and minimum of functions. Prerequisite: MATH 1314 or approval by department chair (3:3-0)

**MATH 1332 College Mathematics for Liberal Arts**
This course provides a broad background in the principles of mathematics necessary for understanding and appreciating topics found in other curricula. Topics include: mathematical models using polynomial, exponential and logarithmic functions; matrices; probability and statistics; logic; geometry; and mathematics of finance. Prerequisites: a grade of C or better in MATH 0306 or math score within defined range (3:3-0)

**MATH 1333 Contemporary Mathematics for Technical Programs**
This course provides a broad background in principles and applications of mathematics found in many technical and vocational degree programs. Topics may include: a survey of equations (linear, quadratic, rational, exponential and logarithmic); geometry; trigonometry; relations and functions; statistics; matrices; and select applications. This course will satisfy the math requirement of the Associate of Applied Science degree, but does not satisfy the math requirement of the associate of arts, associate of science, or associate of arts in teaching degree. Prerequisite: a grade of C or better in MATH 0305 or Math level 7 (3:3-0)

**MATH 1342 Statistics**
This is an introduction to the use of statistics in business and computer science. Topics include descriptive statistics, probability distributions, estimation, statistical tests, and analysis of variance (ANOVA). Additional topics selected from regression and correlation, and non-parametric statistical methods. Prerequisite: MATH 1314 (3:3-0)

**MATH 1350 Fundamentals of Mathematics I**
This course focuses on concepts of sets, functions, numeration systems, number theory, and properties of the natural numbers, integers, rational, and real number systems with an emphasis on problem solving and critical thinking. This course is designed specifically for students who seek EC-8 teacher certification. Prerequisites: MATH 1314 (3:3-0)

**MATH 1351 Fundamentals of Mathematics II**
This course focuses on concepts of geometry, probability, and statistics, as well as applications of the algebraic properties of real numbers to concepts of measurement, with an emphasis on problem solving and critical thinking. This course is designed specifically for students who seek EC-8 teacher certification. Prerequisite: MATH 1314 or approval by department chair (3:3-0)

**MATH 2312 Pre-calculus**
This course covers applications of algebra and trigonometry to the study of elementary functions and their graphs including polynomial, rational, exponential, logarithmic, and trigonometric functions. It also includes topics from analytic geometry such as graphs of conic sections. Prerequisites: MATH 1314, co-requisite: MATH 1316 (3:3-0)

**MATH 2318 Linear Algebra**
This introductory course covers concepts of finite dimensional vector spaces, linear independence and bases, linear transformations, matrices, determinants, real quadratic forms, eigenvalues and eigenvectors, as well as models and applications of these concepts. Prerequisite: MATH 2413 (3:3-0)

**MATH 2320 Differential Equations**
This course focuses on differential equations of the first order, linear differential equations, Laplace transforms, existence theorems, nonlinear equations, solution by series, numerical solutions and applications. Prerequisite: MATH 2414 (3:3-0)

**MATH 2413 Calculus I**
This course covers limits, continuity, differentiation of algebraic, trigonometric and transcendental functions, with applications such as maximum/minimum problems and curve sketching; definite and indefinite integration of algebraic, trigonometric and transcendental functions with applications such as area under a curve. Prerequisite: MATH 2312 or approval by department chair (4:4-0)

**MATH 2414 Calculus II**
This course covers integration techniques and applications of integration; indeterminate forms; improper integrals; infinite and power series; parametric equations; and polar coordinates. Prerequisite: MATH 2312 and 2413 (4:4-0)

**MATH 2415 Calculus III**
This course covers differentiation of functions of several variables; multiple integration; and vector analysis. Prerequisite: MATH 2414 (4:4-0)

**Medical Assisting**

**MDCA 1254 Certified Medical Assisting Exam Review**
This is a preparation for the Certified Medical Assisting Exam, including a review of all three components of the CMA exam. It presents an explanation of how the exam is scored and provides opportunities to take practice exams. Prerequisite: Reading level 4 (2:1-2)

**MDCA 1343 Medical Insurance**
This course emphasizes accurate ICD-9 and CPT coding of office procedures for payment/reimbursement by a patient or third party. Additional topics may include managed care or medical economics. Prerequisites: Reading level 4 (3:2-2)
Medical Imaging Technology

MDCA 1348 Pharmacology and Administration of Medications
This course covers application of pharmacological principles, and focuses on drug classifications, principles and procedures of medication administration, mathematical systems and conversions, calculation of drug problems, and medico-legal responsibilities of the medical assistant. Prerequisite: Reading level 4 (3:2-2)

MDCA 1371 Medical Assistant Interpersonal and Communication Skills
This course covers basic psychological principles and the study of behavior, as they apply to special populations. This course includes such topics as developmental stages of the life cycle, principles of listening, therapeutic, verbal and non-verbal communication skills as they relate to the medical assistant role. Prerequisite: Reading level 4 (3:3-0)

MDCA 1417 Procedures in a Clinical Setting
This course emphasizes patient-centered assessment, examination, intervention, and treatment as directed by physicians. It includes vital signs, collection and documentation of patient information, asepsis, minor surgical procedures, and other treatments as appropriate for the medical office. Prerequisites: Reading level 4, MDCA 1421 (4:3-3)

MDCA 1421 Administrative Procedures
This course focuses on medical office procedures including appointment scheduling, medical records creation and maintenance, phone communications, financial process, coding, billing, collecting, third party reimbursement, credit arrangements, and computer use in the medical office. Prerequisite: Reading level 4 (4:2-6)

MDCA 1560 Clinical
This is a basic, intermediate, or advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. It includes practical experiences simultaneously related to theory. Close and/or direct supervision is provided by the clinical profession (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: MDCA 1221 and MDCA 1417, Reading level 4 (5:0-15)

Medical Imaging Technology

CTMT 2332 Principles of Computed Tomography
This is an introduction to the concepts and physical principles employed in computer tomography, this course emphasizes interactions between X-rays and matter and concepts of radiation detectors and digital imaging. Current knowledge and theory of the biological effects of X-rays is explored with an emphasis on how they relate to data acquisition, image production, and control and manipulation of image production. Included also are quality control issues and factors involved in purchasing decisions. Prerequisite: ARRT certified or registry eligible (3:3-0)

CTMT 2336 Computed Tomography Equipment and Methodology
This is a study of the actual operation and operational control of computed tomographic equipment, this course focuses on routine protocols, image quality, and quality control of computed tomography. Theory and application of computed tomographic equipment and the principles of patient imaging techniques utilizing the equipment are covered. Prerequisites: RADR 2340, CTMT 2332 (3:3-0)

CTMT 2360 Clinical 1-Computed Tomography Technology/Technician
This is an advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional in a clinical setting. Prerequisites: RADR 2340, CTMT 2332 (3:0-15)

CTMT 2361 Clinical 2-Computed Tomography Technology/Technician
This is a continuation of CTMT 2360. It also provides an advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional in clinical setting. Prerequisites: CTMT 2360, CTMT 2336 (3:0-15)

DMSO 1210 Introduction to Sonography
This is an introduction to the profession of sonography and the role of the sonographer. It emphasizes medical terminology, ethical/legal aspects, written and verbal communication, and professional issues relating to registry, accreditation, professional organizations and history of the profession. Prerequisites: acceptance into the ultrasound program (2:2-0)

DMSO 1260 Clinical I - Diagnostic Medical Sonography
This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisites: acceptance into the ultrasound program (2:0-12)

DMSO 1302 Basic Ultrasound Physics
This course covers basic acoustical physics and acoustical waves in human tissue. This covers ultrasound transmission in soft tissues, attenuation of sound energy, parameters affecting sound transmission, and resolution of sound beams. Prerequisites: acceptance into the ultrasound program (3:3-1)

MRIT 2330 Principles of Magnetic Resonance Imaging
This course builds a foundation of general principles for learning to operate a magnetic resonance imager. It focuses on building a sound understanding of the underlying scientific theory and routine clinical practice leading to magnetic resonance imaging. It emphasizes fundamental principles of magnetism and interactions of living matter with magnetic fields, as well as introducing the concepts and scientific principles employed in magnetic resonance imaging. Prerequisite: ARRT certified or registry eligible (3:3-0)

MRIT 2334 Magnetic Resonance Equipment and Methodology
This course is a study of the actual operation and operational control of magnetic resonance imaging equipment. It emphasizes theory and application of that theory using magnetic resonance imaging equipment and the principles of patient imaging techniques. Prerequisites: RADR 2340, MRIT 2330 (3:3-0)
MRIT 2360 Clinical 1-Magnetic Resonance Imaging Technology/Technician
This course is an advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional in a clinical setting. Prerequisite: RADR 2340, MRIT 2330 (3:0-18)

MRIT 2361 Clinical 2-Magnetic Resonance Imaging Technology/Technician
A continuation of MRIT 2360, this course is also advanced professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional in a clinical setting. Prerequisite: MRIT 2360 and MRIT 2334 (3:0-18)

RADR 1260 Clinical-Medical Radiologic Technician
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is an introduction to the clinical environment with specific tasks to be accomplished during the semester enrolled. On site clinical instruction, supervision, evaluation, and placement is the responsibility of college faculty. Prerequisite: acceptance into the medical imaging/radiography program (2:0-8)

RADR 1309 Introduction to Radiography and Patient Care
This course includes the historical development of radiography, basic radiation protection, an introduction to medical terminology, ethical and legal issues for health care professionals, an orientation to the program and to the health care system, patient assessment, infection control procedures, communication, and patient interaction skills, and basic pharmacology are also included. Prerequisite: acceptance into the medical imaging/radiography program (3:3-0)

RADR 1313 Principles of Radiographic Imaging I
This course will analyze radiographic image qualities and the effects of exposure variables upon each image quality. Prerequisite: acceptance into medical imaging technology/radiography program (3:3-1)

RADR 1317 Radiographic Anatomy and Physiology I
This course develops the student’s ability to relate basic human anatomy and physiology to the image. The localization and intensification of human anatomy on the radiographic image is emphasized. Prerequisite: acceptance into medical imaging/radiography program (3:3-1)

RADR 1318 Radiographic Anatomy and Physiology II
This course develops the student’s ability to relate comprehensive human anatomy and physiology to the image. The advanced localization and intensification of human anatomy on the radiographic image is emphasized. Prerequisites: RADR 1260, RADR 1309, RADR 1313, RADR 1317, RADR 1411 (3:3-1)

RADR 1360 Clinical-Medical Radiologic Tech II
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is a continuation of the clinical environment with specific tasks to be accomplished during the semester enrolled. Radiographic positioning and exposure will be emphasized during evaluation of examinations done by students. On site clinical instruction, supervision, evaluation, and placement is the responsibility of the College faculty. Prerequisites: RADR 126, RADR 1309, RADR 1313, RADR 1317, RADR 1411 (3:0-16)

RADR 1411 Basic Radiographic Procedures
This course includes an introduction to radiographic positioning terminology, the proper manipulation of equipment, positioning and alignment of the anatomical structure, and equipment, and evaluation of images for proper demonstration of basic anatomy and related pathology. Prerequisite: acceptance into the medical imaging technology/radiography program (4:3-3)

RADR 2117 Radiographic Pathology
This is an overview of the disease process and common diseases and their appearance on medical images. Prerequisites: RADR 2213 and RADR 2362 (1:1-0)

RADR 2213 Radiation Biological Effects and Protection
This course includes a study of the effects of radiation on biological systems, typical medical exposure levels, methods for measuring and monitoring radiation, and methods for protecting personnel and patients from excessive exposure. Prerequisites: RADR 2309, RADR 2333, and RADR 2361 (2:2-1)

RADR 2305 Principles of Radiographic Imaging II
This is a continuation of the study of radiographic imaging technique formulation, image quality assurance, and the synthesis of all variables in image production. Prerequisites: RADR 1260, RADR 1309, RADR 1313, RADR 1317, RADR 1411 (3:3-1)

RADR 2309 Radiographic Imaging Equipment
This course covers a study of the equipment and physics of X-ray production, basic X-ray circuits, basic electricity, magnetism, and interactions between X-rays and matter. Prerequisites: RADR 1360 and RADR 2305 (3:3-0)

RADR 2333 Advanced Medical Imaging
This is an introduction to the use of computers in medical imaging and a survey of specialized imaging modalities. Prerequisites: RADR 2360, RADR 2309 (3:3-0)

RADR 2335 Radiologic Technology Seminar
This is a capstone course focusing on the synthesis of professional knowledge, skills, and attitudes in preparation for employment and lifelong learning. Prerequisites: RADR 2213 and 2362 (3:3-0)

RADR 2340 Sectional Anatomy for Medical Imaging
This course presents an in-depth coverage of anatomic relationships that are present under various sectional orientations as depicted by computed tomography or magnetic resonance imaging. Prerequisite: ARRT registry eligible or certified in radiology (3:3-0)

RADR 2360 Clinical-Medical Radiologic Tech III
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is a continuation of the clinical environment with specific tasks to be accomplished during the semester enrolled. Radiographic positioning and exposure will be emphasized during evaluation of examinations done by students. On site clinical instruction, supervision, evaluation, and placement is the responsibility of College faculty. Prerequisites: RADR 1360, RADR 1318, RADR 2305, RADR 2401 (3:0-18)
Course Descriptions

RADR 2361 Clinical-Medical Radiologic Tech IV
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is a continuation of the clinical environment with specific tasks to be accomplished during the semester enrolled. Radiographic positioning and exposure will be emphasized during evaluation of examinations done by students. On site clinical instruction, supervision, evaluation, and placement is the responsibility of College faculty. Prerequisites: RADR 2309, RADR 2360 (3:0-18)

RADR 2362 Clinical-Medical Radiologic Tech V
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is a continuation of the clinical environment with specific tasks to be accomplished during the semester enrolled. Radiographic positioning and exposure will be emphasized during evaluation of examinations done by students. On site clinical instruction, supervision, evaluation, and placement is the responsibility of College faculty. Prerequisites: RADR 2333, RADR 2361 (3:0-18)

RADR 2363 Clinical-Medical Radiologic Tech VI
This is a method of instruction providing detailed education, training, work-based experience and direct patient care, generally at a clinical site (hospital, etc.). This course is a continuation of the clinical environment with specific tasks to be accomplished during the semester enrolled. Radiographic positioning and exposure will be emphasized during evaluation of examinations done by students. On site clinical instruction, supervision, evaluation, and placement is the responsibility of College faculty. Prerequisites: RADR 2213, RADR 2362 (3:0-18)

RADR 2401 Intermediate Radiographic Procedures
This is a continuation of the study of the proper manipulation of radiographic equipment, positioning and alignment of the anatomical structure and equipment, and evaluation of images for proper demonstration of intermediate anatomy and related pathology. Prerequisites: RADR 1260, RADR 1309, RADR 1313, RADR 1317, RADR 1411 (4:3-3)

Medical Laboratory Technology

HPRS 1106 Essentials of Medical Terminology
This course is a study of medical terminology, word origin, structure and application. (1:1-0)

HPRS 1191 Special Topics in Allied Health-Clinical Lab Assistant
This course covers recently identified current events, skills, knowledge and/or attitudes and behaviors pertinent to the occupation and relevant to the professional development of the student. The student will learn to utilize critical thinking skills to evaluate relevant journal articles and case studies. Various professional organizations will be discussed. The value of continuing education and opportunities such education affords will be stressed. The student will be introduced to the computer resources available for the field. Prerequisite: HPRS 1391 (1:1-0)

HPRS 1391 Special Topics in Allied Health-Clinical Lab Assistant
This course covers recently identified current events, skills, knowledge and/or attitudes and behaviors pertinent to the occupation and relevant to the professional development of the student. The student will learn how to perform waived tests and aid the technologists in the clinical laboratory. Topics to be addressed include microbiology, hematology, serology and urinalysis, as well as specimen processing. The importance of safety and patient confidentiality will be emphasized. The student will also learn how to screen donors for blood bank donations. Prerequisite: PLAB 1223. Prerequisite or co-requisite: PLAB 1166 (3:2-2)

MLAB 1201 Introduction to Clinical Laboratory Science
This course is an introduction to clinical laboratory science including quality control, laboratory math, safety, laboratory equipment, laboratory settings, accreditation, certification, professionalism and ethics. Prerequisites: to enroll in this course, a student must have qualified to enter the medical laboratory technology program or have permission from the program director of the medical laboratory technology department. (2:2-1)

MLAB 1227 Coagulation
This is a course in coagulation theory, procedures, and practical applications. It includes quality control, quality assurance, safety and laboratory procedures which rely on commonly performed manual and/or semi-automated methods. Prerequisite: MLAB 1201 (2:2-1)

MLAB 1231 Parasitology/Mycology
This course is a study of the taxonomy, morphology, and pathogenesis of human parasites and fungi, including the practical application of laboratory procedures, quality control, quality assurance, and safety. Prerequisite or co-requisite: MLAB 2434 (2:2-1)

MLAB 1235 Immunology/Serology
This course is an introduction to the theory and application of basic immunology, including the immune response, principles of antigen-antibody reactions, and the principles of serological procedures as well as quality control, quality assurance, and safety. Prerequisite: MLAB 1201 (2:2-1)

MLAB 1311 Urinalysis and Body Fluids
This course is an introduction to the study of urine and body fluid analysis. It includes the anatomy and physiology of the kidney, physical, chemical and microscopic examination of urine, cerebrospinal fluid, and other body fluids as well as quality control, quality assurance and safety. Prerequisite: a student must enroll in the medical laboratory technology program. (3:2-2)

MLAB 1415 Hematology
This is a study of blood cells in normal and abnormal conditions. It inculdes instruction in the theory and practical application of hematology procedures, including quality control, quality assurance, safety, manual and/or automated methods as well as blood cell maturation sequences, and normal and abnormal morphology with associated diseases. Prerequisite: a student must have been accepted into the medical laboratory technology program or have permission from the department chair, MLAB 1201. (4:3-4)

MLAB 2166 Practicum I-Medical Laboratory Technician
This course covers practical general training and experiences in the workplace. The College and the employer develop and document an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. This course may be repeated if topics and learning outcomes vary. Prerequisite: MLAB 2434 (1:0-9)

MLAB 2266 Practicum II-Medical Laboratory Technician
This course covers practical general training and experiences in the workplace. The College and the employer develop and document an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. This course may be repeated if topics and learning outcomes vary. Prerequisite: MLAB 2431 (2:0-17)
MLAB 2267 Practicum III-Medical Laboratory Technician
This course covers practical general training and experiences in the workplace. The College and the employer develop and document an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. This course may be repeated if topics and learning outcomes vary. Prerequisite: MLAB 2501 (2:0-17)

MLAB 2338 Advanced Topics in Medical Laboratory Technician
This course examines the integration of all areas of the clinical laboratory and correlates laboratory test results with diagnostic applications and pathophysiology using critical thinking skills. This capstone course provides the student with the synthesis of knowledge and skills in preparation for professional employment and establishes the framework for continuous growth in the medical laboratory field. Prerequisites: MLAB 2434 and MLAB 2266 (3:3-0)

MLAB 2431 Immunohematology
This is a study of blood antigens and antibodies. It presents quality control, basic laboratory technique and safety. It includes the principles, procedures and clinical significance of test results in genetics, blood group systems, pre-transfusion testing, adverse effects of transfusions, donor selection and components, and hemolytic disease of the newborn. Prerequisite or co-requisite: MLAB 1235 (4:3-4)

MLAB 2434 Microbiology
This course covers instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, quality control, quality assurance, safety, setup, identification, susceptibility testing, and reporting results. Prerequisite: MLAB 1201 or department chair approval (4:3-4)

MLAB 2501 Chemistry
This course is an introduction to the principles and procedures of various tests performed in Clinical Chemistry. It presents the physiological basis, principle and procedure, and clinical significance of test results, including quality control and reference values. It includes basic chemical laboratory technique and safety, electrolytes, acid-base balance, proteins, carbohydrates, lipids, enzymes, endocrine function, and toxicology. Prerequisite or co-requisite: MLAB 1201 (3:3-6)

PLAB 1166 Practicum Phlebotomy
This is a practical, general workplace training supported by an individualized learning plan developed by the employer, the College and the student. Prerequisite: PLAB 1223. (1:0-8)

PLAB 1223 Phlebotomy
This course covers skill development in the performance of a variety of blood collection methods using proper techniques and standard precautions. It includes vacuum collection devices, syringes, capillary skin puncture, butterfly needles and blood culture, and specimen collection on adults, children, and infants. It covers infection prevention, patient identification, specimen labeling, quality assurance, specimen handling, processing, accessioning, professionalism, ethics, and medical terminology. (2:2-1)

SCIT 1495 Special Topics in Analytical Chemistry
This course covers recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. It introduces basic chemistry principles such as the periodic classification of elements, structure of matter, chemical bonding, formulas and chemical reactions. It presents properties of acids and bases and their application in the clinical setting, and it also includes a brief introduction to organic chemistry, structures of carbohydrates, lipids and proteins. It relates topics to their significance in the performance of laboratory testing as well as human health and body function. Prerequisite: MLAB 1201 (4:4-0)

Mental Health Services

CMSW 1341 Behavior Modification and Cognitive Disorder
This is an in-depth study of the theories and principles of behavioral science and skill development in the methods of modifying and controlling behavior in clinical and personal settings. It covers techniques such as managing self-behavior. Topics include stimulus controls, shaping, relaxation training, reinforcement scheduling and token economics. It covers basic understanding of psychosomatic drugs and their effects on behavior in both treatment and recovery. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

DAAC 1304 Pharmacology of Addiction
This course covers psychological, physiological, and sociological effects of mood altering substances and behaviors, emphasizing pharmaceutical effects of tolerance, dependency/withdrawal, cross addiction, and drug interaction. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

DAAC 1311 Counseling Theories
This course covers major theories and current treatment modalities. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

DAAC 2307 Addicted Family Intervention
This course covers the family as a dynamics system focusing on the effects of addiction on family roles, rules, and behavior patterns. It includes the effects of mood altering substances, behaviors, and therapeutic alternatives as they relate to the family from a multicultural and transgenerational perspective. Prerequisite: DAAC 1304 (3:3-0)

DAAC 2341 Counseling Alcohol and Other Drug Addictions
This course focuses on special skills and techniques in the application of counseling skills for the Alcohol and Other Drug (AOD) client. It covers development and utilization of advanced treatment planning and management. It includes review of confidentiality and ethical issues. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

DAAC 2366 Practicum - Substance Abuse/Addiction Counseling
This course is a practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. Prerequisites: must complete 28 hours in the program before the practicum (3:0-21)

PMHS 2366 Practicum-Mental Health Services Technician
This course is a practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. This technical course satisfies a requirement for the Mental Health Technician Certificate of Technology and Mental Health Clinical Counseling and Psychology Associate of Applied Science, but does not satisfy a psychology requirement for the associate of arts, associate of science or associate of arts in teaching degree. Prerequisites: must complete 28 hours in the program before the practicum (3:0-21)

PSYT 1371 Mental Health Legal and Ethical Issues
This course covers concepts of confidentiality, ethics, mental health legislation, regulation relating to the maintenance and use of mental health and substance abuse information and mental records. Prerequisites: Reading level 6, Writing level 6 (3:3-0)
PSYT 1471 Basic Nursing Skills
This course is a mastery of entry level nursing skills and competencies for a variety of health care settings. It utilizes the nursing process as the foundation for all nursing interventions specific to mental health/psychiatric facilities. Prerequisites: Reading level 6 and Writing level 6 (4:2-4)

PSYT 2301 Psychology of Group Dynamics
This is a study of the patterns and dynamics of group interactions. Topics include a psychosocial approach to group behavior, structure, types, stages, roles, leadership of group activities, and facilitation. This technical course satisfies a requirement for the Mental Health Technician Certificate of Technology and Mental Health Clinical Counseling and Psychology Associate of Applied Science, but does not satisfy a psychology requirement for the associate of arts, associate of science or associate of arts in teaching degree. Prerequisite: PSYC 2301 (3:3-0)

PSYT 2321 Crisis Intervention
This is a study of the principles and theories of assisting the individual in a crisis situation. Topics include coping skills to increase potential restoration of equilibrium to an individual's lifestyle and suicide prevention. Prerequisite: PSYC 2301 (3:3-0)

PSYT 2331 Abnormal Psychology
This is a study of the theories and processes involved in the diagnosis and treatment of mental disorders. Prerequisite: PSYC 2301 (3:3-0)

PSYT 2339 Counseling Theories
This is an examination of major theories of various treatment modalities. Topics include reality therapy, psychodynamics, grief therapy, person-centered therapy, rational emotive therapy, and cognitive behavioral approaches. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

SOCW 2361 Introduction to Social Work
This is a study of the development of the philosophy and practice of social work in the United States, survey of the fields and techniques of social work, practice, ethics, and values, roles and responsibilities and various fields of social work practice. This course also includes a 40-hour integrated agency-related volunteer experience. Prerequisites: Reading level 6, Writing level 6 (3:3-0)

Mexican American Studies

HUMA 1305 Intro Mexican-American Studies
This is an introduction to the Mexican-American/Chicano culture, from its inception to the present. This is an interdisciplinary survey designed to introduce students to the salient cultural, economic, educational, historical, political, and social aspects of the Mexican-American/Chicano experience. Prerequisites: Reading level 6 and Writing level 6 (3:3-0)

HUMA 1311 Mexican-American Art Appreciation
This course is an examination of Mexican-American/Chicano artistic expressions in the visual and performing arts. Prerequisite: Reading level 6 (3:3-0)

Military Science

AFSC 1201 Foundations of United States Air Force I
This course introduces the concept of war and the role the Air Force plays. Students will learn about the career opportunities available, benefits afforded an Air Force member, and develop productive life skills. Basic oral and written communication skills will be demonstrated. Course focus is on developing basic knowledge and comprehension of Air Force leadership dimensions, while gaining a big picture understanding of ROTC course, its purpose in the Air Force and its advantages for the student. (2:1-2)

AFSC 1202 Foundations of United States Air Force II
This course explores the basic verbal and written communication skills and an operational understanding of the Air Force core values. Students will learn the importance of managing diversity and the concepts and consequences of harassment. The basic concepts of Air Force leadership, as well as, the concept of effective team building will be developed. Case studies will provide a tangible context for learning the Soldier's Creed and Warrior Ethos as they apply in the contemporary operating environment. (2:1-2)

AFSC 2201 The Evolution of USAF Air and Space Power I
This course covers key historical events and milestones in the development of air power as a primary instrument of United States national security. Students will learn core values and competencies of leaders in the United States Air Force and tenets of leadership and ethics. (2:1-2)

AFSC 2202 The Evolution of USAF Air and Space Power II
The course overviews the key terms and definitions used to describe air and space power. Students will know the milestone and historical events, leaders, and technological advancements which surround the evolution and employment of USAF air and space power. Basic verbal and written communication skills along with an operational understanding of Air Force Core Values and ethics will be demonstrated. (2:1-2)

MSCI 1125 Physical Readiness Training
This is a physical conditioning class designed to promote high levels of performance on the Army Physical Fitness Test (APFT), and to improve the health, endurance, and strength of the body. This course satisfies the physical education requirement and may be repeated. This course prepares each cadet for the APFT consisting of 2 minutes of push-ups, 2 minutes of sit-ups, as well as the two mile run. This class, given by the Military Science Department, uses Army techniques and guidelines during each session. (1:0-1)

MSCI 1126 Physical Readiness Training
This is a physical conditioning class designed to promote high levels of performance on the Army Physical Fitness Test (APFT), and to improve the health, endurance, and strength of the body. This course satisfies the physical education requirement and may be repeated. This course prepares each cadet for the APFT consisting of 2 minutes of push-ups, 2 minutes of sit-ups, as well as the two mile run. This class, given by the Military Science Department, uses Army techniques and guidelines during each session. (1:0-1)
MSCI 1131 Advanced Physical Fitness Course
This is a senior level ROTC physical conditioning class designed to promote high levels of performance on the Army Physical Fitness Test (APFT), and to promote the health, endurance, and strength of the body. Emphasis is placed on implementation of the Army’s physical fitness program through lecture and practical exercise. Students will also become familiar with Army height, weight, and body fat standards. Participate in three assessment sessions to track individual improvement and participate as leaders in the conduct of the physical training session in the vicinity of SJCD area. Prerequisite or corequisite: MSCI 1125 (1:0-1)

MSCI 1210 Introduction to ROTC
This course explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership framework. Aspects of personal motivation and team building are practiced planning, executing, and assessing team exercises. While participation in the leadership labs is not mandatory during the MSL II year, significant experience can be gained in a multitude of areas and participation in the labs is highly encouraged. The focus continues to build on developing knowledge of the leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation and squad tactics. Case studies will provide a tangible context for learning the Soldier’s Creed and Warrior Ethos as they apply in the contemporary operating environment. (2:1-2)

MSCI 1220 Introduction to Leadership
This course introduces you to the personal challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as goal setting, time management, physical fitness, and stress management relate to leadership, officership, and the Army profession. The focus is on developing basic knowledge and comprehension of Army leadership dimensions, attributes and core leader competencies while gaining a big picture understanding of the ROTC program, its purpose in the Army, and its advantages for the student. (2:1-2)

MSCI 2220 Military Leadership Development Cr. 2
This course focuses on characteristics of leadership, problem analysis, decision making, oral presentations, first aid, small unit tactics, land navigation, basic radio communication, marksmanship, fitness training, and rappelling. Fitness training required two times per week in addition to class and lab. (2:2-2)

MSCI 2820 Basic Camp Cr. 8
Students will not receive credit for both basic course work and Basic Camp. It includes six week off-campus field training practice and introduces students to the Army and leadership. Prerequisite: students approval of the department chair. No military obligation is associated with this course.

Music

Musical Organizations

MUEN 1121 Instrumental Ensemble
Membership is open to all students on the basis of audition and/or conference. Instruments may include all orchestras instruments. The instrumental ensemble meets three laboratory hours per week with special rehearsals called as needed. The course may be taken a maximum of six times for credit. (1:0-3)

MUEN 1122 Concert Band
Membership is open to all students on the basis of the audition and/or conference. Performance literature represents many styles of music. Concert band meets three hours per week, with special rehearsals called as needed. This course may be repeated a maximum of six times for credit. (1:0-3)

MUEN 1124 Wind Ensemble
Membership is open to all students on the basis of the audition and/or conference. Performance literature represents many styles of music, making Wind Ensemble interesting and enjoyable. The Wind Ensemble meets three hours per week, with special rehearsals called as needed. This course may be repeated a maximum of six times for credit. (1:0-3)

MUEN 1125 Jazz Ensemble
Membership is open to all students on the basis of audition and/or conference. Instruments in the Jazz Ensemble include trumpets, trombones, saxophones, clarinets, flutes, piano, bass, guitar and drums. Performance literature represents many styles of music; big band jazz, swing, Latin jazz, and jazz rock. The Jazz Ensemble meets three hours per week with special rehearsals as needed. This course may be repeated a maximum of six times for credit. (1:0-3)

MUEN 1131 Small Instrumental Ensemble
Membership is open to all students on the basis of audition and/or conference. In the small instrumental ensemble may vary from semester to semester. The small instrumental ensemble meets three laboratory hours per week with special rehearsals called as needed. This course may be repeated a maximum of six times for credit. (1:0-3)

MUEN 1141 College Choir
Membership is open to all students on the basis of audition and/or conference. The College choir performs many styles of sacred and secular literature. This course may be repeated a maximum of six times for credit. (1:0-3)

MUEN 1143 Concert Choir
Membership is open to all students on the basis of audition. This group has a limited membership which performs serious and entertaining music throughout the semester. Students enrolled in this group are also expected to enroll in College choir. This course may be taken a maximum of six times for credit. (1:0-3)

MUEN 1154 Small Vocal Ensemble
Membership is open to all students on the basis of audition and/or conference. This group has a limited membership which performs serious and entertaining music throughout the semester. Compositions performed may include for madrigals, duets, trios, quartets, sextets, or other small vocal ensembles. Students enrolled in this course are also expected to enroll in MUEN 1141 (College choir). This course may be repeated a maximum of six times for credit. (1:0-3)

Music Courses

MUSB 1305 Survey of Music Business
This course includes an overview of the music industry including song writing, live performance, the record industry, music merchandising, contracts and licenses and career opportunities. (3:3:0)

MUSC 1323 Audio Electronics Troubleshooting
This course covers basic concepts in electricity, Ohm’s Law, circuit analysis and troubleshooting audio problems. Topics include soldering techniques, audio electronic alignment procedures for tape machines, console maintenance, and sound reinforcement equipment maintenance. (3:2-2)
MUSC 1327 Audio Engineering I
This course provides an overview of the modern recording studio and related personnel. Topics include basic studio electronics and acoustic principles, wave form and analysis, microphone concepts and mixing techniques, studio setup and signal flow, recording console theory, signal processing concepts, tape machine principles and operation, and overview of mixing and editing. (3:3-1)

MUSC 1331 Musical Instrument Digital Interface
This course provides an overview of Musical Instrument Digital Interface (MIDI) systems and applications. Topics include the history and evolution of MIDI, hardware requirements, computer numbering systems, channels and modes, the MIDI language and typical implementation of MIDI applications in the studio environment using software-based sequencers. Prerequisites: MUSI 1301, MUSI 1181 (3:2-2)

MUSC 2101 Audio Engineering Practices
This course is a practical application of the concepts, techniques and procedures presented in Audio Engineering I and Audio Engineering II. The students will be divided into several working units comprised of 3-4 students per unit. Each group will be required to complete two recording projects during the semester. It may be repeated for credit up to three times if topics and learning outcomes vary. Prerequisite: MUSC 2427 (1:0-3)

MUSC 2355 Musical Instrument Digital Interface II
This is a continuation of MIDI I with emphasis on advanced sequencer operation and SMPTE-based synchronization in the interaction of multiple recording and playback systems. Topics also include synthesis and its relation to software and hardware devices, sampling and sampling manipulation utilizing software sequencers, and sequencing for video. The student will perform advanced MIDI techniques, execute multitrack machine synchronization and demonstrate advanced use of software-based sequencing, synthesis and sampling devices. Prerequisite: MUSC 1331 (3:2-2)

MUSC 2386 Internship-Recording Arts Technology/Technician
This is a practical, general training and experience in the workplace. The College, with the employer, develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general technical course of study. The guided external experiences may be paid or unpaid. This course may be repeated if topics and learning experiences vary. Prerequisite: MUSC 2447, MUSC 2355 (3:0-18)

MUSC 2427 Audio Engineering II
This is a continuation of Audio Engineering I with emphasis on implementation of techniques and theories of the recording process. Topics include applications of microphones, the audio console, the multitrack tape recorder, and signal processing devices in the recording session environment. Prerequisite: MUSC 1327 (4:3-3)

MUSC 2447 Audio Engineering III
This course covers presentation of advanced procedures and techniques utilized in recording and manipulating audio information. Topics include advanced computer-based console automation, hard disk-based digital audio editing, nonlinear digital multitrack recording and advanced engineering projects. Prerequisites: MUSC 2427 (4:3-3)

MUSI 1110 Perspective in Jazz
This course will discuss topics related to jazz with special emphasis on its development and contribution to American culture. It is structured for the student interested in jazz music. (1:1-0)

MUSI 1159 Music Theater Production
Membership is open to all students on the basis of audition and/or conference. Students enrolled in this course will present a musical theater production at the end of this course and/or will prepare and perform quality musical theater literature. Students with leading roles also will be expected to concurrently enroll in DRAM 1120 (Rehearsal and Performance). This course may be taken a maximum of two times for credit. (1:0-4.5)

MUSI 1163 Jazz Improvisation I
This is a course designed to provide background knowledge of basic materials and skills used in improvising jazz solos. Jazz Improvisation is structured for any student with a performing medium in music. Prerequisite: knowledge of all major scales (1:1-2)

MUSI 1164 Jazz Improvisation II
This is a continuation of MUSI 1163. Prerequisite: MUSI 1163 or instructor approval (1:1-2)

MUSI 1181 Class Piano I
Beginning Class Piano equips students with little or no background in music with the basic information and techniques necessary to read and perform simple music at the keyboard. Subsequent classes build upon and refine the information and techniques. (1:1-1)

MUSI 1182 Class Piano II
This is a continuation of Class Piano I. (1:1-1)

MUSI 1183 Class Voice I
Class Voice begins with instruction in the fundamentals of correct breathing, tone production and diction. It is a course designed for students with little or no previous training to aid in developing a pleasing tone quality produced with ease and proper enunciation. Additional semesters expand and sharpen these skills in a sequential pattern. (1:1-1)

MUSI 1184 Class Voice II
This is a continuation of Class Voice I. (1:1-1)

MUSI 1186 Music Composition I
This course covers techniques of composition and arranging for various combinations of instruments and voices in differing musical procedures such as tonality, modality, atonality, serialism, pandiatonicism, etc. Prerequisites: MUSI 1301 or 1211. It may be repeated for no credit. Students must have department chair approval to enroll. (1 hour) (1:0.5-0)

MUSI 1187 Music Composition II
This is a continuation of MUSI 1186 or 1286. Prerequisites: MUSI 1186 or 1286, or consent of the department chair. It may be repeated for no credit. (1 hour) (1:0.5-0)

MUSI 1188 Class Percussion I
This course includes class instruction in the fundamental techniques of playing percussion. The course is designed for the student with little or no background in music with the basic information and techniques necessary to read and perform simple repertoire. (1:1-1)

MUSI 1192 Class Guitar I
Beginning Class Guitar is intended to develop student skills in applied music theory, sight-reading, performance and technique on the instrument. The course is for beginner to intermediate level students with limited experience. (1:1-1)

MUSI 1193 Class Guitar II
This is a continuation of Class Guitar I. (1:1-1)

MUSI 1211 Theory of Music I
This is a study of the fundamentals of musicianship, including aspects of notation and part-writing. Prerequisites: approval of the instructor and concurrent enrollment in appropriate ear training course and piano, unless waiver is granted by instructor. (2:3-0)
Course Descriptions

MUSI 1212 Theory of Music II
This is a continuation of MUSI 1211. Prerequisite: MUSI 1211 or instructor approval and concurrent enrollment in ear training course and piano. (2:3-0)

MUSI 1216 Ear Training and Sight Singing I
This course provides basic aural, visual and vocal experience in the form of dictation and sight singing. Prerequisites: approval of instructor and concurrent enrollment in appropriate theory course and piano. (2:3-0)

MUSI 1217 Ear Training Sight Singing II
This is a continuation of MUSI 1216. Prerequisites: MUSI 1216 or instructor approval and concurrent enrollment in theory course and piano. (2:3-0)

MUSI 1286 Music Composition I
This course covers techniques of composition and arranging for various combinations of instruments and voices in differing musical procedures such as tonality, modality, atonality, serialism, pandiatonicism, etc. Prerequisites: MUSI 1301 or 1211, or consent of the department chair. It may be repeated for no credit. Students must have department chair approval to enroll. (2 hours.) (2:1-0)

MUSI 1287 Music Composition II
This is a continuation of MUSI 1186 or 1286. Prerequisites: MUSI 1186 or 1286, or consent of the department chair. It may be repeated for no credit. Students must have department chair approval to enroll. (2:1-0)

MUSI 1290 Electronic Music
This is an introduction to the use of synthesizers, computers, sequencing, and music printing software, multi-track recorders and other MIDI (Music Instrument Digital Interface) devices in notation, arrangement, composition, and performance of music. The course may be repeated once for credit. Prerequisite: MUSI 1301, class or applied piano, or instructor approval. (2:1-2)

MUSI 1301 Music Fundamentals
This course is designed to familiarize students with the meaning of musical notation through the study of scales, chords and rhythm. It is especially adapted for students preparing to become teachers, and other students who wish to gain a broader knowledge of music. (3:3-0)

MUSI 1306 Listening to Music
This course offers a non-technical approach to the enjoyment of music. Emphasis is on an intelligent listening procedure with materials from standard vocal, instrumental and keyboard literature. (3:3-0)

MUSI 1307 Survey of Music Literature
This is a course for music majors on the fundamentals of music terminology and standard instrumental and vocal forms. Representative composers and compositions from secular and sacred music of the major eras are studied by means of records and live performance. Prerequisites: Reading level 6 (3:3-0)

MUSI 1310 American Popular Music
This is a study of the evolution of popular American music styles which have proven to be a powerful reflection of American culture. The course will provide a survey of music created, performed, and reflective of a unique American style including: Jazz, Ragtime, New Orleans style, swing and subsequent jazz styles, American folk and popular music, the American musical theater, and rock and roll. (3:3-0)

MUSI 2181 Class Piano III
This is a continuation of Class Piano II. (1:1-1)

MUSI 2182 Class Piano IV
This is a continuation of Class Piano III. (1:1-1)

MUSI 2183 Class Voice III
This is a continuation of Class Voice II. (1:1-1)

MUSI 2184 Class Voice IV
This is a continuation of Class Voice III. (1:1-1)

MUSI 2186 Music Composition III
This is the third semester of compositional studies in the sequence. Prerequisites: MUSI 1187 or 1287, or consent of the department chair. It may be repeated for no credit. Students must have department chair approval to enroll. (1 hour.) (1:0.5-0)

MUSI 2187 Music Composition IV
This is the fourth semester of compositional studies in the sequence. Prerequisites: MUSI 2186 or 2286, or consent of the department chair. It may be repeated for no credit. Students must have department chair approval to enroll. (1 hour.) (1:0.5-0)

MUSI 2211 Theory of Music III
This is a continuation of the first-year theory course. It includes written and keyboard harmonic analysis. Prerequisites: MUSI 1212 or approval of the instructor, and concurrent enrollment in ear training course and piano. (2:3-0)

MUSI 2212 Theory of Music IV
This is a continuation of MUSI 2211. Prerequisites: MUSI 2211 and concurrent enrollment in ear training course and piano. (2:3-0)

MUSI 2216 Ear Training and Sight Singing III
This is a continuation of the first-year course in Ear Training and Sight Singing. Prerequisite: MUSI 1217, co-requisite: concurrent enrollment in appropriate theory course and piano. (2:3-0)

MUSI 2217 Ear Training and Sight Singing IV
This is a continuation of MUSI 2216. Prerequisite: MUSI 2216, co-requisite: concurrent enrollment in appropriate theory course and piano (2:3-0)

MUSI 2286 Composition III
This is the third semester of compositional studies in the sequence. Prerequisites: MUSI 1187 or 1287, or consent of the department chair, may be repeated for no credit. (2 hours.) (2:1-0)

Applied Music - Private Lessons

Private instruction on instruments and in voice is available to students majoring or minoring in music and to other students who desire to gain or improve proficiency in voice or an instrument. Private lessons are offered for one credit hour at the beginning level or two-credit hours at secondary-level or concentration-level. Students are assigned private lessons on the basis of audition and/or counseling by the music faculty. One-credit-hour private lessons meet for one-half hour per week; two-credit-hour private lessons meet for one hour per week. A maximum of 20 credit hours in applied music (all private lessons) may be applied toward a degree. A music major who is not concentrating (or majoring) in piano should enroll in class piano or in a secondary-level piano course, unless the student passes a keyboard barrier exam. Private instruction is available in voice, piano, organ, flute, oboe, clarinet, bassoon, saxophone, French horn, trumpet, baritone, trombone, tube and percussion instruments.

Private instruction in guitar, violin, viola, and string bass is also available. Courses involving private instruction in applied music have certain minimum weekly practice time requirements. For information concerning these requirements, contact the appropriate department chair.
Non-Destructive Testing Technology

METL 1313 Introduction to Corrosion
This course provides an introduction to internal, external, and atmospheric corrosion including terminology, causes of common problems in industry, and general remedies such as cathodic protection, protective coatings, material selection, and chemical treatments. (3:2-2)

METL 1405 Welding Metallurgy I
This is an introduction to physical metallurgy and its application related to welding including studies of metal characteristics, testing, effects of alloying and heat treating and basic properties, with an emphasis on conducting tests and metallographic techniques. (4:3-3)

METL 2435 Welding Metallurgy II
This is an advanced course in the application of metallurgy principles to processes and procedures pertaining to various metal compositions and fusions. Studies include the metallurgy and selection of filler metal groups, the nature of defects, metal fusions problems, thermal effects in metal fusion and the welding of various kinds of steel and nonferrous metals. Prerequisite: METL 1405 or approval of department chair (4:3-3)

NDTE 1301 Film Interpretation of Weldments
This is the study of radiographic film interpretation, including exploration of radiographic basics, interpretation of indications, and causes of indications. Film indications are evaluated according to the structural, piping, and pressure vessel codes. (3:2-2)

NDTE 1410 Liquid Penetrant/Magnetic Particle Testing
This course is an introduction of the study of non-destructive testing in accordance with SNT-TC 1A materials before and after they are welded. An integral part of the course is the interpretation of non-destructive testing in accordance with building codes in liquid penetrant and magnetic particle. The theory and operation of magnetic and penetrant testing methods are stressed. (4:3-3)

NDTE 1440 Eddy Current Testing
This course covers the general principles of Eddy Current Testing including theory, knowledge, and skills for basic examination; effects of material properties, probe types, calibration standards, and equipment selection. (4:3-3)

NDTE 1454 Intermediate Ultrasonics
This course focuses on basic theory and applications of ultrasonic techniques of materials testing, covering the theoretical material from the certification test for Ultrasonic level I American Society of Non-Destructive Testing. The testing portion of the course is concerned with the fundamental properties of sound, principles of wave propagation, operation of ultrasonic waves, ultrasonic test equipment, process and techniques. Safety practices, procedures and current development in ultrasonic testing in industrial areas are stressed in relation and application to the metal working industry. (4:3-3)

NDTE 2339 Pressure Piping
This course covers the general principles of pressure vessel inspection. It covers American Society of Mechanical Engineers (ASME) and American Petroleum Institute (API) documents that pertain to pressure piping inspection. It prepares students to take the API 570 certification examination. (3:2-2)

NDTE 2401 Advanced Ultrasonics
This course is designed to strengthen the students' knowledge and skills in ultrasonic testing. Emphasis is on examination of plate and pipe welds, characterization of flaws, immersion testing, written practices, and procedures. Prerequisite: NDTE 1454 (4:3-3)

NDTE 2411 Preparation for Welding Inspector Certification
This course covers the general principles of welding inspection including welding processes, terms and definitions, welding discontinuities, duties and responsibilities of inspectors, destructive and non-destructive testing, quality assurance/quality control, welding codes and blueprints, procedures, and case studies. It includes an overview of welding tools and equipment, metallurgy, chemistry, and joint design. (4:3-3)

NDTE 2440 Pressure Vessel Inspection
This course covers the general principles of pressure vessel inspection; covers American Society of Mechanical Engineers (ASME) and American Petroleum Institute (API) documents that pertain to pressure vessels inspection. It prepares students to take the API 510 certification examination. (4:3-3)

QCTC 1341 Statistical Process Control
This course focuses on components of statistics including techniques of collection, presentation, analysis, and interpretation of numerical data as applied to statistical control. It stresses application of correlation methods, analysis of variance, dispersion, sampling quality control, reliability, mathematical models, and programming. Prerequisite: Math level 7 (3:2-2)

QCTC 1343 Quality Assurance
This course provides information on quality assurance principles and applications and introduces the student to the quality assurance profession. (3:2-2)

QCTC 1446 Introduction to Testing and Inspection Systems
This is a study of testing and inspection systems including pertinent specifications, inspection tools, gauges, instruments and mechanisms in illustrating the need for maintaining quality to establish standards. It covers the applications and methods of solving quality control and inspection problems using the appropriate testing and inspection methods such as AET, ET, LT, MT, PT, RT, UT and VT. (4:3-3)

QCTC 1448 Metrology and Blueprint Reading
This is the study of the terminology, methodology, and practice of measurement systems and equipment in the calibration and use of basic measuring tools. (4:3-3)

QCTC 2331 Standards
This is a study of philosophy and theory of appropriate standards, organizations, and systems integration relating to the standards criteria in society. It covers the study of structural, mechanical and application of the ASME, AWS and API codes along with ASTM and MIL-STD. (3:2-2)

WLDG 2580 Cooperative Education Welding
This course covers career-related activities encountered in the student's area of specialization offered through an individualized agreement among the College, employer, and student. Under the supervision of the College and the employer, the student combines classroom learning with work experience. It includes a lecture component. Prerequisite: None (5:1-28)

Nursing

Nursing (Associate Degree)
RNSG 1108 Dosage Calculations for Nursing
This course includes reading, interpreting and solving calculations problems encountered in the preparation of medications, and conversion of measurements within the apothecary, avoirdupois, and metric system. It is a prerequisite for program admission. (1:0)
Course Descriptions

RNSG 1140 Nursing Skills for Articulating Students
This course is to provide validation of current skills and procedures in a variety of settings. It includes application of a systematic problem solving process and critical thinking skills; focus on the expansion of the scientific knowledge and principles underlying nursing skills and procedures; and competency in knowledge, judgement, skills and professional values within a legal/ethical framework. (1.0-3)

RNSG 1144 Intermediate Nursing Skills
This is a study of the concepts and principles necessary to perform intermediate or advanced nursing skills. Students learn to demonstrate competence in the performance of nursing procedures. Topics include knowledge, judgement, skills, and professional values within a legal/ethical framework. Prerequisite: RNSG 1413, RNSG 1215 and RNSG 1160 (1.0-4)

RNSG 1160 Clinical Nursing Introduction
This course features a basic type of health professions work-based instruction that helps the students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: RNSG 1413 and RNSG 1144 (1.0-6)

RNSG 1162 Clinical: Concepts of Nursing Practice Ia for Articulating Students
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1209, RNSG 1417, and RNSG 1161, co-requisite: RNSG 1442 (1.0-4)

RNSG 1163 Clinical: Concepts of Nursing Practice Ia for Articulating Students
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1209, RNSG 1417, and RNSG 1260, co-requisite: RNSG 1249 (1.0-6)

RNSG 1166 Practicum, Nursing Transition
This is an intermediate or advanced type of health professions work-based course that helps students gain practical experience in the discipline, enhance skills, and integrate knowledge. The emphasis is on practical work experience for which the student has already acquired the necessary theoretical knowledge and basic skills. Direct supervision is provided by the clinical professional, generally a clinical preceptor. A health practicum may be paid or unpaid learning experience. Prerequisite for Paramedic to RN includes RNSG 1413, prerequisite or co-requisite: RNSG 2207 (1.0-7)

RNSG 1191 Special Topics in Nursing
This course covers recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Prerequisite: admission to the ADN program and approval of the department chair. Note: 1-2 credit hours available on individual basis. (1 or 2: 0-1 or 2)

RNSG 1209 Introduction to Nursing
This course provides an overview of nursing and the role of the associate degree nurse as a provider of care, coordinator of care, and member of the profession. Topics include knowledge, judgement, skills and professional values with a legal/ethical framework. Prerequisite: Admission to the ADN Mobility program, co-requisite: RNSG 1443 and RNSG 1160 or RNSG 1260 (2:2-0)

RNSG 1215 Health Assessment
This course covers development of skills and techniques required for a comprehensive health assessment within a legal/ethical framework. Prerequisite: requires approval of the department chair (2:1-2)

RNSG 1249 Concepts of Pediatric Nursing Practice for the Articulating Student
This course provides the articulating student the opportunity to examine the roles of the professional nurse and applies systematic problem solving processes and critical thinking skills. It focuses on the utilization of leadership and management skills in the provision of care to small groups of pediatric clients and their families in selected settings. This course lends itself to a blocked approach. Prerequisites: RNSG 1209, RNSG 1417, and RNSG 1260, co-requisite: RNSG 1163 (This is an 8-week course for four hours per week.) (2:2-0)

RNSG 1251 Care of the Childbearing Families
This is a study of concepts related to the provision of nursing care of childbearing families. Topics may include selected complications. Topics include knowledge judgement, skills, and professional values within a legal/ethical framework.
Prerequisites: RNSG 1343, RNSG 1262, RNSG 1301 and PSYC 2314 Prerequisite or co-requisite: RNSG 1263 (2:2-0)

RNSG 1260 Clinical: Concepts of Nursing Practice I for Articulating Students
This is a health related work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: admission to the ADN Mobility program, co-requisites: RNSG 1209 and RNSG 1417 (2:0-12)

RNSG 1261 Clinical Nursing Common Concepts of Adult Health
This introductory health professions work-based course helps students synthesize new knowledge, apply previous knowledge, and/or gain experience managing the workflow in care of adult clients/families with common medical-surgical health needs related to each body system. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1413, RNSG 1215, RNSG 1144, and RNSG 1160, prerequisite or co-requisite: RNSG 1341 (2:0-7)

RNSG 1262 Clinical Nursing Complex Concepts of Adult Health
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in care of adult clients/families with complex medical-surgical health care needs associated with each body system. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1261 and RNSG 1341, prerequisite or co-requisite: RNSG 1343, RNSG 1301 and PSYC 2314, prerequisites for transition and paramedical specialty: RNSG 2207 and RNSG 1166, co-requisite for transition and paramedical specialty: RNSG 1343 (2:0-7)
RNSG 1263 Clinical Nursing Care of the Childbearing Family
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in the provision of nursing care for childbearing families. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1442, RNSG 1262, RNSG 1301 and PSYC 2314, prerequisite or co-requisite: RNSG 1251 (2:0-7)

RNSG 1270 Concepts of Maternity/ Newborn and Women's Health Nursing for the Articulating Student
This course provides the articulating student the opportunity to examine the roles of the professional nurse and applies systematic problem solving processes and critical thinking skills. It focuses on the utilization of leadership and management skills in the provision of care to small groups of maternity clients and their families in selected settings. This course lends itself to a blocked approach. Prerequisites: RNSG 1417, RNSG 1209, and RNSG 1260, co-requisite: RNSG 2161. (This is an 8-week course for four hours per week.) (2:2-0)

RNSG 1291 Special Topics in Nursing
This course covers recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Prerequisite: admission to the ADN program and approval of the department chair or associate dean. (Note: 1-2 credit hours available on individual basis.) (1 or 2: 0-1 or 2)

RNSG 1301 Pharmacology
This is an introduction to the science of pharmacology with emphasis on the actions, interactions, adverse effects, and nursing implications of each drug classification. Topics include the roles and responsibilities of the nurse in safe administration of medication within a legal/ethical framework. Prerequisites: BIOL 2401, BIOL 2402, and (BIOL 2420 or 2421), (Central), and must have department chair approval (3:3-0)

RNSG 1341 Common Concepts of Adult Health
This is a study of the general principles of caring for selected adult clients and families with common medical-surgical health care needs related to each body system. It covers knowledge, judgment, skills, and professional values within a legal/ethical framework in structured settings. Prerequisites: RNSG 1413, RNSG 1160, RNSG 1215 and RNSG 1144, prerequisite or co-requisite: RNSG 1301, RNSG 1261 and PSYC 2314 (3:3-0)

RNSG 1343 Concepts of Adult Health
This course provides integration of previous knowledge and skills into the continued development of the associate degree nurse as a provider of care, coordinator of care and member of profession in the care of adult client/families in structured health care settings. Students learn to incorporate judgments, skills, and professional values within a legal/ethical framework. Prerequisites: RNSG 1341 and RNSG 1261, prerequisite or co-requisite: RNSG 1301, RNSG 1262 and PSYC 2314 (3:3-0)

RNSG 1413 Foundation for Nursing Practice
This is an introduction to the role of the professional nurse as a provider of care, coordinator of care, and member of the profession. Topics include, but are not limited to, the fundamental concepts of nursing practice, history of professional nursing, a systematic framework for decision-making, mechanisms of disease, the needs and problems that nurses help patients manage, and basic psychomotor skills. The course covers knowledge, judgment, skills, and professional values within a legal/ethical framework. Prerequisites: RNSG 1144, RNSG 1215, and RNSG 1160 (4:3-3)

RNSG 1417 Concepts of Nursing Practice I for Articulating Students
This course provides the articulating student the opportunity to examine the role of the professional nurse; application of a systematic problem solving process and critical thinking skills, which includes a focus on the adult population in selected settings; and competency in knowledge, judgment, skill, and professional values within a legal/ethical framework. Prerequisite: admission to ADN Mobility program, co-requisite: RNSG 1260 (4:4-0)

RNSG 2121 Management of Client Care
This course features exploration of leadership and management principles applicable to the role of the nurse as provider of care, coordinator of care, and member of the profession. It includes application of knowledge, judgment, skills, and professional values within a legal/ethical framework. Prerequisite or co-requisite: RNSG 2213, RNSG 2261, RNSG 2231, RNSG 2260, RNSG 2201, RNSG 2262, RNSG 1251, RNSG 1263, and RNSG 2263 (1:1-0)

RNSG 2160 Clinical: Concepts of Nursing Practice IIb for Articulating Students
This is an intermediate type of health professions work-based courses that helps students synthesize new knowledge, or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: RNSG 1162, co-requisite: RNSG 1442 (1:0-4)

RNSG 2161 Clinical: Concepts of Nursing Practice IIb for Articulating Students
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: RNSG 1209, RNSG 1417 and RNSG 1260, co-requisite: RNSG 1270 (1:0-6)

RNSG 2162 Clinical: Concepts of Nursing Practice IIIa for Articulating Students
This is an advanced type of health professions work-based course that helps students synthesize new knowledge or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1249, RNSG 1270, RNSG 1163, and RNSG 1261, co-requisite: RNSG 2270 (This is an 8-week course for 12 hours per week.) (1:0-6)
Course Descriptions

RNSG 2163 Clinical: Concepts of Nursing Practice Illb for Articulating Students
This is an advanced type of health professions work-based course that helps students synthesize new knowledge, or gain experience managing workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite: RNSG 1249, RNSG 1270, RNSG 1163, and RNSG 1261, co-requisite: RNSG 2271 (1:0-6)

RNSG 2201 Care of Children and Families
This course features the study of concepts related to the provision of nursing care for children and their families, emphasizing judgment and professional values within a legal/ethical framework. Prerequisite: RNSG 1343, RNSG 1262, RNSG 1301, and PSYC 2314, prerequisite or co-requisite: RNSG 2262

RNSG 2207 Transition to Nursing Practice
This is an introduction to selected concepts related to the role of the associate degree nurse as a provider of care, coordinator of care, and member of the profession. This includes a review of trends and issues impacting nursing and health care today and in the future. Topics include knowledge, judgement, skill, and professional values within a legal/ethical framework. PHED. Prerequisite for paramedic to RN includes RNSG 1413, prerequisite or co-requisite: RNSG 1166 (2:2-1)

RNSG 2213 Mental Health Nursing
This course covers principles and concepts of mental health, psychopathology and treatment modalities relating to the nursing care of clients and their families. Prerequisite: RNSG 1262, RNSG 1301, RNSG 1343, and PSYC 2314, prerequisite or co-requisite: RNSG 2261 (2:2-0)

RNSG 2231 Advanced Concepts of Adult Health
This course covers the application of advanced concepts and skills for the development of professional nurse’s roles in complex nursing situations with adult clients/families with complex health needs involving multiple body systems in intermediate and critical care settings, with an emphasis on knowledge, judgment, skills, and professional values within a legal/ethical framework. Prerequisites: RNSG 1343, RNSG 1262, RNSG 1301, and PSYC 2314, prerequisite or co-requisite: RNSG 2260 (2:2-1)

RNSG 2260 Clinical Nursing Advanced Concepts of Adult Health
This is an advanced type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in care of adult clients/families with complex health needs involving multiple body systems in intermediate and critical care settings. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1343, RNSG 1262, RNSG 1301, and PSYC 2314, prerequisite or co-requisite: RNSG 2231 (2:0-7)

RNSG 2261 Clinical Nursing Mental Health
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in the provision of principles and concepts of mental health, psychopathology, and treatment modalities related to the nursing care of clients and their families. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1262, RNSG 1301, RNSG 1343, and PSYC 2314, prerequisite or co-requisite: RNSG 2221 (2:0-7)

RNSG 2262 Clinical Nursing Care of Children and Families
This is an intermediate type of health professions work-based course that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow in the provision of nursing care for the child and family. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally at a clinical setting. Clinical education is an unpaid learning experience. Prerequisites: RNSG 1343, RNSG 1262, RNSG 1301, and PSYC 2314, prerequisite or co-requisite: RNSG 2201 (2:0-7)

RNSG 2263 Clinical Nursing Management of Client Care
This is an intermediate health profession work-based course helps students explore leadership and management principles applicable to the role of the nurse as a provider of care, coordinator of care, and member of a profession. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional, generally in a clinical setting. Clinical education is an unpaid learning experience. Prerequisite or co-requisite: RNSG 2213, RNSG 2261, RNSG 2231, RNSG 2260, RNSG 2201, RNSG 2262, RNSG 1251, RNSG 1263, and RNSG 2121 (2:0-8)

RNSG 2270 Concepts of Nursing Practice Illb for Articulating Students
This course provides the articulating student the opportunity to synthesize the roles of the professional nurse; application of systematic problem solving process and critical thinking skills; focus on the care of patients throughout the lifespan with continued emphasis on leadership and management skills in the provision of care to small groups of adult clients and their families in multiple settings; and competency in knowledge, judgement, skills and professional values within a legal/ethical framework. The focus of this course is the care of the patient with psychosocial disorders. Prerequisite: RNSG 1242-Concepts of Nursing Practice Illb for Articulating Students, co-requisite: RNSG 2162 (2:2-0)

RNSG 2271 Concepts of Nursing Practice Illb for Articulating Students
This course provides the articulating student the opportunity to examine the roles of the professional nurse and apply systematic problem solving processes and critical thinking skills. It focuses on the utilization of leadership and management skills in the provision of care to small groups of adult clients and their families in selected settings and competency in knowledge, judgement, skills and professional values within a legal/ethical framework. The focus of this course will be nursing management and critical care. Prerequisite: RNSG 1270, RNSG 2270 and RNSG 2162, co-requisite: RNSG 2163. (2:2-0)

Vocational Nursing
VNSG 1116 Nutrition
This course offers an introduction to nutrients and their role in proper growth and development and the maintenance of health. Prerequisite: department chair/program director approval. Hours: 32 lab hours (1:0-2)
VNSG 1119 Professional Development
This course covers the importance of professional growth. Topics include the role of the licensed vocational nurse in the multidisciplinary health care team, professional organizations, and continuing education. Prerequisite: Reading level 7, Math level 7, Writing level 7 and completion of second semester VNSG courses. (Courses must be taken in third semester.) Hours: 16 lecture hours (1:1-0)

VNSG 1170 Clinical Prep
This course covers methods of instruction providing detailed education, training, and work-based experiences, and simulated direct patient/client care in a laboratory setting. This lab-based course prepares students for a beginning experience in nursing care of adult medical-surgical clients and is a six-week course. Prerequisites: Reading level 7, Math level 7, Writing level 7, and admission into the Vocational Nursing Program. Co-requisite: VNSG 1323. Successful completion of VNSG 1170 and VNSG 1323 are required prior to enrolling in VNSG 2331 and 1260. If unsuccessful in VNSG 1170 and/or 1323, students are ineligible to continue in VNSG 1227 and the VNSG program. Hours: 64 lab hours (1:0-4)

VNSG 1226 Gerontology
This is an overview of the normal physical, psycho-social, and cultural aspects of the aging process. It addresses common disease processes of aging and exploration of attitude toward care of the elderly. Prerequisite: Reading level 7, Math level 7, Writing level 7 and completion of first semester VNSG program, co-requisite: VNSG 1262, hours: 32 lecture hours. (2:2-0)

VNSG 1227 Essentials of Medication Administration
This course covers general principles of medication administration including determination of dosage, preparation, safe administration, and documentation of multiple forms of drugs. Instruction includes various systems of measurement. Prerequisite: Reading level 7, Math level 7, Writing level 7 and admission into the VNSG program, co-requisite: VNSG 1323, VNSG 1360, and VNSG 2331, hours: 32 lecture and 16 lab hours (2:2-1)

VNSG 1230 Maternal-Neonatal Nursing
This course covers utilization of the nursing process in the assessment and management of the childbearing family, with an emphasis on the biopsychosocio-cultural needs of the family during the phases of pregnancy, childbirth, and the neonatal period including abnormal conditions. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of the second semester VNSG courses, co-requisites: VNSG 1324 and VNSG 2261, hours: 32 lecture hours and 16 lab hours (2:2-1)

VNSG 1231 Pharmacology
This course covers the fundamentals of medications and their diagnostic, therapeutic, and curative effects. It includes nursing interventions utilizing the nursing process. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of the first semester VNSG courses, co-requisites: VNSG 1329 and VNSG 1361, hours: 32 lecture hours and 16 lab hours. (2:2-1)

VNSG 1234 Pediatrics
This is a study of childhood diseases and childcare from infancy through adolescence, with a focus on the care of the well and ill child utilizing the nursing process. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of the second semester VNSG courses, Co-requisites: VNSG 1230 and VNSG 2261, Hours: 32 lecture hours and 16 lab hours (2:2-1)

VNSG 1260 Clinical I
This course provides detailed education, training, and work-based experience and direct patient/client care, generally at a clinical site. This supervised practice provides beginning experience in nursing care of adult medical-surgical clients. This course is 10 weeks in length. Prerequisite: Reading level 7, Math level 7, Writing level 7 and admission into the VNSG program and successful completion of VNSG 1323 and VNSG 1160, co-requisite: VNSG 2331, hours: 128 clinical hours (2:0-8)

VNSG 1262 Clinical II - Practical Nurse
This course provides detailed education, training and work-based experience, and direct patient/client care, generally at a clinical site. This clinical practice offers the student continued experience in the nursing care of adult medical-surgical clients in varied clinical settings. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of the first semester VNSG courses, co-requisite: VNSG 1226, hours: 128 hours (2:0-8)

VNSG 1301 Mental Health and Mental Illness
This course covers personality development, human needs, common mental mechanisms, and factors influencing mental health and mental illness, including common mental disorders and related therapy. Prerequisites: Reading level 7, Math level 7 Writing level 7, and completion of first semester of VNSG courses, hours: 48 lecture hours (3:3-0)

VNSG 1302 Anatomy and Physiology for Allied Health
This is an introduction to the normal structure and function of the body including an understanding of the relationship of body systems in maintaining homeostasis. Prerequisite: Reading level 7, Math level 7, Writing level 7 and department chair/program director approval, hours: 48 lecture hours and 16 lab hours (3:3-1)

VNSG 1323 Basic Nursing Skills
This course provides a mastery of entry level nursing skills and competencies for a variety of health care settings, and includes utilization of the nursing process as a foundation for nursing intervention. Prerequisites: Reading level 7, Math level 7, Writing level 7 and admission into the VNSG program, co-requisites: VNSG 1227 and VNSG 1360 required, hours: 32 lecture and 64 lab hours (3:2-2)

VNSG 1329 Medical-Surgical Nursing I
This course covers application of nursing process to the care of adult patients experiencing medical-surgical conditions in the health-illness continuum. A variety of health care settings are utilized. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of first semester VNSG courses, co-requisites: VNSG 1231 and VNSG 1361, hours: 48 lecture hours and 16 lab hours (3:3-1)

VNSG 1332 Medical-Surgical Nursing II
This is a continuation of Medical-Surgical I with application of the nursing process to the care of adult patients experiencing medical-surgical conditions in the health-illness continuum. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of second semester VNSG courses, co-requisites: VNSG 2260, hours: 48 lecture hours and 16 lab hours (3:3-1)

VNSG 1361 Clinical II-Practical Nurse
This course provides detailed education, training and work-based experience, and direct patient/client care, generally at a clinical site. This clinical practice offers the student continued experience in the nursing care of adult medical-surgical clients. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of first semester VNSG courses, co-requisites: VNSG 1231 and VNSG 1329, hours: 192 clinical hours. (3:0-12)

VNSG 1423 Basic Nursing Skills
This course provides a mastery of entry level nursing skills and competencies for a variety of health care settings. Utilization of the nursing process as the foundation for all nursing interventions. Prerequisites: Reading level 6, Writing level 6 (4:2-6)
**VNSG 2260 Clinical IV-Practical Nurse**  
This course provides detailed education, training, and work-based experience, and direct patient/client care, generally at a clinical site. It includes supervised clinical practice offering student's experience in providing nursing care for more complex medical/surgical clients. Opportunity to identify leadership and management skills will be provided. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of second semester VNSG courses, co-requisite: VNSG 1332, hours: 128 clinical hours (2:0-8)

**VNSG 2261 Clinical V-Practical Nurse**  
This course provides detailed education, training and work-based experience, and direct patient/client care, generally at a clinical site. It includes an introduction to clinical practice offering experience in nursing care in the areas of maternity, pediatrics, and the newborn nursery. Prerequisites: Reading level 7, Math level 7, Writing level 7 and completion of second semester VNSG courses, co-requisite: VNSG 1320 and VNSG 1234, hours: 128 clinical hours (2:0-8)

**VNSG 2331 Advanced Nursing Skills**  
This course provides a mastery of advanced level nursing skills and competencies in a variety of health care settings utilizing the nursing process as a problem-solving tool. Prerequisites: Reading level 7, Math level 7, Writing level 7 and VNSG 1160, co-requisite: VNSG 1227 and VNSG 1360, hours: 32 lecture and 64 lab hours (3:2-4)

---

**Occupational Health and Safety Technology**

**EPCT 1305 Environmental Regulations Overview**  
This is an introduction to the history of the environmental movement, including basic requirements for compliance with environmental regulations. It includes 48 lecture hours. (3:3-0)

**EPCT 1307 Introduction to Environmental Safety and Health Technology**  
This is a historical overview of environmental safety and health. The emphasis is on the use of occupational safety and health codes, and development of knowledge and skills to reinforce the attitudes and behaviors required for safe and environmentally sound work habits. It covers safety, health, and environmental issues in the performance of all jobs, tasks, and regulatory compliance issues. (3:3-0)

**EPCT 1313 Contingency Planning**  
This is an introduction to the development of an emergency response contingency plan for a facility or community, with an emphasis on analyzing the hazards, writing and implementing the contingency plans and evaluating the effectiveness of the contingency plan. It covers emergency response concepts. The student will demonstrate appropriate response concepts. The student will demonstrate appropriate response to emergency situations; recognize hazardous situations for personnel, environment, and community; and apply team skills in response to emergency situations. It includes 48 lecture hours. (3:3-0)

**EPCT 1341 Principles of Industrial Hygiene**  
This course covers basic concepts in threshold limits, dose response, and general recognition of occupational hazards, including sampling statistics, calibration, and equipment use, a study of the control of occupational hazards; and sample collection and evaluation methods. It includes 48 lecture hours. (3:3-0)

**EPCT 2333 Environmental Toxicology**  
This is a review of the research determining the systematic health effects of exposures to chemicals, including discussion of risk factors, routes of entry, control measures, and acute and chronic effects. It includes 48 lecture hours. (3:3-0)

**OSHT 1307 Construction Site Safety and Health**  
This course covers construction accident prevention, interpretation of OSHA regulations, general safety requirements, occupational health and environmental controls, fire protection and prevention, signs and other barricades, proper hand tool usage; welding and cutting, electrical hazards, ladders, scaffolding, floors and stairways, cranes, derricks, hoists, elevators and conveyors, motorized vehicles and mechanized equipment, excavation, trenching and shoring, demolition and the use of explosives. (3:3-0)

**OSHT 1309 Physical Hazards Control**  
This is a study of the common physical hazards in industry and methods of workplace design and redesign to control hazards, with emphasis on the regulation codes and standards associated with the control of physical hazards. It includes 48 lecture hours. (3:3-0)

**OSHT 1313 Accident Prevention, Inspection and Investigation**  
This course covers principles and practices providing a basis for understanding the nature of occupational hazard recognition, accident prevention, loss reduction, inspection techniques and accident investigation analysis. It includes 48 lecture hours. (3:3-0)

**OSHT 1321 Fire Protection Systems**  
This is a study of fire protection systems and their applications with emphasis on the National Fire Protection Association codes, and includes 48 lecture hours. (3:3-0)

**OSHT 2305 Ergonomics and Human Factors in Safety**  
This is a study of the relationship of human behavior and ergonomics as applied to safety, and includes 48 lecture hours. (3:3-0)

**OSHT 2309 Safety Program Management**  
This is a study of the Occupational Safety and Health Act, cost analysis of accidents, records and record keeping, reporting, job safety analysis, and fundamentals of safety training. It is an introduction to the Occupational Safety and Health Administration’s (OSHA) General Industry Standards and an overview of the more frequently cited violations in recent years and includes 48 lecture hours. (3:3-0)

**OSHT 2320 Safety Training Presentation Techniques**  
This course covers principles of developing and presenting effective industrial/business training, with an emphasis on instructor qualifications and responsibilities, principles teaching including use of teaching aids and presentation skills. It includes 48 lecture hours. (3:3-0)

**OSHT 2380 Cooperative Education-Occupational Safety and Health Tech.**  
Career related activities encountered in the student’s area of specialization are offered through a cooperative agreement between the College, employer, and student. Under supervision of the College and employer, the student combines classroom learning with work experience. Directly related to a technical discipline, specific learning objectives guide the student through the work experience. Prerequisite: department chair approval (3:1-14)

**OSHT 2401 OSHA Regulations-General Industry**  
This is a study of Occupational Safety and Health Administration (OSHA) regulations pertinent to general industry, and includes 64 lecture hours. (4:4-0)
Paralegal

LGLA 1301 Legal Research and Writing
This course provides a working knowledge of fundamentals of effective legal research and writing. Topics include law library techniques, computer assisted legal research, briefs, and legal memoranda. The student will locate, read, and understand primary and secondary legal authority; design and implement effective research strategies; be familiar with computer assisted legal research tools and the proper role of these tools; write clear, concise legal memoranda and briefs. Prerequisite or co-requisite: Reading level 4, LGLA 1307 (3:3-1)

LGLA 1303 Legal Research
This course provides a working knowledge of the fundamentals of effective legal research. Topics include law library techniques, traditional hardcopy legal research, computer assisted legal research, briefs, and legal memoranda. The student will locate, read, and understand primary and secondary legal authority, design and implement effective legal research strategies; and be familiar with computer assisted legal research tools and the proper role of these tools. Prerequisite or co-requisite: LGLA 1307 (3:3-1)

LGLA 1305 Legal Writing
This course presents the fundamentals of legal writing techniques. Topics include letters, case briefs, legal memoranda, trial and appellate briefs, case and fact analysis, citation forms, and legal writing styles. It is recommended you take or have taken LGLA 1303, Legal Research. Prerequisites: LGLA 1307, ENGL 1301 (3:3-0)

LGLA 1307 Introduction to Law and the Legal Professions
This course provides an overview of the law and the legal professions. Topics include legal concepts, systems, and terminology; ethical obligations and regulations; professional trends and issues with particular emphasis on the paralegal. The student will develop a legal vocabulary; explain fundamental legal concepts and systems; explain the ethical obligations. Prerequisite: Reading level 4 (3:3-0)

LGLA 1317 Law Office Technology
This course introduces computer technology and its applications within the law office. Topics include the use of computer technology in the delivery of legal services with particular emphasis on the paralegal's role. (3:3-1)

LGLA 1343 Bankruptcy
This course presents fundamental concepts of bankruptcy law and procedure with emphasis on the paralegal's role. Topics include individual and business liquidation and reorganization. Prerequisite: Reading level 4 and Pre-or co-requisite: LGLA 1307 (3:3-0)

LGLA 1345 Civil Litigation
This course presents fundamental concepts and procedures of civil litigation with emphasis on the paralegal's role. Topics include pretrial, trial, and post trial phases of litigation. The student will define and properly use terminology relating to civil litigation, locate, describe, and analyze sources of law relating to the civil litigation process, describe the role and ethical obligations of the paralegal in civil litigation; and draft documents commonly used in civil litigation. Prerequisites or co-requisite: LGLA 1307, Reading level 4 (3:3-0)

LGLA 1351 Contracts
This course presents fundamental concepts of contract law with emphasis on the paralegal's role. Topics include formation, performance, and enforcement of contracts under the common law, the Uniform Commercial Code, and the Texas Business and Commerce Code. The student will define and properly use terminology relating to contract law, locate, describe, and analyze sources of law relating to contract law; describe the role and ethical obligations of the paralegal relating to contract law; and draft documents commonly used in contract law. Prerequisite or co-requisite: LGLA 1307 (3:3-0)

LGLA 1353 Wills, Trusts, and Probate Administration
This course presents fundamental concepts of the law of wills, trusts, and probate administration with emphasis on the paralegal's role. The student will define and properly use terminology relating to wills, trusts, and probate administration; locate, describe, and analyze sources of law relating to wills, trusts, and probate administration; describe the role and ethical obligations of the paralegal in wills, trusts, and probate administration; and draft documents commonly used in wills, trusts, and probate administration. Prerequisites or co-requisites: LGLA 1307, Reading level 4 (3:3-0)

LGLA 1355 Family Law
This course presents fundamental concepts of family law with emphasis on the paralegal's role. Topics include formal and informal marriages, divorce, annulment, marital property, adoption, and the parent-child relationship. The student will define and properly use terminology relating to family law, locate; describe, and analyze sources of law relating to family law; describe the role and ethical obligations of the paralegal in family law; and draft documents commonly used in family law. Prerequisites or co-requisites: LGLA 1307, Reading level 4 (3:3-0)

LGLA 1359 Immigration Law
This course presents fundamental concepts of immigration law with emphasis on the paralegal's role. Topics include substantive and procedural law related to visa applications, deportation, naturalization, and citizenship. Prerequisite: Reading level 4 and pre- or co-requisite: LGLA 1307 (3:3-0)

LGLA 1391 Special Topics in Legal Assistant
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to legal assistance and relevant to the professional development of the legal assistant student. Prerequisite or co-requisite: LGLA 1307 (3:3-0)

LGLA 2303 Torts and Personal Injury Law
This course is a study of principles, methods, and investigative techniques utilized to locate, gather, document, and manage information related to tort and personal injury law, with an emphasis on developing interviewing and investigative skills to prepare the paralegal to communicate effectively while recognizing ethical problems in this area of law. Prerequisites or co-requisites: Reading level 4, LGLA 1307 (3:3-0)

LGLA 2309 Real Property
This course presents fundamental concepts of real property law with emphasis on the paralegal's role. Topics include the nature of real property, rights and duties of ownership, land use, voluntary and involuntary conveyances, and recording of and searching for real estate documents. Prerequisites or co-requisites: LGLA 1307, Reading level 4 (3:3-0)
LGLA 2311 Business Organizations
This course presents basic concepts of business organizations with emphasis on the paralegal's role. Topics include law of agency, sole proprietorships, forms of partnerships, corporations, and other emerging business entities. The student will define and properly use terminology relating to business organizations; locate, describe, and analyze sources of law relating to business organizations; describe the role and ethical obligations of the paralegal relating to formation, operation, and termination of the various business entities; describe the formation, operation, and termination of business entities; and draft documents required for the formation, operation, and termination of business entities. Prerequisite or co-requisite: LGLA 1307 (3:3-0)

LGLA 2313 Criminal Law and Procedure
This course introduces the criminal justice system including procedures from arrest to final disposition, principles of federal and state law, and the preparation of pleadings and motions. The student will define and properly use terminology relating to criminal law; describe sources of law relating to criminal law; locate and analyze cases and statutes relating to criminal law; describe the role and ethical obligations of the paralegal relating to criminal law; and draft documents commonly used in criminal law. Prerequisite or co-requisite: LGLA 1307, Reading level 4 (3:3-0)

LGLA 2323 Intellectual Property
This course presents the fundamentals of intellectual property law, including creation, procurement, preparation, and filing documents related to patents, copyrights, trademarks, and processes of intellectual property litigation with emphasis on the paralegal's role. Prerequisite: Reading level 4 and pre- or co-requisite: LGLA 1307 (3:3-0)

LGLA 2333 Advanced Legal Document Preparation
This course covers preparation of legal documents based on hypothetical fact situations drawn from various areas including real estate, family law, contracts, litigations, and business organizations. Prerequisites or co-requisites: LGLA 1307, Reading level 4 (3:3-0)

LGLA 2335 Advanced Civil Litigation
This course implements advanced civil litigation techniques with emphasis on the paralegal's role and builds upon skills acquired in prior civil litigation courses. It is recommended you take or have taken LGLA 1345 Civil Litigation. Prerequisite: LGLA 1307, Reading level 4 (3:3-0)

LGLA 2388 Internship-Paralegal/Legal Assistant
This course provides an experience external to the College for an advanced student in a specialized field involving a written agreement between the educational institution and a business or industry. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. As outlined in the learning plan, the student will master the theory, concepts and skills involving the tools, materials, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, and legal systems associated with the particular occupational and the business/industry; demonstrate ethical behavior, safety practices, interpersonal and teamwork skills, communicating in the applicable language of the occupation and the business or industry. Prerequisites: 18 credit hours of LGLA courses and ENGL 1301 (Student must be “placed” the semester before they plan to take this course. This course may be taken a maximum two times for credit.) (3:1-15)

LGLA 2389 Internship-Paralegal/Legal Assistant
This course provides an experience external to the College for an advanced student in a specialized field involving a written agreement between the educational institution and a business or industry. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. As outlined in the learning plan, the student will master the theory, concepts and skills involving the tools, materials, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, and legal systems associated with the particular occupational and the business/industry; demonstrate ethical behavior, safety practices, interpersonal and teamwork skills, communicating in the applicable language of the occupation and the business or industry. Prerequisites: 18 credit hours of LGLA courses and ENGL 1301 (Student must be “placed” the semester before they plan to take this course. This course may be taken a maximum two times for credit.) (3:1-15)

PHAR 1301 Introduction to Pharmacy
This course covers examination of the qualifications, operational guidelines, and job duties of a pharmacy technician will be discussed. Topics include definitions of a pharmacy environment, the profile of a pharmacy environment, the role of a pharmacy technician, legal and ethical guidelines, job skills and duties, verbal and written communication skills, professional resources, safety techniques, and supply and inventory techniques. (3:3-0)

PHAR 1305 Drug Classification
This is a study of pharmaceutical drugs, abbreviations, classifications, dosages, actions in the body, and routes of administration. The emphasis is on location of drugs within a pharmacy, inventory control, safety, and quality assurance procedures. Prerequisite or co-requisite: PHAR 1301 (3:3-0)

PHAR 1309 Pharmaceutical Mathematics I
Pharmaceutical mathematics includes reading, interpreting, and solving calculation problems encountered in the preparation and distribution of drugs. Conversion of measurements within the apothecary, avoirdupois, and metric systems with emphasis on the metric system of weight and volume will be a focus. Topics include ratio and proportion, percentage, dilution and concentration, milliequivalent units, intravenous flow rates, and solving dosage problems. Prerequisite or co-requisite: PHAR 1301 (3:3-0)

PHRA 1301 Community Pharmacy Practice I
Mastery of skills necessary to interpret, prepare, label and maintain records of physicians' medication orders and prescriptions in a community pharmacy is a primary focus. This course is designed to train individuals in the administration of supply, inventory, and data entry. Topics include customer service and advisement, count and pour techniques, prescription calculations, drug selection and preparation, over-the-counter drugs, price labeling, record keeping, stock level adjustment, maintain new drug requests, data input and editing, and legal parameters. Prerequisites or co-requisites: PHRA 1301, 1305, 1309 (3:2-3)

PHRA 1345 IV Admixture and Sterile Compounding
This course provides an experience external to the College for an advanced student in a specialized field involving a written agreement between the educational institution and a business or industry. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the College and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. As outlined in the learning plan, the student will master the theory, concepts and skills involving the tools, materials, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, and legal systems associated with the particular occupational and the business/industry; demonstrate ethical behavior, safety practices, interpersonal and teamwork skills, communicating in the applicable language of the occupation and the business or industry. Prerequisites: 18 credit hours of LGLA courses and ENGL 1301 (Student must be “placed” the semester before they plan to take this course. This course may be taken a maximum two times for credit.) (3:1-15)

PHRA 1309 Pharmaceutical Mathematics II
This is an in-depth extension of Pharmaceutical Mathematics I which addresses ratio and proportion, percentage, dilution and concentration, milliequivalent units, and intravenous flow rates. Prerequisite: PHAR 1309 (3:3-0)
PHRA 1349 Institutional Pharmacy Practice
This course is an exploration of the unique role and practice of pharmacy technicians in an institutional pharmacy with emphasis on daily pharmacy operation. The course includes topics such as hospital pharmacy organization, work flow and personnel, medical and pharmaceutical terminology, safety techniques, data entry, packaging and labeling operations, extemporaneous compounding, inpatient drug distribution systems, unit dose cart fills, quality assurance, drug storage, and inventory control. Prerequisites: PHRA 1313 (3:2-3)

PHRA 1360 Clinical: Community Pharmacy
This is a health-related work-based learning experience which enables students to apply specialized occupational theory, skills and concepts under direct supervision provided by clinical professionals. Prerequisites: PHRA 1301, 1305, 1309, 1313 (3:0-10)

PHRA 1372 Drug Classification II
This course is an in-depth extension of Drug Classification I with focus on the study of disease processes, pharmaceutical drugs, abbreviations, classifications, dosages, actions in the body, and routes of administration. Prerequisite: PHRA 1305 (3:3:0)

PHRA 2360 Clinical: Institutional Pharmacy
This is a health-related work-based learning experience enabling students to apply specialized occupational theory, skills and concepts under direct supervision provided by clinical professionals. Prerequisites: PHRA 1345, 1347, 1349, 1360, and 1372 (3:0-10)

PHIL 1301 Introduction to Philosophy
This course provides a general overview of the historical development and the major systems of philosophic thought, the nature of man, knowledge, morality, social and political theory, and the existence of God. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

PHIL 1304 Introduction to World Religions
Introduction to World Religions is a survey course in philosophy designed to familiarize students with the major theories of world religions. Students will establish broad and multiple perspectives of religious theory and evaluate theories of religion. This course is a survey and critical examination of major theories concerning world religions. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

PHIL 2303 Logic I
This is a study of nature and methods of correct reasoning, deductive proof, fallacies, and arguments. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

PHIL 2306 Introduction to Ethics
This course offers a general overview of classical and contemporary theories concerning the good life, human conduct in society, moral and ethical standards and the nature, criteria, sources, logic, and validity of moral value judgments. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

PHIL 2307 Introduction to Social and Political Philosophy
This is a survey course in philosophy designed to familiarize students with the major theories concerning the organization of societies and governments. Students will establish broad and multiple perspectives of social and political theory and evaluate theories of justice and how to be a responsible member of society. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

Physical Education/Health Education
Formerly kinesiology, physical education is a general requirement for graduation. Students are expected to complete two semesters of physical education activity, unless exempted by one of the following rules: (1) Veterans or Active Duty military personnel from the U.S. armed forces that have completed basic training; (2) physically handicapped persons who file statements from family physicians stating that the students are physically unable to participate. Only physical education activity courses meet the physical education requirements for graduation, unless otherwise stipulated in the course description. Students may not concurrently enroll in two or more sections of the same physical education activity course. The same activity course may be applied twice toward degree requirements if taken during different semesters.

PHED 1101 Beginning Tennis
This course introduces students to beginning skills and strategies in tennis. Lecture topics include history, rules, strategy (both singles and doubles), etiquette, proper care and selection of equipment and proper attire. (1:0-3)

PHED 1102 Advanced Tennis
This course includes instruction of advanced techniques, development of a variety of strokes, singles and doubles strategy in game situations and USTA tournament rules and procedures. Prerequisite: PHED 1101 or department chair approval (1:0-3)

PHED 1104 Volleyball
The student will receive instruction in the skills of passing, setting, spiking, service and blocking. Basic offensive and defensive strategies, rules, tournament play, and officiating will be covered. (1:0-3)

PHED 1105 Beginning and Intermediate Swimming
This course offers explanation, demonstration, and practice in the five basic strokes, diving, survival skills, and basic elements of water safety. (1:0-3)

PHED 1106 Canoeing
Lectures, demonstrations and practice in the basic skills and techniques of canoeing are included. Additional fee required. (1:0-3)

PHED 1107 Life Guarding and Life Guard Instruction
This course provides instruction in life guarding techniques and training for life guard teachers. Successful completion leads to American Red Cross certification. (1:0-3)

PHED 1109 Racquetball
This course introduces the student to the rules, terms, safety, basic skills and strategies necessary to play racquetball. (1:0-3)

PHED 1110 Advanced Racquetball
This course includes instruction in advanced techniques, stroke development, offensive and defensive strategies in game situations, refereeing, serving techniques and strategies, and tournament play. Prerequisite: PHED 1109 or department chair approval (1:0-3)

PHED 1111 Bowling
This course introduces the student to the basic skills and techniques of bowling. Class hours will include instruction in etiquette, selection of equipment, basic techniques, scoring, computing handicaps, league play, and a variety of tournaments. This course is conducted off-campus and requires an additional fee. (1:0-3)

PHED 1112 Badminton
This course covers lectures, demonstrations and practice in the basic skills and techniques of badminton. (1:0-3)
PHED 1113 Golf
Basic skills in playing golf are stressed, including rules and etiquette of the game. (1:0-3)

PHED 1114 Jogging
A variety of methods and materials are presented in the area of cardiovascular and overall physical fitness. (1:0-3)

PHED 1116 Water Aerobics
This is a total body fitness program including cardiovascular and muscular endurance, strength and flexibility in the water. Emphasis is placed on improving muscle tone and maintaining a healthy body weight through water fun and fitness activities. (1:0-3)

PHED 1117 Aerobic Activities
This is a cardiovascular conditioning program designed to improve muscle tone and to help maintain a healthy body weight through fun and fitness activities. (1:0-3)

PHED 1118 Advanced Aerobics
This course is an advanced cardiovascular conditioning program. It is designed to increase energy, mental clarity and health as part of one's lifestyle. This class will incorporate high energy and low impact movements. Some classes include bench-step aerobics. Prerequisite: PHED 1117 or department approval (1:0-3)

PHED 1119 Exercise for Health and Fitness
This course is designed to provide students with an essential knowledge of exercise and fitness on health using lecture, reading, labs on health related fitness components and fitness activities. This course will provide an understanding of cardiovascular disease, risk factors and the role of exercise in prevention. Labs will include fitness testing, self assessments and exploration to creative varied jazz dance forms, from blues to funky, stressing presentation and exploration to creative potential. (1:0-3)

PHED 1120 Basketball
This course covers basic skills and techniques of basketball. (1:0-3)

PHED 1121 Slow Pitch Softball
This course covers development of basic techniques and skills of slow-pitch softball. (1:0-3)

PHED 1122 Soccer
This course covers lectures, demonstrations and practice in basic skills and techniques of soccer. (1:0-3)

PHED 1123 Weight Training
This course covers lectures, demonstrations and practice in the basic skills and techniques of weight training. (1:0-3)

PHED 1124 Advanced Weight Training
This course builds upon basic skills and knowledge of weight training. Topics covered include advanced lifting technique, advanced training theory, biomechanics, and in-depth understanding of the components of fitness. Prerequisite: PHED 1123 or instructor approval (1:0-3)

PHED 1126 Team Sports
This course provides the student with opportunities to participate in a variety of team sports. Volleyball, basketball, flag football, soccer, softball, and floor hockey are included. (1:0-3)

PHED 1130 Modern Dance
This course covers the fundamental techniques of movement and practice in beginning composition. (1:0-3)

PHED 1131 Advanced Modern Dance
This course covers advanced skills and techniques in movement with emphasis on choreography. (1:0-3)

PHED 1133 Beginning Jazz
This course includes basics and background in jazz dance forms, from blues to funky, stressing presentation and exploration to creative potential. Beyond the beginning level of jazz. Prerequisite: PHED 1133 (1:0-3)

PHED 1134 Yoga I
This is an introduction to basic yoga postures, breathing, and relaxation techniques with emphasis on physical practice. (3:0-1)

PHED 1135 Social Dance
This course is designed to offer students instruction in the fundamentals of social dance patterns and the more basic ballroom dance steps. (1:0-3)

PHED 1136 Beginning Tap Dance
This course covers fundamentals of beginning tap movement and basic steps with emphasis on combination and techniques. (1:0-3)

PHED 1137 Beginning Ballet
This is an introduction to the theory and terminology of classical ballet with emphasis on techniques including barre and centre work. (1:0-3)

PHED 1138 Intermediate and Advanced Ballet
This course covers theory and terminology of pointe and pas de deux with greater emphasis on centre and allegro work. (1:0-3)

PHED 1139 Yoga II
This course is an extension of Yoga I, designed to provide students with expanded knowledge of management skills by placing emphasis on yoga’s strength, flexibility and stress reduction techniques. Lectures and practice will also focus on concentration techniques, nutrition and self-assessment. Prerequisite: Yoga I or instructor approval. (1:0-3)

PHED 1140 Martial Arts
Practice and training in the physical and psychological aspects of self-defense and sport is provided through vigorous flexibility, muscular endurance, and technical instruction. Technical instruction will include martial arts skills, combination tactics and sparring training using partner drills, solo work, and pad drills. (1:0-3)

PHED 1141 Advanced Jazz
This course is designed for the advanced jazz student who wants to develop technical expertise beyond the beginning level of jazz. Prerequisite: PHED 1133 (1:0-3)

PHED 1142 Fitness Swimming
This is a course designed to promote participation in the lifetime sport of swimming. Lectures and practice in the basic swimming strokes will be done. Daily workouts promoting cardiovascular endurance will be emphasized. Students should be good swimmers to take this class. (1:0-3)

PHED 1143 Fitness Walking
This course introduces students to walking as a lifetime fitness activity. Emphasis is placed on correct form and pacing to maintain working heart rate. Other topics covered are proper shoe selection, training principles for improved cardiovascular fitness, safety, and injury prevention. (1:0-3)

PHED 1144 Camping
This course includes lectures, demonstrations, practices and field trips related to camping. Other topics may be included such as hiking, backpacking and similar topics. (1:0-3)

PHED 1145 Kickboxing for Fitness
Kickboxing is a fitness program designed to improve muscle tone and cardiovascular endurance through constant motion and repetition using martial arts techniques. A variety of techniques and some martial arts applications are taught. (1:0-3)

PHED 1151 Scuba Diving
This is a beginning course in scuba diving. Student must furnish their own equipment and must be responsible for qualifying dives. (1:0-3)
PHED 1171 Varsity Soccer
In this course students participate in an advanced level of soccer as a member of the National Junior College Athletic Association. The course will include various systems of play, team defense and offensive strategy. Prerequisite: instructor approval (1:0-3)

PHED 1172 Varsity Cheerleading
Varsity cheerleading is designed to prepare a cheerleading squad for advanced skill development in cheers, chants, stunts, pyramids and dance routines for the purpose of promoting school spirit at athletic events and for entertainment at halftime. Prerequisite: instructor approval (1:0-3)

PHED 1173 Precision Dance
This course covers skills and techniques of precision group performance designed for the experienced performer. The course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1174 Varsity Volleyball-Women
This is a course designed for skilled volleyball players who are competing on a collegiate level. The course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1175 Varsity Basketball-Men (Central) -Women (North)
This is a course designed for skilled basketball players who are competing on a collegiate level. The course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1176 Varsity Baseball
This is a course designed for skilled baseball players who are competing on a collegiate level. The course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1177 Varsity Golf
This is a course designed for advanced golf players who are competing on a collegiate level. This course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1178 Varsity Tennis
This is a course designed for advanced tennis players who are competing on a collegiate level. The course may be taken a maximum of four times for credit. Prerequisite: instructor approval (1:0-3)

PHED 1179 Varsity Softball
This course is designed for advanced softball players who are competing on a collegiate level. Players are selected and prepared to represent San Jacinto College in the Texas Junior College Conference with the opportunity to advance to the regional and national tournaments. This program is governed by the rules of the National Junior College Athletic Association. Prerequisite: instructor approval (1:0-3)

PHED 1301 Foundations of Physical Education
This is a fundamental course in physical education which provides prospective teachers with a general concept of the philosophy and interpretation of physical education and related areas of health education, recreation, and dance. Designed for students majoring in physical education, this course will not satisfy the requirements for one hour of physical education activity. Prerequisite: Reading level 6 (3:3-0)

PHED 1304 Personal/Community Health I
This course covers investigation of the principles and practices in relation to personal and community health. Designed for students majoring in health education, allied health science, and elementary education, this course will not satisfy the requirements for one hour of physical education activity. Prerequisite: Reading level 6 (3:3-0)

PHED 1306 First Aid
This course covers instruction in and practice of first aid techniques. Topics covered are: general procedures at an accident scene, identifying and treating wounds, poisoning, drug abuse, burns, heat related illnesses, frostbite, hypothermia, sudden illness, bone and joint injuries, shock, bandaging techniques, transport techniques, and cardiopulmonary resuscitation. This course will not satisfy the requirements for one hour of physical education activity. (3:3-0)

PHED 1308 Officiating Major Sports
This course covers instruction and application in the fundamentals of sports officiating as they apply to football, volleyball, basketball, softball, track and field. Students will be required to officiate in the intramural program. This course will not satisfy the requirements for one hour of physical education activity. (3:3-0)

PHED 1332 Recreational and Elementary Game Skills
Students participate in basic motor skills, fitness and conditioning activities, tumbling, games and sports. This course will satisfy one hour of physical education activity. (3:3-0)

PHED 2140 Advanced Martial Arts
This course features advanced training in the physical and psychological aspects of street defense situations through vigorous flexibility, muscular endurance, and technical instruction and practice. Technical instruction will include martial art skills, combinations, and advanced training techniques. In addition, psychological strategies such as cognitive behavior modification, vision-motor behavior rehearsal and stress inoculation training will be taught. Prerequisite: PHED 1140 or instructor approval (1:0-3)

PHED 2155 Emergency Water Safety and Emergency Water Safety Instructor
This course covers instruction in emergency water safety and teaching techniques for all levels of swimming. This course leads to American Red Cross certification. (1:0-3)
**Course Descriptions**

**PTHA 1413 Functional Anatomy**
This is a study of human anatomy and its application to the motion of the musculoskeletal system as it relates to normal activities and dysfunctions. It includes integration of skills related to the kinesiological assessment of the human body. Prerequisite: PTHA 1201, corequisite: PTHA 1305 (4:3-4)

**PTHA 1431 Physical Agents**
This is a study of the biophysical principles, assessment, and application of therapeutic physical agents with specific emphasis on indications, contraindications, medical efficacy, and physiological effects. Prerequisites: successful completion of PTHA 1305 and PTHA 1413, corequisite: PTHA 2409 (4:3-4)

**PTHA 2409 Therapeutic Exercise**
This course presents a critical examination of concepts and application of techniques related to therapeutic exercise and functional training. Prerequisites: successful completion of PTHA 1305 and PTHA 1413, corequisite: PTHA 2431 (4:3-4)

**PTHA 2431 Management of Neurological Disorders**
This is an advanced course integrating previously learned and new skills/techniques into the comprehensive rehabilitation of selected neurological disorders. Prerequisite: successful completion of PTHA 1321, corequisites: PTHA 2435 and PTHA 2239 (4:3-4)

**PTHA 2435 Rehabilitation Techniques**
This is an advanced course integrating previously learned and new skills/techniques into the comprehensive rehabilitation of selected long-term pathologies. Prerequisite: successful completion of PTHA 1321, corequisites: PTHA 2431 and PTHA 2239 (4:3-4)

**PTHA 2460 Clinical II-PTA**
This is a method of instruction providing detailed education, training, work-based experience, and direct patient/client care generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement is the responsibility of the College faculty. The course may be repeated if topics and learning outcomes vary. Prerequisites: successful completion of PTHA 2431 and PTHA 2435 (4:0-17)

**PTHA 2461 Clinical III-PTA**
This is a method of instruction providing detailed education, training, work-based experience, and direct patient/client care generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement is the responsibility of the College faculty. The course may be repeated if topics and learning outcomes vary. Prerequisites: successful completion of PTHA 2431 and PTHA 2435 (4:0-17)

**Physics**

**PHYS 1401 College Physics I**
This course is designed primarily to meet the needs of the pre-professional and life science major. Problem-solving techniques without the use of calculus are developed in studying the topics of vectors, kinematics, forces, work and energy, momentum, torque, angular momentum, gravity, properties of solids and fluids, heat and thermodynamics. Prerequisites: MATH 1314 or approval by department chair and Reading level 7 (4:3-3)

**PHYS 1402 College Physics II**
This is a continuation of PHYS 1401. The topics covered are vibration and mechanical waves, sound, electrostatics, electromagneticism, light, optics, lenses and mirrors, relativity and some quantum physics. Prerequisite: PHYS 1401 (4:3-3)

**PHYS 1411 Astronomy I: Planetary**
Planetary Astronomy is the first of a two-semester survey course in astronomy, intended for both science and non-science majors. The course examines the history of astronomy, the physics of planetary motion and astronomical observation, the solar system, stars and star planet formation. Lab work will include computer exercises and paper and pencil exercises, laboratory experiments and assigned nighttime observations. Prerequisites: MATH 1314, Reading level 7, Writing level 7, Math level 9 (4:3-3)

**PHYS 1412 Astronomy II: Stellar/Galactic**
Astronomy II: Stellar/Galactic is the second of a two-semester survey course in astronomy, intended for both science and non-science majors. The course examines the history of astronomy, the physical or orbital motion applied to stellar motion, and astronomical observation, the stars, stellar formation, stellar evolution, deaths of stars, galaxies, galaxy clusters, and cosmology. Lab work will include computer exercises and paper and pencil exercises, laboratory experiments, and assigned nighttime observations. Prerequisites: MATH 1314, Reading level 7, Writing level 7, Math level 9 (4:3-3)

**Pipefitting**

**Non-Credit Continuing Education Courses**

**PFPB 1001 Pipefitting Certificate: Introduction to Pipefitting: Pipefitting 1B (Continuing Education Course)**
This course offers instruction in pipefitting hand and power tools, threaded pipe, ladders and scaffolds, motorized equipment, excavation, underground pipe and installation, drawings and detail sheets, piping systems, and trade math. 128 contact hours

**PFPB 1043 Pipefitting Fabrication and Blueprint Reading: Pipefitting II (Continuing Education Course)**
This course offers instruction in socket and butt weld pipe fabrication, rigging, pipe hangers and supports, advanced blueprint reading, standards and specifications, and advanced trade math. 128 contact hours

**PFPB 2032 Pipefitting Standards, Specifications, Installation: Pipefitting III (Continuing Education Course)**
This course promotes skill development related to these areas: motorized equipment, above-ground pipe installation valves, field routing and vessel trim, spring can supports, testing piping systems and equipment, basic plumbing, planning work activities, and non-destructive testing (NDT). 72 contact hours

**PFPB 2033 Pipefitting, Advanced Fabrication and Installation: Pipefitting IV (Continuing Education Course)**
This course promotes skill development in these areas: advanced pipe fabrication, aligning pipe to rotating equipment, steam traps, inline specialties, special piping, hot taps, and maintaining valves. 72 contact hours
Course Descriptions

Plumbing

Non-Credit Continuing Education Courses

PFPB 1001 Basic Pipefitting: Installation and Rigging (Plumbing IIA)  
(Continuing Education Course)  
This course offers instruction in threaded pipe and valve installation, rigging, safety procedures, trade math, and blueprint reading. 72 contact hours

PFPB 1003 Basic Plumbing Skills  
(Continuing Education Course)  
In this course students develop skills and knowledge required to install drains, sanitary sewers, water and natural gas supply lines, and fixtures commonly used in residential and light commercial buildings and facilities. 72 contact hours

PFPB 1071 Plumbing Standards for Water Supplies  
(Continuing Education Course)  
This course focuses on the installation of water service from the installation of valves and faucets to connecting to water mains. It covers both residential and commercial settings. 72 contact hours

PFPB 2031 Advanced Technologies and Specialized Applications for Piping Trades (Plumbing IVB)  
(Continuing Education Course)  
This course offers instruction in new plumbing techniques and materials in the pipe trades. Topics include specialized piping/fitting procedures for specific industrial applications and upgrades to techniques and practices designed to deal with federal, state, and local environmental and safety regulations. 72 contact hours

PFPB 2032 Pipefitting Standards, Specifications, Installation  
(Continuing Education Course)  
This course promotes skill development related to these areas: motorized equipment, above-ground pipe installation valves, field routing and vessel trim, spring can supports, testing piping systems and equipment, basic plumbing, planning work activities, and non-destructive testing (NDT). 72 contact hours

PFPB 2033 Pipefitting, Advanced Fabrication and Installation (Plumbing IIIA)  
(Continuing Education Course)  
This course promotes skill development related to these areas: advanced pipe fabrication, aligning pipe to rotating equipment, stream traps, in-line specialties, special piping, hot taps, and maintaining valves. 72 contact hours

PFPB 2071 Installation and Repair of Potable Water Systems  
(Continuing Education Course)  
This course focuses on the plumbing of potable water systems according to local plumbing codes. Methods of filtering and softening water systems are also discussed. 72 contact hours

Process Technology

CTEC 1401 Applied Petrochemical Technology  
This course offers instruction in the basic principles of physics and its application to process facilities. Topics include physical laws and properties and how these relate to the operation of processes. Students define terms and principles of applied physics; solve problems using basic laws of physics; and apply principles of physics to the operation of plant equipment. Prerequisite: MATH 1333 (4:3-3)

CTEC 2386 Internship Chemical Technology/Technician  
This course is designed to provide advanced students with work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the College and the employer. The student will be assigned an industry mentor who will work with the student's instructor to assure that student learning outcomes are achieved. The instructor will visit the work site to evaluate student progress through interviews with both the student and the industry mentor. This may be a paid or unpaid position. Prerequisite: PTAC 1410 (3:0-18)

PTAC 1302 Introduction to Process Technology  
This is an introduction to the processing industries. This is a survey of all process technology courses in the program. The student will describe the roles, responsibilities, and work environment of a process technician; name basic processes, equipment and systems; describe safety, environmental, and quality concepts. (3:3-0)

PTAC 1308 Safety, Health, and Environment I  
This course promotes development of knowledge and skills to reinforce the attitudes and behaviors required for safe and environmentally sound work habits. It covers safety, health, and environmental issues in the performance of all job tasks and regulatory compliance issues. The student will list components of typical plant safety and environmental program; describe the role of a process technician in relation to safety, health, and environment; and describe safety, health, and environmental equipment uses. (3:3-0)

PTAC 1332 Process Instrumentation I  
This is a study of instruments and control systems used in the process industry including terminology, process variables, symbology, control loops, and basic troubleshooting. As a part of the course, each student will identify and explain the function of the various instruments used in the process industry, diagram the process control elements in a control loop, and define and apply terms and symbols used in instrumentation. Prerequisite: MATH 1333 (3:3-1)

PTAC 1350 Industrial Economics  
This course is an examination of the profitability factors of plant operations including personnel and business strategies. As a part of this course, students will describe plant operations from a business perspective, explain the impact of operation on profitability, and interpret stock market factors and annual reports. Prerequisite: PTAC 2420 (3:3-0)

PTAC 1410 Process Technology I - Equipment  
This course offers instruction in the use of common process equipment. The student will identify process equipment components; use appropriate terminology to describe components of process equipment; describe basic functions of process equipment, and relate specific principles associated with process equipment. (4:3-3)

PTAC 2302 Process Sampling and Analysis  
This is a study of sampling techniques and online and laboratory analyzers. The student will demonstrate proper sampling technique; explain the operation of common online and laboratory analyzers; and utilize analytical data for process optimization. Prerequisite: college-level applied general chemistry (3:3-3)

PTAC 2314 Principles of Quality  
In this study of the background and application of quality concepts, topics include team skills, quality tools, statistics, economics and continuous improvement. As part of the course, students use statistical process control to collect, organize, and analyze data; describe the principles of quality control; demonstrate team skills; and apply quality tools to process systems. (3:3-0)

PTAC 2334 Industrial Process  
This is a study of the processes employed in petroleum refining and chemical plant operations. The student will illustrate and explain refinery processes and chemical processes typical to the area. Prerequisite: PTAC 2420 (3:3-0)
PTAC 2336 Process Instrumentation II
This course provides a continued study of the instruments and control systems used in the process industries, including terminology, process variables, symbology, control loops, and troubleshooting. The students will utilize instruments in the process industry, diagram the process control elements in a control loop, apply terms and symbols used, and troubleshoot and adjust the process systems. It is not intended to give the student an understanding equal to that of an instrumentation student, but does offer an overview of how systems are used to control a process. (3:3-1)

PTAC 2348 Safety, Health, and Environment II
This is a continued instruction in the application of concepts presented in Safety, Health, and Environment I. It covers emergency response concepts. The student will demonstrate appropriate response to emergency situations; recognize hazardous situations for personnel, environment, and community; and apply team skills in response to emergency situations. Prerequisite: PTAC 1308 (3:3-0)

PTAC 2420 Process Technology II - Systems
This is a study of the various process systems, including related scientific principles. As a part of this course, students describe the purpose and function of common process systems, and operate each process system. Prerequisite: PTAC 1410 (4:3-3)

PTAC 2438 Process Technology III - Operations
This course emphasizes activities associated with process operations. Students write and follow procedures and operate actual equipment. As a part of this course, students operate various process systems; work in self-directed teams; write and follow safety and operational procedures; collect and interpret data; and troubleshoot various process problems. Prerequisite: PTAC 1332 and PTAC 2420 (4:3-3)

PTAC 2446 Process Troubleshooting
This course includes instruction in the different types of troubleshooting techniques, procedures, and methods used to solve process problems. Topics include application of data collection and analysis, cause-effect relationships, and reasoning. The student will explain steps in troubleshooting models; demonstrate use of troubleshooting tools; and apply troubleshooting techniques to process problems. The application of computerized process control is a major part of this course. Prerequisite: PTAC 2336 and PTAC 2420 (4:3-3)

PTAC 1301 Introduction to Petroleum Industry
This is an introduction to the various aspects of petroleum industry including equipment, systems, instrumentation, operations, and the various scientific principles. It addresses a variety of petroleum technologies: exploration, drilling, production, transportation, marketing, and chemical processing industries. Students identify the concepts of exploration, production, refining, marketing, and transportation; and describe the terms and phrases associated with petroleum industry. (3:3-0)

PTRT 1401 Overview of Petroleum Industry
This is an overview of the entire petroleum industry, including purposes and proper procedures in a variety of different petroleum technologies: exploration, drilling, production, transportation, marketing, and refining. Students will analyze relationships between finding, producing, and transporting oil and gas; and select and use terms and phrases associated with the petroleum industry. Prerequisite: PTAC 2410 (4:3-3)

SCIT 1414 Applied General Chemistry I
This course offers applications of general chemistry emphasizing industry-related laboratory skills and competencies including laboratory safety and report writing. It addresses supporting chemical theories including atomic and molecular structure, nomenclature, chemical reactivity, gas laws, acids and bases, and solutions. The student will demonstrate industry-related laboratory skills including measuring physical and chemical properties of matter, performing chemical calculations, naming and writing relationships; describe basic atomic molecular structure; write laboratory reports; and apply safe laboratory practices. Prerequisite: MATH 1333 (4:3-3)

SCIT 1495 Special Topics in Analytical Chemistry
This course covers current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. It introduces basic chemistry principles, such as the periodic classification of elements, structure of matter, chemical bonding, formulas and chemical reactions. It presents properties of acids and bases and their application in the clinical setting. It also includes a brief introduction to organic chemistry, structures of carbohydrates, lipids and proteins. It relates topics to their significance in the performance of laboratory testing as well as human health and body function. Prerequisite: MLAB 1201 (4:4-0)

Psychology
A student who plans to major in psychology should take the following courses at San Jacinto College for transfer to the university or college of his/her choice: PSYC 2301, PSYC 2317, and PSYC 2319.

SYC 1300 Foundations for Success
This course provides a study of the research and theory of the psychology of learning, cognition, and motivation including factors that impede learning, and applications of learning strategies. Students will be expected to continually integrate and apply skills learned in this course to become effective and efficient learners. This course is also listed as EDUC 1300; however, a student cannot earn credit hours for both PSYC 1300 and EDUC 1300. Prerequisites: Math level 4, Reading level 6, Writing level 6 (3:3-0)

PSYC 2301 General Psychology
This is a survey of the field of general psychology and a study of the native and acquired controls of human behavior with emphasis on the mental process and the development of personality. Prerequisite: Reading level 7 (3:3-0)

PSYC 2306 Human Sexuality
This course covers the physical, psychological, and sociological facets of human sexuality. The course exposes students to the various scholarly research in this interdisciplinary field. Emphasis is placed on self-awareness of one’s own sexuality and adjustment, the interpersonal aspects of sexuality, and the social impact that sexual decisions and behavior have on society. This course is also listed as SOCI 2306; however, credit hours are limited to either Psychology or Sociology. Prerequisites: SOCI 1301 or PSYC 2301, Reading level 7, Writing level 7 (3:3-0)

PSYC 2308 Child Growth and Development
This is a study of child growth and development with specific emphasis on the physiological and psychological changes and problems which the child may experience before reaching adolescence. Prerequisites: PSYC 2301, Reading level 7, Writing level 7 (3:3-0)

PSYC 2314 Lifespan Growth and Development
This is a study of the relationship of the physical, emotional, social and mental factors of growth and development through the human lifespan. Prerequisites: PSYC 2301, Reading level 7, Writing level 7 (3:3-0)
PSYC 2315 Psychology of Adjustment
This course is the study of the processes involved in adjustment of individuals to their personal and social environments. This course is designed to study the basic principles and various theories of effective behavior which underlie personal adjustment. This course probes the human dilemma, the personal and social context of behavior, the search for values and methods for personal growth. Prerequisites: PSYC 2301, Reading level 7, Writing level 7 (3:3-0)

PSYC 2317 Elementary Statistics
This course is a study of the basic statistical concepts and techniques of descriptive and inferential statistics as used in psychological and educational research. Included are frequency distributions and graphs, measures of central tendency and variability, interpretation of individual scores, correlations and prediction, the logic of inferential statistics, t-test, analysis of variance, and some nonparametric statistics including chi square. Prerequisites: PSYC 2301, Reading level 7, and Writing level 7 (3:3-0)

PSYC 2319 Introduction to Social Psychology
This course studies behavior of the individual in the group. The course includes group interaction, leadership, motivation, problems in attitudes, prejudice, prosocial behavior, aggression, love, environmental influences on behavior and gender identity and sexual behavior. Prerequisites: PSYC 2301, Reading level 7, and Writing level 7 (3:3-0)

Reading

READ 0308 Basic Reading Skills
This course is designed to improve basic reading skills. Following assessment, the student will be taught word recognition, basic vocabulary skills, and literal comprehension, such as main idea and details. This course is not applicable to any degree. Prerequisite: Reading level 2 (3:3-2)

READ 0309 Reading Comprehension
This intermediate reading course is designed to continue the sequential process of reading with emphasis on reading comprehension and vocabulary development. Selected readings will be used for intensive work in literal and inferential meanings. This course is not applicable to any degree. Prerequisite: a grade of C or above in READ 0308 or reading score within defined range. (3:3-1)

READ 0310 College Reading Techniques
This course is designed for the development of reading skills beyond the basic skills on an individual basis. Emphasis is placed on further development of comprehension, vocabulary, and interpretation of nonfiction articles and reading speed. This course is not applicable to any degree. Prerequisite: a grade of C or above in READ 0309 or reading score within defined range. (3:3-0)

READ 0311 Speed Reading
This course is designed primarily for students who read at or above the 12th grade reading level. Emphasis is placed on increased comprehension, reading speed, critical reading, vocabulary expansion and reading flexibility. This course is for personal enrichment; it is not part of our sequential reading program nor does it transfer as credit toward any degree. Prerequisite: Reading level 7 (3:3-0)

Real Estate

RELE 1201 Principles of Real Estate
This is a beginning overview of licensing as a real estate broker or salesperson. It includes ethics of practice as a license holder, titles to and conveyance of real estate, legal descriptions, deeds, encumbrances and liens, distinctions between personal and real property, appraisal, finance and regulations, closing procedures, and real estate mathematics. It covers at least three hours of classroom instruction on federal, state, and local laws relating to housing discrimination, housing credit discrimination, and community reinvestment. It fulfills at least 30 to 60 hours of required instruction for salesperson license. (2:2-0)

RELE 1238 Principles of Real Estate II
This is a continuing overview of licensing as a broker or salesperson. It includes ethics of practice as a license holder, titles to and conveyance of real estate, legal descriptions, deeds, encumbrances or liens, distinctions between personal and real property, appraisal, finance and regulations, closing procedures, and real estate mathematics. It covers at least three hours of classroom instruction on federal, state, and local laws relating to housing discrimination, housing credit discrimination, and community reinvestment. It fulfills at least 30 of 60 hours of required instruction for salesperson license. (2:2-0)

RELE 1303 Real Estate Appraisal
This is the study of the central purposes and functions of an appraisal, social and economic determinants of value, appraisal case studies, cost, market data and income approaches to value estimates, final correlations, and reporting. It is recommended that the student should take or have taken RELE 1201. (3:3-0)

RELE 1307 Real Estate Investments
This is a study of the characteristics of real estate investments. This includes techniques of investment analysis, time-valued money, discounted and non-discounted investment criteria, leverage, tax shelters, depreciation, and applications to property tax. It is recommended that the student should take or have taken RELE 1201. (3:3-0)

RELE 1309 Real Estate Law
This is a study in legal concepts of real estate, land description, real property rights, estates in land, contracts, conveyances, encumbrances, foreclosures, recording procedures, and evidence of title. It is recommended that the student should take or have taken RELE 1201. (3:3-0)

RELE 1311 Law of Contracts
This course covers elements of a contract, offer and acceptance, statute of frauds, specific performance and remedies for breach, unauthorized practice of law, commission rules relating to use of adopted forms, and owner disclosure requirements. (3:3-0)

RELE 1319 Real Estate Finance
This is the study of monetary systems, primary and secondary money markets, sources of mortgage loans, federal government programs, loan applications, processes and procedures, closing costs, alternative financial instruments, equal credit opportunity laws affecting mortgage lending, Community Reinvestment Act, and the state housing agency. (3:3-0)

RELE 1321 Real Estate Marketing
This is a study of real estate professionalism and ethics, characteristics of successful salespersons, time management, psychology of marketing, listing procedures, advertising, negotiation and closure of financing, and the Deceptive Trade Practices-Consumer Protection Act. It is recommended that the student should take or have taken RELE 1201. (3:3-0)

RELE 1325 Real Estate Mathematics
This course covers basic arithmetic skills. Includes mathematical logic, percentages, interest, time value of money, depreciation, amortization, proration, and estimation of closing statement. (3:3-0)
Course Descriptions

RELE 2301 Law of Agency
This course is a study of law of agency including principal-agent and master-servant relationships, the authority of an agent, the termination of an agent’s authority, the fiduciary and other duties of an agent, employment law, deceptive trade practices, listing or buying representation procedures, and the disclosure of an agency. (3:3-0)

RELE 2331 Real Estate Brokerage
This course is a study of law of agency, planning and organization, operational policies and procedures, recruiting, selection and training of personnel, records and control, and real estate firm analysis and expansion criteria. It is recommended that the student should take or have taken RELE 1201. (3:3-0)

RELE 2366 Practicum-Real Estate
This is a basic or intermediate type of non-health professions work-based instruction that provides basic career exploration or helps students gain practical experience in the discipline, enhance skills, and integrate knowledge. The emphasis is on practical work experience. Indirect supervision is provided by the work supervisor. A practicum may be paid or unpaid learning experience. The College with the employer develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. Prerequisite: must have a job (paid or unpaid) working in a real estate related position at least 20 hours per week (3:0-21)

RELE 2367 Practicum-Real Estate
This is a basic or intermediate type of non-health professions work-based instruction that provides basic career exploration or helps students gain practical experience in the discipline, enhance skills, and integrate knowledge. The emphasis is on practical work experience. Indirect supervision is provided by the work supervisor. A practicum may be paid or unpaid learning experience. The College with the employer develops and documents an individualized plan for the student. The plan relates the workplace training and experiences to the student’s general and technical course of study. Prerequisite: must have a job (paid or unpaid) working in a real estate related position at least 20 hours per week (3:0-21)

RSPT 1267 Respiratory Care Practicum I
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. The course provides the student with the opportunity to learn about the hospital environment and the respiratory care department. It includes basic cardiopulmonary resuscitation, basic patient care skills, patient assessment, gas and aerosol therapy, hyperinflation therapy, chest physiotherapy, airway care, and arterial blood gas sampling and analysis. Prerequisites: HPRS 1106, RSPT 1325, RSPT 1340, RSPT 1429, RSPT 1431 (2:0-16)

RSPT 1325 Respiratory Care Sciences
This is a study of cardiopulmonary sciences including physics, math, chemistry, and statistics. (3:3-0)

RSPT 1340 Advanced Cardiopulmonary Anatomy and Physiology
This course provides an advanced presentation of anatomy and physiology of the cardiovascular and pulmonary system. (3:3-1)

RSPT 1429 Respiratory Care Fundamentals I
This course provides an introduction to the knowledge and skills for respiratory care including history, medical terms/symbols, medical/legal, infection control, vital signs, physical assessment, chest x-ray interpretation, medical gas therapy, oxygen analyzers, and humidity/aerosol therapy. (4:3-3)

RSPT 1431 Respiratory Care Fundamentals II
This course provides a continuation of knowledge and skills for respiratory care including lung expansion therapy, bronchodilatory hygiene therapy, artificial airways, manual resuscitation devices, suctioning, pulse oximetry, bedside spirometry, arterial sampling techniques and blood gas analysis and interpretation. Prerequisites: HPRS 1106, RSPT 1325, RSPT 1340, RSPT 1429, RSPT 1267. (4:3-3)

RSPT 2130 Respiratory Care Examination Preparation
This course is a comprehensive review to optimize respiratory care credentialing exam success. Prerequisites: RSPT 2266 and RSPT 2353 (1:1-1)

RSPT 2167 Respiratory Care Practicum II
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. This course is designed to provide increased exposure to management of the critically ill patient. It includes active participation in physician rounds, and specialized monitoring. It also includes presentation of patient studies in a panel discussion format and practical aspects in the formulation of respiratory care plans. Prerequisite: RSPT 1267, co-requisite: RSPT 2314 (1:0-10)

RSPT 2258 Respiratory Care Patient Assessment
This course covers integration of patient examination techniques, including patient history and physical exam, lab studies, X-ray, pulmonary function, arterial blood gases, and invasive and noninvasive hemodynamics. Prerequisite: RSPT 2256 (2:2-1)

RSPT 2266 Respiratory Care Practicum III
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, the College, and student. This course provides the student with an opportunity to care for the critically ill pediatric and neonatal patient. This course includes active participation in physician rounds, with special monitoring instrumentation and techniques of the pediatric and neonatal patient. Emphasis is also placed on special problems with ventilation, and includes presentation of patient studies with practical aspect in the formulation of a respiratory care plan. Prerequisite: RSPT 2167, co-requisite: RSPT 2353 (2:0-16)

RSPT 2267 Respiratory Care Practicum IV
This course offers practical, general workplace training supported by an individualized learning plan developed by the employer, College, and student. This course provides the student with the opportunity to observe and study diagnostic testing of the pulmonary system. Through specialty rotations in the emergency room, emergency triage and care of the traumatically injured patient are demonstrated to the student. The student is presented the opportunity to refine skills in assessment and procedures via rotations through the adult intensive care units. Instruction in the Advanced Cardiac Life Support (ACLS) program of the American Heart Association will be provided. Prerequisite: RSPT 2266, co-requisite: RSPT 2258 (2:0-16)

RSPT 2310 Cardiopulmonary Disease
This course covers etiology, pathogenesis, pathology, diagnosis, history, prognosis, manifestations, treatment, and detection of cardiopulmonary diseases. Prerequisite: RSPT 1340 (3:3-0)

Respiratory Care

HPRS 1106 Essentials of Medical Terminology
This course is a study of medical terminology, word origin, structure and application. (1:1-0)
RSPT 2314 Mechanical Ventilation
This course is a study of mechanical ventilation with emphasis on ventilator classification, methods, principles, and operational characteristics. It includes indications, complications and physiologic effects/principles of mechanical ventilation. It emphasizes initiation, management, and weaning of ventilatory support. Prerequisites: RSPT 1431, RSPT 2310, co-requisite: RSPT 2167 (3:3-1)

RSPT 2317 Respiratory Care Pharmacology
This course is a study of drugs that affect cardiopulmonary systems, with an emphasis on classification, route of administration, dosages/calculations, and physiological interactions. (3:3-0)

RSPT 2353 Neonatal/Pediatric Cardiopulmonary Care
This course is a study of acute care, monitoring and management as applied to the neonatal and pediatric patient. Co-requisite: RSPT 2266 (3:3-1)

RSPT 2355 Critical Care Monitoring
This is an introduction to monitoring techniques used clinically to assess a patient in the critical care setting. Prerequisite: RSPT 1340, RSPT 2310, co-requisite: RSPT 2167 (3:3-1)

Restaurant Management
(See Culinary Arts)

Sheet Metal

Sheet Metal Certificate
Non-Credit Continuing Education Courses

MCHN 1001 Sheet Metal I
(Continuing Education Course)
This is an introduction to the materials, tools, and techniques used in the sheet metal industry. It reviews trade math problems involving measurement of lines, area, volume, weight, and geometric figures. The course focuses on types and uses of hand, layout, and cutting tools along with bending and forming machines. Students practice using material of various type and properties as they apply the principles of layout and metal forming. 72 contact hours

MCHN 1049 Sheet Metal II
(Continuing Education Course)
In this introduction to various types of pipe and fittings, emphasis is on principles and types of fittings for radial line development and on factors that influence bend allowances and calculations necessary for determining proper bend allowances. The course also focuses on principles of soldering roof flashings, gutters, down spouts, and sheet metal duct fabrications. 72 contact hours

MCHN 1053 Sheet Metal III
(Continuing Education Course)
This is an introduction to the principles of airflow as applied to HVAC air distribution systems, components of HVAC, and the basic refrigeration cycle. The course introduces students to welding, brazing, and field measurements along with extensive triangulation layout, fabrication and fiberglass ductwork. 72 contact hours

MCHN 1071 Sheet Metal IIB
(Continuing Education Course)
In this continuation of the study of various types of pipe and fittings, emphasis is on using blueprints and shop drawings to determine bend allowances and on calculations necessary for determining proper bend allowances in soldering roof flashings, gutters, down spouts, and sheet metal duct fabrications. 72 contact hours

MCHN 1072 Sheet Metal IIIIB
(Continuing Education Course)
This is a continuation to the study of triangulation layout and fabrication and fiberglass ductwork. It focuses on application of field measurements for layout and installation of duct sections and offsets. 72 contact hours

MCHN 2030 Sheet Metal IV
(Continuing Education Course)
This course is a comprehensive review of developmental and fabrication techniques. It also provides an introduction to the concepts of shop production and organization, and to elements of air balance and specialty applications related to louvers, dampers, access doors, ventilators, and fume and exhaust systems. 72 contact hours

MCHN 2071 Sheet Metal IVB
(Continuing Education Course)
This course offers extensive practice in the application of parallel line development, radial line development, and triangulation methods of fabrication used in the layout and fabrication of sheet metal air systems. 72 contact hours

Sociology

SOCI 1301 Introduction to Sociology
This is a study of the patterns of social behavior. The student is introduced to the scope and the objectives of sociology as well as to basic sociological concepts. Prerequisite: Reading level 6 (3:3-0)

SOCI 1306 Social Problems
This is a study of the problems of social disorganization such as crime, delinquency, group prejudice, dependency, divorce and world social problems. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

SOCI 2301 Intimate Relationships: Marriage and Family
This is a study of the issues and trends relating to courtship, mate-selection and marital adjustment, together with a comprehensive study of the family as a social institution. Prerequisites: Reading level 7 and Writing level 7 (3:3-0)

SOCI 2306 Human Sexuality
This course covers the physical, psychological, and sociological facets of human sexuality. The course exposes students to the various scholarly research in this interdisciplinary field. Emphasis is placed on self-awareness of one’s own sexuality and adjustment, the interpersonal aspects of sexuality, and the social impact that sexual decisions and behavior have on society. This course is also listed as PSYC 2306; however, credit hours are limited to either psychology or sociology. Prerequisites: SOCI 1301 or PSYC 2301, Reading level 7, and Writing level 7 (3:3-0)

SOCI 2319 Multi-Cultural Studies
This is a study of the principal minority groups in American society and other selected cultures: their history, sociological significance, problems of inter-group relations, social movement, and related contemporary problems with particular emphasis on the ethnic components of Texas society. Prerequisites: Reading level 7, Writing level 7 (3:3-0)

SOCI 2336 Criminology
This is an examination of current trends in the nature and causes of crime, indexes of crime, perspectives and methods in criminology, psychopathy and crime, culture areas and crime, processes in criminal behavior, and sociological aspects of criminal law and procedure. Prerequisites: SOCI 1301, Reading level 7 and Writing level 7 (3:3-0)
Course Descriptions

Speech

SPCH 1145 Forensic Activities
This course includes intensive preparation for intercollegiate competition in debate and/or speech events. The course may be taken a maximum of four times for credit. Prerequisite: Reading level 7 (1:0-3)

SPCH 1315 Public Speaking
This is an introduction to public speaking. It includes training in principles of composition and delivery and an introduction to various types of speaking situations. Prerequisite: Reading level 6 (3:3-0)

SPCH 1318 Interpersonal Communications
This course covers the theory and practice of person-to-person interaction, including the study of listening, verbal communication and non-verbal communication. Prerequisite: Reading level 6 (3:3-0)

SPCH 1321 Business and Professional Speech
This is a course designed to develop the student’s ability to communicate effectively in situations that arise in business and professional life. Topics will include communication theory; the research, organization and presentation of business speeches; small group discussion; and interviewing. Prerequisite: Reading level 6 (3:3-0)

SPCH 1342 Voice and Diction
This course covers instruction in the development of effective habits in the use of the speaking voice. It covers the study of English phonetics, phrasing, intonation and voice production. Training is given to enable the student to listen intelligently to the sound of his/her own voice. Students cannot receive credit for both SPCH 1342 and DRAM 2336. Prerequisite: Reading level 6 (3:3-0)

SPCH 2333 Discussion and Small Group Communication
This course includes discussion and small group theories and techniques as they relate to group processes and interaction. Prerequisite: Reading level 7 (3:3-0)

SPCH 2335 Argumentation and Debate
This course includes instruction in the principles of argumentation and debate; analysis and discussion of current public questions in briefing, strategy and refutation. Students will not receive credit for both SPCH 2335 and SPCH 2336. Prerequisite: Reading level 7 (3:3-0)

SPCH 2336 Forensics
This is open to students in interpretation and forensics as related to competition and public performance. Students will not receive credit for both SPCH 2335 and SPCH 2336. Prerequisite: Reading level 7 (3:3-0)

SPCH 2341 Oral Interpretation
This course covers an introduction to oral interpretation of literature, including preparation and reading of printed material, and practical experience in storytelling and choral speaking. Instruction in techniques and analysis of literature will be read aloud. It covers the techniques of oral reading. Students cannot receive credit for both SPCH 2341 and DRAM 2341. Prerequisite: Reading level 6 (3:3-0)

Surgical Technology

HPRS 2200 Pharmacology for Health Professions
This is a study of drug classifications, actions, therapeutic uses, adverse effects, routes of administration, and calculation of doses. (2:2-0)

HPRS 2301 Pathophysiology
This is a study of the pathology and general health management of diseases and injuries across the life span. Topics include etiology, symptoms, and physical and psychological reactions to diseases and injuries. (3:3-0)

SRGT 1201 Medical Terminology
This course is a study of the basic structure of medical words including prefixes, suffixes, roots, combining forms, plurals, pronunciation, spelling and the definitions of medical terms. Emphasis is on building a vocabulary required for practice within allied health care professions. Prerequisites: Reading level 7 and Writing level 6 (2:2-0)

SRGT 1260 Clinical I Surgical
This is a method of instruction providing detailed education, training and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation and placement is the responsibility of the College faculty. Clinical experiences are unpaid external learning experiences. The course may be repeated if topics and learning outcomes vary. Introductory level. Prerequisites: Reading level 7, Writing level 6, and prerequisites or co-requisites: SRGT 1509 and SRGT 1260 (3:5-1)

SRGT 1261 Clinical III Surgical
This is a method of instruction providing detailed education, training and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation and placement is the responsibility of the College faculty. Clinical experiences are unpaid external learning experiences. The course may be repeated if topics and learning outcomes vary. Advanced level. Prerequisites: SRGT 1201, 1260, 1360, 1471, 1505, 1509, 1541; HPRS 2200, 2301, prerequisites or co-requisites: SRGT 1542, 2130 (2:0-12)

SRGT 1360 Clinical II Surgical
This is a method of instruction providing detailed education, training and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation and placement is the responsibility of the College faculty. Clinical experiences are unpaid external learning experiences. The course may be repeated if topics and learning outcomes vary. Intermediate level. Prerequisites: Reading level 7, Writing level 6, and co-requisite: SRGT 1541 (3:0-14)

SRGT 1471 Anatomy and Physiology for Surgical Technology
This course will introduce a foundation for anatomy and physiology which focuses on relations to surgical intervention and perioperative care. Prerequisites: Reading level 7, Writing level 6, and SRGT 1201. (NOTE: Credit will not be given for both VNSG 1420 and SRGT 1471.) (4:4-0)

SRGT 1505 Introduction to Surgical Technology
This is an orientation to surgical technology which covers surgical pharmacology and anesthesia, patient care concepts, electricity, basic computer skills, and technological sciences as related to the Surgical Technologists. Prerequisites: Reading level 7, Writing level 6, and prerequisite or co-requisites: SRGT 1509 and SRGT 1260 (5:5-1)
SRGT 1509 Fundamentals of Perioperative Concepts and Techniques
This course is an in-depth coverage of perioperative concepts such as aseptic/sterile principles and practices, infectious processes, wound healing, and creation and maintenance of the sterile field. Certain subject matters of technological sciences will be addressed. Prerequisites: Reading level 7, Writing level 6, and prerequisites or co-requisites: SRGT 1505 and SRGT 1260 (5:4-3)

SRGT 1541 Surgical Procedures I
This is an introduction to surgical procedures and related pathologies, with an emphasis on surgical procedures related to general, obstetrics/gynecology, genitourinary, otorhinolaryngology and orthopedic surgical specialties incorporating instruments, equipment, and supplies required for perioperative patient care. Prerequisites: SRGT 1201, 1260, 1471, 1505, 1509, prerequisite or co-requisites: SRGT 1360; HPRS 2200, 2301 (5:5-0)

SRGT 1542 Surgical Procedures II
This is an introduction to surgical procedures and related pathologies, with an emphasis on surgical procedures related to thoracic, peripheral vascular, plastic/reconstructive, ophthalmology, cardiac, and neurological surgical specialties incorporating instruments, equipment, and supplies required for perioperative patient care. Prerequisites: SRGT 1201, 1260, 1360, 1471, 1505, 1509, 1541; HPRS 2200, 2301, prerequisite or co-requisites: SRGT 1261, 2130 (5:5-0)

SRGT 2130 Professional Readiness
This course is a transition into the professional role of the surgical technologist. It includes professional readiness for employment, attaining certification, and maintaining certification status. Prerequisites: SRGT 1201, 1260, 1360, 1471, 1505, 1509, 1541; HPRS 2200, 2301, prerequisite or co-requisites: SRGT 1261 and 1542 (1:1-0)

SRGT 2371 Special Cases/Needs
This course provides specific techniques and safety measures of laser technology in the operating room focusing on concepts of tissue interaction and problem solving. Analyzing needed surgical intervention for the trauma, pediatric and the oncology patient will be addressed. Prerequisites: HPRS 2200, HPRS 2301, SRGT 1201, SRGT 1260, SRGT 1360, SRGT 1405, SRGT 1409, SRGT 1441, VNSG 1420 (3:3:0)

Truck Driving (Commercial)

CVOP 1013 Commercial Vehicle Operator I
CVOP 1013 is the first of two 126-clock hour courses in Commercial Truck Driving. This course is designed to familiarize students with the basic operations of a tractor-trailer combination. It consists of thirty (30) hours of classroom lecture and demonstration, and ninety (90) hours of hands-on tractor-trailer operation. Co-requisite: CVOP 1040

CVOP 1040 Commercial Vehicle Operator II
CVOP 1040 is the second and final 120-clock hour course in Commercial Truck Driving. This course is designed to provide classroom instruction in loading and unloading, plus hands-on practice in routine equipment maintenance and making driver’s daily log book entries. Several long-haul trips are taken, and the Department of Transportation (DOT) written and driving exams are administered. Co-requisite: CVOP 1013

Vision Care Technology
(See Eye Care Technology)

Visual Communication
(See Art and Visual Communication)

Welding Technology

WLDG 1528 Introduction to Shielded Metal Arc Welding (SMAW)
This is an introduction to the shielded metal arc welding process. It covers power sources, electrode selection, oxy-fuel cutting, and various joint designs and instruction provided in SMAW fillet welds in various positions. (5:3-5)

WLDG 1530 Introduction to Gas Metal Arc Welding (GMAW)
This is a study of the principles of gas metal arc welding, setup and use of GMAW equipment, and safe use of tools and equipment. It includes instruction in various joint designs. (5:3-5)

WLDG 1534 Introduction to Gas Tungsten Arc Welding (GTAW)
This is an introduction to the principles of gas tungsten arc welding (GTAW), setup/use of GTAW equipment, and safe use of tools and equipment. It includes welding instruction in various positions on joint designs. (5:3-5)

WLDG 1535 Introduction to Pipe Welding
This is an introduction to welding of pipe using the shielded metal arc welding process, including electrode selection, equipment setup, and safe shop practices. It covers weld positions 1G and 2G using various electrodes. Prerequisite: WLDG 2543 or department chair approval (5:3-5)

WLDG 2543 Advanced Shielded Metal Arc Welding (SMAW)
This course covers advanced topics based on accepted welding codes. Training is provided with various electrodes in shielded metal arc welding with open V-groove joints in all positions. (5:3-5)

WLDG 2551 Advanced Gas Tungsten Arc Welding (GTAW)
This course covers advanced topics in GTAW welding, including welding in various positions and directions. (5:3-5)

WLDG 2553 Advanced Pipe Welding
This course covers advanced topics involving welding of pipe using the shielded metal arc welding process. Topics include electrode selection, equipment setup, and safe shop practices, with an emphasis on weld positions 5G and 6G using various electrodes. (5:3-5)

WLDG 2571 Advanced Gas Tungsten Arc Welding Stainless Steel
This is an in-depth study of welding stainless steel. Instruction is provided on SMAW and GTAW welding in various position groove welds. Prerequisite: WLDG 2551 or department chair approval (5:3-5)

WLDG 2580 Cooperative Education Welding
This course covers career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the College, employer, and student. Under the supervision of the College and the employer, the student combines classroom learning with work experience. It includes a lecture component. Prerequisite: None (5:1-28)
Non-Credit Continuing Education Courses

Welding Certificate

WLDG 1028 Introduction to Shielded Metal Arc Welding (SMAW)
This introduction to shielded metal arc welding process emphasizes power sources, electrode selection, oxy-fuel cutting, and various joint designs. Instruction also covers SMAW fillet welds in various positions. 128 contact hours

WLDG 1034 Introduction to Gas Tungsten Arc (GTAW) Welding
This is an introduction to the principles of gas tungsten arc welding (GTAW), setup/use of GTAW equipment, and safe use of tools and equipment. Welding instruction covers various positions on joint design. 128 contact hours

WLDG 1035 Introduction to Pipe Welding
This introduction to welding of pipe using the shielded metal arc welding process, includes electrode selection, equipment set-up, and safe shop practices, with an emphasis on weld positions 1G and 2G, using various electrodes. 128 contact hours

WLDG 2043 Advanced Shielded Metal Arc Welding (SMAW)
Training is provided with various electrodes in shielded metal arc welding processes with open V-groove joint positions based on accepted welding codes. 128 contact hours

WLDG 2051 Advanced Gas Tungsten Arc Welding (GTAW)
This course focuses on advanced topics in GTAW welding, including welding in various positions and directions. 128 contact hours

WLDG 2053 Advanced Pipe Welding
This course focuses on advanced topics involving welding of pipe using the shielded metal arc welding process. Topics include electrode selection, equipment setup, and safe shop practices, with an emphasis on weld positions 5G and 6G using various electrodes. 128 contact hours
