Business Ops., Supply Chain, Entrepreneurship

Certified Logistics Technician

Prerequisites: High school/GED and proficiency in reading and math; Introduction to Logistics (self-led online training modules) and Certified Logistics Associate course.

This instructor-led course provides students with the mid-level technical knowledge they will need to understand the world of supply chain and related core competencies. Students will acquire an understanding of product receiving, product storage, order processing, packaging and shipment, inventory control, safe handling of hazardous materials, evaluation of transportation modes, customs, and dispatch and tracking operations. This course is aligned with MSSC standards and the CLT certification exam in administered upon completion.
