

RN-BSN Immunization Checklist

Since clinicals and practicums happen at different partner sites, San Jac can't control their immunization policies or handle exemption requests. Not meeting those requirements could delay your progress or graduation. Be sure to upload all your immunization records by the end of the first 8 weeks of the RN-to-BSN Program to stay on track. If you have any questions, please email SanJacBSN@sjcd.edu.

Here are the immunizations required:

Immunization/Test	Additional Information	Notes
TB Skin Test	Must have been administered with read dates within the past year.	
Chest X-Ray	This is required if you have ever had a positive TB Skin Test and/or BCG vaccine.	
TB Skin Test or Chest X-Ray	Required annually and it may be required every 6 months at some clinical sites.	
Flu Vaccination	Dated within the past year.	
COVID-19	This will be based on your facility requirements.	
TDap	Tetanus, Diphtheria and Pertussis dated within the past 10 years.	
MMR, Varicella, Hepatitis C, and Hepatitis B	You'll need a positive titer series for these immunizations.	
1st Hep-B	You are permitted to apply to the program with the 1st Hep-B immunization of the series, but will need it completed for practicum.
