Certified Associate In Project Management
Exam Preparation

For organizations, the most significant benefit of PMI credentials is that it allows them to assemble project teams of credential holders and reap many rewards, ranging from improved processes and results to employee retention.

For individuals who obtain and maintain PMI credentials, you not only get recognized for your skills and knowledge during the vigorous credentialing process, but also show your dedication to the profession and professional development.

WHO SHOULD ATTEND Less experience project practitioner looking to demonstrate your commitment to project management, improve your ability to manage larger projects and earn additional responsibility, and stand out to potential employers, the CAPM certification is right for you. CAPM Requirements: A secondary diploma (high school or the global equivalent), At least 1,500 hour experience or 23 hours of project management education by the time you sit for the exam.

BENEFITS Completing this course will provide an overview of the knowledge required to successfully complete the CAPM Exam and acquire the mandatory 23 hours of project management education

LEARNING OBJECTIVES After completing this course, participants will be able to demonstrate increased knowledge of the expectations of a Certified Associate In Project Management (CAPM). This includes but is not limited to the ability to:

- Identify Project Management Body of Knowledge concepts, including the nine knowledge areas and process groups
- Discover your knowledge gaps by uncovering what you know and what you do not know
- Be prepped to take the exam – this is a prep course and a review course

Scholarship Available!! For those who qualify for the scholarship.
