

# Appendix 3 -NCCER Student Learning Outcomes (SLOs)

## NCCER Craft Training

Craft training is for individuals who would like to learn a craft and begin working in the construction industry.

In order to earn industry recognized NCCER credentials, a trainee needs to:

1. Complete training using NCCER Curriculum (“Knowledge Verified”): When a trainee completes and scores a passing grade on the curriculum, the trainee is considered “knowledge verified”. San Jacinto College CPET is an NCCER Accredited Training and Education Facility (ATEF) with facilities to offer the training courses listed below.
  - Core Curriculum: Introductory Craft Skills
  - Managing Electrical Hazards
  - Electrical Levels 1-4
  - Instrumentation Levels 1-4
  - Industrial Maintenance Electrical and Instrumentation Levels 1-4
  - Millwright Levels 1-5
  - Pipefitting Levels 1-4
  - Welding Levels 1-4
2. Pass an Assessment (“Performance Verified”): Assessments evaluate the competence level of experienced workers by documenting knowledge and verifying skills. Assessments must be conducted at an NCCER Assessment Center. San Jacinto College CPET is not currently an NCCER Assessment Center.
3. Confirm registration: “NCCER credentials are tracked through NCCER’s Registry System that allows organizations and companies to track the qualifications of their craft professionals and/or check the qualifications of possible new hires. NCCER’s Registry System also assists craft professionals by maintaining their records in a secure database.” <https://www.nccer.org/about-us>

**Knowledge Verified + Performance Verified = Certified**

### Core Curriculum: Introductory Craft Skills

- |  |  |
|--|--|
| <ol style="list-style-type: none"> <li>1. <b>Basic Safety (Construction Site Safety Orientation)</b> (00101 - 12.5 Hrs.)                     <ul style="list-style-type: none"> <li>• Importance of safety, causes of incidents, hazard recognition/control, HAZCOM, safety data sheet</li> <li>• Fall hazards, prevention, arrest, safe use of ladders, stairs, scaffolds</li> <li>• Identifying and avoiding: struck-by, caught-in-between, caught-in</li> <li>• Electrical safety guidelines, lockout/tagout</li> <li>• Personal protective equipment</li> <li>• Identifying other hazards (exposure, environmental, hot work, fire, confined spaces)</li> </ul> </li> <li>2. <b>Introduction to Construction Math</b> (00102 - 10 Hrs.)                     <ul style="list-style-type: none"> <li>• Whole numbers (adding, subtracting, multiplying, dividing); fractions and decimals</li> <li>• Rulers, tape measures, unit conversions</li> <li>• Angles, shapes, areas, volumes</li> </ul> </li> <li>3. <b>Introduction to Hand Tools</b> (00103 - 7.5 Hrs.)                     <ul style="list-style-type: none"> <li>• Hammers, demolition tools, chisels, punches, screwdrivers, wrenches, pliers, wire cutters</li> <li>• Measurement and layout: (rules, tapes, levels)</li> <li>• Cutting/shaping (handsaws, files, utility knives)</li> <li>• Shovels, picks, chain falls, come-alongs, clamps</li> </ul> </li> </ol> | <ol style="list-style-type: none"> <li>4. <b>Introduction to Power Tools</b> (00104 - 10 Hrs.)                     <ul style="list-style-type: none"> <li>• Drills, impact wrenches</li> <li>• Saws (circular, saber, reciprocating, portable band, miter, cutoff)</li> <li>• Grinders and attachments</li> <li>• Other power tools (pneumatic, powder-actuated fastening, pavement breakers, hydraulic jacks)</li> </ul> </li> <li>5. <b>Introduction to Construction Drawings</b> (00105 -10 hrs.)                     <ul style="list-style-type: none"> <li>• Types and purposes</li> <li>• Drawing components, elements, lines of construction, grid line, symbols</li> <li>• Dimensions, scales</li> <li>• Engineer’s and architect’s scale</li> </ul> </li> <li>6. <b>Introduction to Basic Rigging</b> (00106 – 7.5 Hrs.)                     <ul style="list-style-type: none"> <li>• Identify, inspect slings</li> <li>• Identify, inspect rigging hardware</li> <li>• Identify various types of hoists</li> <li>• Rigging hitches and Emergency Stop hand signal</li> </ul> </li> <li>7. <b>Basic Communication Skills</b> (00107 – 7.5 Hrs.)                     <ul style="list-style-type: none"> <li>• Listening and speaking</li> <li>• Reading and writing</li> </ul> </li> </ol> |
|--|--|

### **NCCER Managing Electrical Hazards (26501-15)**

1. Managing electrical hazards (8-12 hrs.)
  - Identify electrical hazard types and locations.
  - Explain related safety guidelines and terms.
  - Recognize and explain hazard boundaries.
  - Explain employer and employee responsibilities in recognizing and managing electrical hazards.
  - Identify common factors that lead to electrical incidents and explain the importance of using good judgement, appropriate procedures, and safe work practices.
  - Analyze the electrical hazards of a given task, plan the job, and complete an electrical work permit request.
  - Select, inspect, and maintain personal protective equipment (PPE) and test equipment used for electrical work.
  - Explain how to create an electrically safe work condition.

### **NCCER Electrical Level 1**

- |   |   |
|---|---|
| <ol style="list-style-type: none"><li>8. Orientation to the Electrical Trade (2.5 Hrs.)<ul style="list-style-type: none"><li>• Overview of the electrical trade</li><li>• Career paths available to electricians.</li></ul></li><li>9. Electrical Safety (10 Hrs.)<ul style="list-style-type: none"><li>• Safety rules and regulations for electricians</li><li>• Precautions for electrical hazards found on the job.</li><li>• OSHA-mandated lockout/tagout procedure.</li></ul></li><li>10. Introduction to Electrical Circuits (7.5 Hrs.)<ul style="list-style-type: none"><li>• Ohm's law applied to DC series circuits.</li><li>• Atomic theory, electromotive force, resistance, and electric power equations.</li></ul></li><li>11. Electrical Theory (7.5 Hrs.)<ul style="list-style-type: none"><li>• Series, parallel, and series parallel circuits.</li><li>• Resistive circuits,</li><li>• Kirchhoff's voltage and current laws</li><li>• Circuit analysis.</li></ul></li><li>12. Introduction to the National Electrical Code® (7.5 Hrs.)<ul style="list-style-type: none"><li>• Road map for using the NEC®.</li><li>• Layout and the types of information found within the code book.</li><li>• Finding information using an easy-to-follow procedure.</li></ul></li><li>13. Device Boxes (10 Hrs.)<ul style="list-style-type: none"><li>• Hardware and systems used by an electrician to mount and support boxes, receptacles, and other electrical components.</li><li>• NEC® fill and pull requirements for device, pull, and junction boxes under 100 cubic inches.</li></ul></li></ol> | <ol style="list-style-type: none"><li>14. Hand Bending (10 Hrs.)<ul style="list-style-type: none"><li>• Conduit bending and installation.</li><li>• Techniques for using hand-operated and step conduit benders,</li><li>• Cutting, reaming, and threading conduit.</li></ul></li><li>15. Raceways and Fittings (20 Hrs.)<ul style="list-style-type: none"><li>• Types and applications of raceways, wireways, and ducts.</li><li>• Applicable NEC® requirements.</li></ul></li><li>16. Conductors and Cables (10 Hrs.)<ul style="list-style-type: none"><li>• Types and applications of conductors</li><li>• Proper wiring techniques.</li><li>• Stresses the applicable NEC® requirements.</li></ul></li><li>17. Basic Electrical Construction Drawings (7.5 Hrs.)<ul style="list-style-type: none"><li>• Electrical prints, drawings, and symbols,</li><li>• Information that can be found on schematics, one-lines, and wiring diagrams.</li></ul></li><li>18. Residential Electrical Services (15 Hrs.)<ul style="list-style-type: none"><li>• Electrical devices and wiring techniques common to residential construction and maintenance.</li><li>• Service calculations.</li><li>• Applicable NEC® requirements.</li></ul></li><li>19. Electrical Test Equipment (5 Hrs.)<ul style="list-style-type: none"><li>• Selection, inspection, and use of common electrical test equipment: voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment.</li><li>• Safety precautions and meter category ratings.</li></ul></li></ol> |
|---|---|

## NCCER Electrical Level 2

<ol style="list-style-type: none"><li>1. Alternating Current (17.5 Hours)<ul style="list-style-type: none"><li>• Forces characteristics of alternating-current systems</li><li>• Application of Ohm's law to AC circuits.</li></ul></li><li>2. Motors: Theory and Application (20 Hours)<ul style="list-style-type: none"><li>○ Covers AC and DC motors, including the main components, circuits, and connections.</li></ul></li><li>3. Electric Lighting (15 Hours)<ul style="list-style-type: none"><li>○ Introduces principles of human vision and the characteristics of light. Focuses on the handling and installation of various types of lamps and lighting fixtures.</li></ul></li><li>4. Conduit Bending (15 Hours)<ul style="list-style-type: none"><li>○ Bends in conduit up to 6 inches.</li><li>○ Mechanical, hydraulic, and electrical benders.</li></ul></li><li>5. Pull and Junction Boxes (12.5 Hours)<ul style="list-style-type: none"><li>○ Selecting and sizing pull boxes, junction boxes, and handholes.</li></ul></li><li>6. Conductor Installations (10 Hours)<ul style="list-style-type: none"><li>○ Transportation, storage, and setup of cable reels;</li><li>○ Procedures for complete cable pulls in raceways and cable trays.</li><li>• Methods of rigging</li></ul></li></ol>	<ol style="list-style-type: none"><li>7. Cable Tray (7.5 Hours)<ul style="list-style-type: none"><li>• Focuses on NEC® installation requirements for cable tray and cable installations.</li></ul></li><li>8. Conductor Terminations and Splices (7.5 Hours)<ul style="list-style-type: none"><li>○ Terminating and splicing conductors,</li><li>○ Preparing and taping conductors.</li></ul></li><li>9. Grounding and Bonding (15 Hours)<ul style="list-style-type: none"><li>○ Grounding and bonding electrical systems.</li><li>○ NEC® requirements.</li></ul></li><li>10. Circuit Breakers and Fuses (12.5 Hours)<ul style="list-style-type: none"><li>○ Practical applications of fuses and circuit breakers.</li><li>○ Fuse and breaker sizing.</li></ul></li><li>11. Control Systems and Fundamental Concepts (12.5 Hours)<ul style="list-style-type: none"><li>○ Descriptions of contactors and relays</li><li>○ Practical application of contactors and relays</li></ul></li></ol>
---	---

## NCCER Electrical Level 3

<ol style="list-style-type: none"><li>1. Load Calculations: Branch and Feeder Circuits (17.5 Hours)<ul style="list-style-type: none"><li>○ Calculating branch circuit and feeder loads for residential and commercial applications.</li></ul></li><li>2. Conductor Selection and Calculations (15 Hours)<ul style="list-style-type: none"><li>○ Factors involved in conductor selection, insulation types, current-carrying capacity, temperature ratings, and voltage drop.</li></ul></li><li>3. Practical Applications of Lighting (12.5 Hours)<ul style="list-style-type: none"><li>○ Describes specific types of incandescent, fluorescent, and HID lamps, and ballasts.</li><li>○ Troubleshooting and various types of lighting controls.</li></ul></li><li>4. Hazardous Locations (15 Hours)<ul style="list-style-type: none"><li>○ NEC® requirements for equipment installed in hazardous locations.</li></ul></li><li>5. Overcurrent Protection (25 Hours)<ul style="list-style-type: none"><li>○ Sizing and selecting circuit breakers and fuses for various applications.</li><li>• Short circuit calculations and troubleshooting.</li></ul></li></ol>	<ol style="list-style-type: none"><li>6. Distribution Equipment (12.5 Hours)<ul style="list-style-type: none"><li>○ Overview of switchboards and switchgear,</li><li>○ Grounding and maintenance requirements</li><li>○ Review of drawings.</li></ul></li><li>7. Transformers (12.5 Hours)<ul style="list-style-type: none"><li>○ Covers transformer types, construction, connections, protection, and grounding.</li></ul></li><li>8. Commercial Electrical Services (10 Hours)<ul style="list-style-type: none"><li>○ Covers components, installation, and considerations</li><li>○ NEC® requirements for commercial services.</li></ul></li><li>9. Motor Calculations (12.5 Hours)<ul style="list-style-type: none"><li>○ Covers calculations required to size conductors and overcurrent protection for motor applications.</li></ul></li><li>10. Voice, Data, and Video (10 Hours)<ul style="list-style-type: none"><li>○ Covers installation, termination, and testing of voice, data, and video cabling systems.</li></ul></li><li>11. Motor Controls (12.5 Hours)<ul style="list-style-type: none"><li>○ Selecting, sizing, and installing motor controllers</li><li>• Control circuit pilot devices and basic relay logic.</li></ul></li></ol>
---	---

### NCCER Electrical Level 4

- |   |   |
|---|---|
| <ol style="list-style-type: none"><li>1. Load Calculations: Feeders and Services (20 Hours)<br/>Basic calculation procedures for commercial and residential applications.</li><li>2. Health Care Facilities (10 Hours)<ul style="list-style-type: none"><li>○ Installation of electric circuits in health care facilities</li><li>○ Requirements for life safety and critical circuits.</li></ul></li><li>3. Standby and Emergency Systems (10 Hours)<ul style="list-style-type: none"><li>○ NEC® requirements for electric generators and storage batteries.</li></ul></li><li>4. Basic Electronic Theory (10 Hours)<ul style="list-style-type: none"><li>○ The function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.</li></ul></li><li>5. Fire Alarm Systems (15 Hours)<ul style="list-style-type: none"><li>○ Fire alarm control units</li><li>○ Digital Alarm Communicator Systems</li><li>○ Wiring for alarm initiating and notification devices</li><li>○ Alarm system maintenance</li></ul></li><li>6. Specialty Transformers (10 Hours)<ul style="list-style-type: none"><li>○ Types of transformers and their applications</li><li>○ Selecting, sizing, and installing these devices.</li></ul></li><li>7. Advanced Controls (20 Hours)<ul style="list-style-type: none"><li>○ Applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives</li></ul><p>Basic troubleshooting procedures.</p></li></ol> | <ol style="list-style-type: none"><li>8. HVAC Controls (15 Hours)<ul style="list-style-type: none"><li>○ Basic overview of HVAC systems and controls.</li><li>○ Electrical troubleshooting and NEC® requirements.</li></ul></li><li>9. Heat Tracing and Freeze Protection (10 Hours)<ul style="list-style-type: none"><li>○ Heat tracing systems application and installation requirements.</li></ul></li><li>10. Motor Operation and Maintenance (10 Hours)<ul style="list-style-type: none"><li>○ Motor cleaning, testing, and preventive maintenance.</li><li>○ Basic troubleshooting procedures.</li></ul></li><li>11. Medium-Voltage Terminations/Splices (10 Hours)<ul style="list-style-type: none"><li>○ Overview of the NEC® and cable manufacturers' requirements for medium-voltage terminations and splices.</li></ul></li><li>12. Special Locations (20 Hours)<ul style="list-style-type: none"><li>○ NEC® requirements for selecting and installing equipment, enclosures, and devices in special locations including places of assembly, theaters, carnivals, agricultural buildings, marinas, temporary installations, wired partitions, and swimming pools.</li></ul></li><li>13. Fundamentals of Crew Leadership (20 Hours)</li></ol> |
|---|---|

### NCCER Instrumentation Level 1

- |  |   |
|--|---|
| <ol style="list-style-type: none"><li>1. <b>Orientation to the Trade</b> (2.5 hrs.)<ul style="list-style-type: none"><li>▪ Typical work of instrument fitters and technicians</li><li>▪ Responsibilities and required aptitudes.</li><li>▪ Apprenticeship process and career paths</li></ul></li><li>2. <b>Instrumentation Safety Practices</b> (12.5 hrs.)<ul style="list-style-type: none"><li>▪ Precautions for electrical hazards found on the job.</li><li>▪ OSHA-mandated lockout/tagout procedure.</li><li>▪ Safety practices related to potentially hazardous tools and materials.</li></ul></li><li>3. <b>Hand and Power Tools for Instrumentation</b> (15 hrs.)<ul style="list-style-type: none"><li>▪ Identify, inspect, use, and maintain hand and power tools</li></ul></li><li>4. <b>Craft-Related Mathematics</b> (10 hrs.)<ul style="list-style-type: none"><li>▪ Metric system</li><li>▪ Conversion of English units to metric units.</li><li>▪ Basic algebra, geometric figures, triangle calculations</li></ul></li><li>5. <b>Instrumentation Drawings, Documents - 1</b> (15 hrs.)<ul style="list-style-type: none"><li>• Types of drawings used in instrumentation work</li><li>• Basic instrument symbols, lines, and abbreviations</li></ul></li><li>6. <b>Inspect, Handle, and Store Instrumentation Materials</b> (2.5 hrs.)<ul style="list-style-type: none"><li>• Receiving, inspecting, handling, and storing project-related instrumentation equipment.</li></ul></li><li>7. <b>Electrical Systems for Instrumentation</b> (12.5 hrs.)<ul style="list-style-type: none"><li>• Basic electrical concepts and terms.</li><li>• DC circuit calculations.</li><li>• Electrical measuring instruments and wiring</li></ul></li></ol> | <ol style="list-style-type: none"><li>8. <b>Fasteners</b> (7.5 Hrs.)<ul style="list-style-type: none"><li>• Identify, select, and install threaded and non-threaded fasteners and anchors</li></ul></li><li>9. <b>Gaskets and Packing</b> (7.5 hrs.)<ul style="list-style-type: none"><li>• Recognize, select, and properly install gaskets, packing, and O-rings.</li><li>• Materials used in gaskets and O-rings</li><li>• Applications and limitations.</li></ul></li><li>10. <b>Lubricants, Sealants, and Cleaners</b> (7.5 Hrs.)<ul style="list-style-type: none"><li>• Proper use, storage, handling, and safety practices associated with various lubricants, cutting fluids, sealants, and cleaners.</li><li>• Tools and materials used in applying lubricants and cleaning products.</li></ul></li><li>11. <b>Tubing</b> (15 Hrs.)<ul style="list-style-type: none"><li>• Tubing, tubing materials, fittings, and tools.</li><li>• Storage, handling, cutting, deburring, reaming, bending, and joining of tubing.</li></ul></li><li>12. <b>Steel Piping Practices</b> (10 Hrs.)<ul style="list-style-type: none"><li>• Carbon and stainless steel piping measuring 2" as it applies to instrumentation work.</li><li>• Calculating pipe cut length, cutting, deburring, reaming, and threading pipe.</li></ul></li><li>13. <b>Hoses</b> (7.5 Hrs.)<ul style="list-style-type: none"><li>• Hoses and related fittings</li><li>• Storage and handling.</li><li>• Cutting hoses and installing standard reusable fittings.</li></ul></li></ol> |
|--|---|

## NCCER Instrumentation Level 2

- |   |  |
|---|--|
| <ol style="list-style-type: none"><li>1. <b>Craft-Related Mathematics</b>(15 hrs.)<ul style="list-style-type: none"><li>• Mass, weight, pressure, temperature, and flow</li><li>• Conversion of units</li><li>• Application to instrumentation.</li></ul></li><li>2. <b>Instrumentation Drawings, Documents - 2</b> (20 hrs.)<ul style="list-style-type: none"><li>• Piping and instrumentation drawings,</li><li>• loop sheets,</li><li>• flow diagrams,</li><li>• isometrics and orthographics.</li></ul></li><li>3. <b>Principles of Welding for Instrumentation</b> (10 hrs.)<ul style="list-style-type: none"><li>• Welding procedure for instrument installation</li><li>• Basic techniques and applications</li><li>• Safety precautions</li><li>• Equipment,</li><li>• Brazing and welding procedures.</li></ul></li><li>4. <b>Process Control Theory</b> (20 hrs.)<ul style="list-style-type: none"><li>• Operation of control systems</li><li>• Common modes of control; advantages and disadvantages.</li><li>• Fundamentals and types of controls,</li><li>• individual components and their roles in typical control loops.</li></ul></li><li>5. <b>Detectors, Secondary Elements, Transducers, and Transmitters</b> (20 hrs.)<ul style="list-style-type: none"><li>• Instrumentation elements; operation principles</li><li>• Variables measured by each element</li><li>• Device selection technical manuals, specification sheets, pictures, or actual samples.</li></ul></li><li>6. <b>Controllers, Recorders, and Indicators</b> (10 hrs.)<ul style="list-style-type: none"><li>• Theory of operation and application</li><li>• Pneumatic and electronic equipment.</li></ul></li><li>7. <b>Control Valves, Actuators, and Positioners</b> (15 hrs.)<ul style="list-style-type: none"><li>• Construction, operation, and use</li><li>• Identification and selection of control valves using applicable specifications and schematics.</li></ul></li></ol> | <ol style="list-style-type: none"><li>8. <b>Relays and Timers</b> (7.5 hrs.)<ul style="list-style-type: none"><li>• Principles of operation, variables measured</li><li>• Selection using specification sheets or samples.</li></ul></li><li>9. <b>Switches and Photoelectric Devices</b> (5 hrs)<ul style="list-style-type: none"><li>• Principles of operation, variables measured</li><li>• Device selection using specification sheets or samples.</li></ul></li><li>10. <b>Filters, Regulators, and Dryers</b> (7.5 hrs.)<ul style="list-style-type: none"><li>• Construction, operation, and uses</li><li>• Selection using applicable specifications and schematics.</li></ul></li><li>11. <b>Analyzers and Monitors</b> (5 Hrs.)<ul style="list-style-type: none"><li>• Instrumentation used to sample, analyze, and/or monitor industrial processes</li><li>• Principles of operation.</li><li>• Selection using technical manuals, specification sheets, pictures, or actual equipment samples.</li></ul></li><li>12. <b>Panel-Mounted Instruments</b> (7.5 hrs.)<ul style="list-style-type: none"><li>• Selection of instruments</li><li>• Locating the instruments using drawings,</li><li>• Procedures for installations</li></ul></li><li>13. <b>Installing Field-Mounted Instruments</b> (25 hrs.)<ul style="list-style-type: none"><li>• Selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.</li></ul></li><li>14. <b>Raceways for Instrumentation</b> (17.5 hrs.)<ul style="list-style-type: none"><li>• Identification and selection of conduit, raceways, wireways, cable trays, fittings</li><li>• NEC® requirements for installation.</li></ul></li></ol> |
|---|--|

## NCCER Instrumentation Level 3

- |   |  |
|---|--|
| <ol style="list-style-type: none"><li>1. <b>Control Valves, Actuators, and Positioners</b> (15 hrs.)<ul style="list-style-type: none"><li>• Construction and operation</li><li>• Application and operation of valve positioners.</li><li>• Valve selection criteria; valve and actuator markings and nameplate information.</li></ul></li><li>2. <b>Detectors, Secondary Elements, Transducers, and Transmitters</b> (25 hrs.)<ul style="list-style-type: none"><li>• Detecting different process variables,</li><li>• Converting variables into transmittable form,</li><li>• Transmitting the information to another device for control or informational purposes.</li><li>• Sensing flow, level, temperature, and pressure,</li><li>• Various types of transducers and transmitters.</li></ul></li><li>3. <b>Instrumentation Electrical Circuitry</b> (25 hrs.)<ul style="list-style-type: none"><li>• Series and parallel circuits;</li><li>• resistance, inductance, capacitance in AC circuits;</li><li>• DC power supplies;</li><li>• analog and digital signals;</li><li>• Applications of electrical/electronic circuitry.</li></ul></li></ol> | <ol style="list-style-type: none"><li>4. <b>Relays and Timers</b> (10 Hrs.)<ul style="list-style-type: none"><li>• Principles of operation and applications</li><li>• Selection process.</li></ul></li><li>5. <b>Switches and Photoelectric Devices</b> (10 Hrs.)<ul style="list-style-type: none"><li>• Principles of operation and applications</li></ul></li><li>6. <b>Terminating Conductors</b> (20 Hrs.)<ul style="list-style-type: none"><li>• Methods, procedures, and standards used to terminate and test common types of conductors</li></ul></li><li>7. <b>Grounding, Shielding of Wiring</b> (10 hrs.)<ul style="list-style-type: none"><li>• Grounding, shielding; wire and cable identification.</li><li>• Induced noise and methods to reduce or eliminate</li></ul></li><li>8. <b>Process Control Theory</b> (25 Hrs.)<ul style="list-style-type: none"><li>• Principles and types of control loops</li><li>• ON-OFF and modulating control schemes.</li><li>• Flow, level, temperature, and pressure control loops.</li></ul></li><li>9. <b>Controllers</b> (10 Hrs.)<ul style="list-style-type: none"><li>• Theory of operation and the application</li><li>• Pneumatic and electronic devices.</li></ul></li></ol> |
|---|--|

### NCCER Instrumentation Level 4

<p><b>1. Instrument Calibration and Configuration (60 Hrs.)</b></p> <ul style="list-style-type: none"><li>• Basic concepts of calibration<ul style="list-style-type: none"><li>➢ Three- and five-point methods.</li><li>➢ Pneumatic, analog, and smart instrumentation calibration methods.</li></ul></li><li>• Other devices that require calibration.</li></ul> <p><b>2. Proving, Commissioning, and Troubleshooting a Loop (17.5 Hrs.)</b></p> <ul style="list-style-type: none"><li>• Three stages in readying a loop for operation: checking, proving, and commissioning.</li><li>• Key ideas and differences behind each step</li><li>• Troubleshooting techniques and methodologies, with an emphasis on their use during the three stages of readying a loop.</li></ul> <p><b>3. Tuning Loops (15 hrs.)</b></p> <ul style="list-style-type: none"><li>• Techniques for PID loops</li><li>• Basic tuning theory and formulas.</li><li>• Open, closed, and visual loop tuning methods.</li></ul>	<p><b>4. Digital Logic Circuits (15 Hrs.)</b></p> <ul style="list-style-type: none"><li>• Gates, combination logic, and truth tables.</li><li>• Memory devices, counters, and arithmetic circuits</li><li>• Numbering systems</li></ul> <p><b>5. Programmable Logic Controllers (12.5 Hrs.)</b></p> <ul style="list-style-type: none"><li>• PLCs and their uses in industrial control.</li><li>• Hardware components, applications, communications, number systems, and programming methods.</li></ul> <p><b>6. Distributed Control Systems (15 Hrs.)</b></p> <ul style="list-style-type: none"><li>• Surveys DCS technologies and development.</li><li>• Key components, fieldbuses, servers, and human-machine interfaces.</li><li>• Maintenance and security.</li></ul> <p><b>7. Analyzers and Monitors (30 Hrs.)</b></p> <ul style="list-style-type: none"><li>• Chemistry application in instrumentation.</li><li>• Physical and chemical properties of matter.</li><li>• Different analytical methods: pH, conductivity, ORP, gas analysis, and particulate counts.</li><li>• Specific instruments and techniques.</li></ul>
